Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. Vanguard FTSE 100 UCITS ETF (the "Fund")
A sub-fund of Vanguard Funds PLC

GBP Distributing
ISIN: IE00B810Q511
Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE 100 Index (the "Index").
- The Index is comprised of large-sized company stocks in the UK.
- The Fund attempts to
  1. Track the performance of the Index by investing in all constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
  2. Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.
- The base currency of the Fund is GBP.

Risk and reward profile

- The risk and reward indicator does not take account of the following risks of investing in the Fund:
  - Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
  - Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
  - Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
