**Objectives and Investment Policy**

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund’s investments, which reflect the return of the MSCI EM SRI Select Reduced Fossil Fuel Index, the Fund’s benchmark index ("Index").
- The Share Class, via the Fund, aims to invest so far as possible and practicable in equity securities (e.g. shares) that make up the Fund’s Index.
- The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it.
- The Fund’s investment in the equity securities that make up the Index will, at the time of purchase, comply with the ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.

**Risk and Reward Profile**

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater ‘Liquidity Risk’, restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
  - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index’s ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
