

## Globular Clusters in *Turn Left at Orion* (5th edition)

| <i>Page</i> | <i>Name</i>                             | <i>Constellation</i>  | <i>RA</i>     | <i>Dec.</i> | <i>Chapter</i>   |
|-------------|---|-----------------------|---------------|-------------|------------------|
| 212         | <b>NGC 104</b> , 47 <i>Tucanae</i>      | <i>Tucana</i>         | 0 H 24.1 min  | -62° 58'    | South            |
| 174         | <b>NGC 288</b>                          | <i>Sculptor</i>       | 0 H 52.8 min  | -26° 35'    | October–December |
| 214         | <b>NGC 362</b>                          | <i>Tucana</i>         | 1 H 3.2 min   | -70° 51'    | South            |
| 210         | <b>NGC 419</b>                          | <i>Tucana</i>         | 1 H 8.3 min   | -72° 53'    | South            |
| 216         | <b>NGC 1786</b>                         | <i>Dorado</i>         | 4 H 59.1 min  | -67° 45'    | South            |
| 216         | <b>NGC 1835</b>                         | <i>Dorado</i>         | 5 H 5.1 min   | -69° 24'    | South            |
| 62          | <b>M79</b>                              | <i>Lepus</i>          | 5 H 24.2 min  | -24° 31'    | January–March    |
| 226         | <b>NGC 2808</b>                         | <i>Carina</i>         | 9 H 12.0 min  | -64° 52'    | South            |
| 234         | <b>NGC 4372</b>                         | <i>Musca</i>          | 12 H 25.8 min | -72° 40'    | South            |
| 234         | <b>NGC 4833</b>                         | <i>Musca</i>          | 12 H 59.6 min | -70° 52'    | South            |
| 110         | <b>M53</b>                              | <i>Coma Berenices</i> | 13 H 12.9 min | 18° 10'     | April–June       |
| 111         | <b>NGC 5053</b>                         | <i>Coma Berenices</i> | 13 H 16.5 min | 17° 42'     | April–June       |
| 238         | <b>NGC 5139</b> , <i>Omega Centauri</i> | <i>Centaurus</i>      | 13 H 26.8 min | -47° 29'    | South            |
| 114         | <b>M3</b>                               | <i>Canes Venatici</i> | 13 H 42.2 min | 28° 23'     | April–June       |
| 239         | <b>NGC 5286</b>                         | <i>Centaurus</i>      | 13 H 46.4 min | -51° 22'    | South            |
| 124         | <b>M5</b>                               | <i>Serpens</i>        | 15 H 18.5 min | 2° 5'       | July–September   |
| 152         | <b>M80</b>                              | <i>Scorpius</i>       | 16 H 17.1 min | -22° 59'    | July–September   |
| 152         | <b>M4</b>                               | <i>Scorpius</i>       | 16 H 23.7 min | -26° 31'    | July–September   |
| 120         | <b>M13</b> , <i>Great Cluster</i>       | <i>Hercules</i>       | 16 H 41.7 min | 36° 27'     | July–September   |
| 123         | <b>NGC 6229</b>                         | <i>Hercules</i>       | 16 H 47.0 min | 47° 32'     | July–September   |
| 126         | <b>M12</b>                              | <i>Ophiuchus</i>      | 16 H 47.2 min | -1° 57'     | July–September   |
| 154         | <b>M62</b>                              | <i>Oph.-Sco.</i>      | 16 H 54.3 min | -30° 8'     | July–September   |
| 126         | <b>M10</b>                              | <i>Ophiuchus</i>      | 16 H 57.1 min | -4° 7'      | July–September   |
| 154         | <b>M19</b>                              | <i>Ophiuchus</i>      | 17 H 2.6 min  | -26° 15'    | July–September   |
| 122         | <b>M92</b>                              | <i>Hercules</i>       | 17 H 17.1 min | 43° 9'      | July–September   |
| 147         | <b>NGC 6544</b>                         | <i>Sagittarius</i>    | 18 H 07.3 min | -22° 00'    | July–September   |
| 147         | <b>NGC 6553</b>                         | <i>Sagittarius</i>    | 18 H 09.2 min | -25° 54'    | July–September   |
| 158         | <b>M28</b>                              | <i>Sagittarius</i>    | 18 H 24.6 min | -24° 52'    | July–September   |
| 158         | <b>M22</b>                              | <i>Sagittarius</i>    | 18 H 36.4 min | -23° 56'    | July–September   |
| 160         | <b>M54</b>                              | <i>Sagittarius</i>    | 18 H 55.2 min | -30° 28'    | July–September   |
| 240         | <b>NGC 6752</b>                         | <i>Pavo</i>           | 19 H 10.8 min | -59° 59'    | South            |
| 132         | <b>M56</b>                              | <i>Lyra</i>           | 19 H 16.6 min | 30° 10'     | July–September   |
| 160         | <b>M55</b>                              | <i>Sagittarius</i>    | 19 H 40.1 min | -30° 56'    | July–September   |
| 138         | <b>M71</b>                              | <i>Sagitta</i>        | 19 H 53.7 min | 18° 47'     | July–September   |
| 168         | <b>M72</b>                              | <i>Aquarius</i>       | 20 H 53.5 min | -12° 32'    | October–December |
| 164         | <b>M15</b>                              | <i>Pegasus</i>        | 21 H 30.0 min | 12° 10'     | October–December |
| 166         | <b>M2</b>                               | <i>Aquarius</i>       | 21 H 33.5 min | 0° 50'      | October–December |
| 170         | <b>M30</b>                              | <i>Capricornus</i>    | 21 H 40.4 min | -23° 11'    | October–December |
