Objectives and Investment Policy

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the S&P 500 Capped 35/20 Health Care Index, the Fund's benchmark index (Index).
- The Share Class, via the Fund is passively managed and invests in equity securities (e.g. shares) that, so far as possible and practicable, make up the Index.
- The Index measures the performance of stocks from S&P 500 Index which are within the Global Industry Classification Standard (GICS) health care sector. S&P 500 measures the performance of 500 stocks from top US companies in leading industries of the US economy which meet S&P's size, liquidity and free-float criteria. The GICS health care sector currently encompasses two main industry groups. The first includes companies who manufacture health care equipment and supplies or provide health care related services, including distributors of health care products, providers of basic health-care services, and owners and operators of health care facilities and organisations. The second group includes companies primarily involved in the research, development, production and marketing of pharmaceuticals and biotechnology products. The Index may not include and/or may not be limited to every category comprising the sector listed here. Companies are included in the Index on a free float adjusted market capitalisation weighted basis. Free float-adjusted means that only shares available to international investors, rather than all of a company’s issued shares, are used to calculate the Index. Free float market capitalisation is the share price of a company multiplied by the number of shares available to international investors. The Index caps the weight of the largest companies at each rebalance to ensure index diversification. The weight of the largest group entity in the Index is capped at 33% and the remaining group entities at 19%.
- The Fund intends to replicate the Index by holding the equity securities, which make up the Index, in similar proportions to it.
- The fundamental objective of the Share Class is to achieve the return of the Index (net of fees and expenses), through the purchase, holding and disposal of equity securities (e.g. shares) whose performance is intended to match that of the Index.
- The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund’s investment objective. FDIs may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be accumulating shares (i.e. income will be included in their value).
- Your shares will be denominated in US Dollar, the Fund’s base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be directly affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange(s) on which the shares are traded.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

Past Performance

Past performance is not a guide to future performance.

The chart shows the Share Class’s annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Share Class’s net asset value at each year-end. The Fund was launched in 2015. The Share Class was launched in 2015. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
