Those describing themselves as Muslim		
Those describing themselves as White		
Those still in full time education		
Women		

Decide whether you think that each category stated had a majority of people who voted to 'Remain' or to 'Leave' the EU. In each case, you must also estimate what proportion of each category voted for the decision that you have stated as the majority preference. *Note: Social Group AB includes managerial and professional occupations, Group C2DE includes skilled and unskilled manual workers.*

You will be awarded 1 point if you state the correct decision (either 'R' or 'L') and another point if you estimate to within + or – 5% of the majority percentage (but gain no extra points if you guessed the majority preference incorrectly!).
