The owner of an enterprise wants to compare its net profit figure over the last two years. She has given you the following figures:

Identify the year in which net profit was higher. Show your workings.

| | year | r |
|--|------|---|
| | | |

Activity 6

This year, a business owner has decided to focus on cutting costs in her enterprise, as she was concerned about expenses increasing. Last year, her expenses were £21 900. This year, her gross profit was £38 400 and net profit was £22 150.

In £s, calculate the decrease in expenses for the enterprise between this year and last year. Show your workings.

Sandy owns a small bicycle repair shop and would like to improve the financial management of her enterprise. She has given you the following extract from her Statement of Financial Position for last year and would like your help in its completion.

Extract from Statement of Financial Position for an enterprise as at last year

| | £ | £ |
|----------------------------|--------|-----|
| Fixed assets | | |
| Land | 10 000 | |
| Machinery | 4 500 | |
| Total fixed assets | | i |
| Current assets | | |
| Inventory | 4 180 | |
| Cash | 1 730 | |
| Total current assets | 5 910 | |
| Current liabilities | | |
| Creditors | 1 862 | |
| Total current liabilities | ii | |
| Net current assets | 4 048 | |
| Net assets | | iii |

Complete the Statement of Financial Position for items (i) to (iii).

Activity 6

Capital used within the enterprise is listed on the statement of financial position in the capital employed section.

The following extract shows the capital employed section from the Statement of Financial Position for an enterprise for last year.

Extract from the Statement of Financial Position for an enterprise as at last year

| | £ | £ |
|------------------|-------|---|
| Capital | | |
| Owners' capital | 5 000 | |
| Bank loan | 8 000 | |
| Retained profit | 3 600 | |
| Less drawings | 4 500 | |
| Capital employed | | i |

Complete the Statement of Financial Position for item (i).

| · · | e liquid capital ratio is: | |
|---|--|--|
| Liquid capital ratio = Cur | <u>-</u> | |
| | Current liabilities | |
| b Calculate the liquid capital r | atio for the enterprise. Show yo | ur workings. |
| | | |
| Activity 4 | | |
| Dylan owns and operates an e | nterprise selling second-hand v has provided the following figu | nyl records and is concerned about his ability to pay res: |
| Current assets | £5 400 | |
| Current liabilities | £1 800 | |
| Dylan has given you the formu | la for working out the current ra | tio: |
| Current ratio = Current a | _ | |
| Current lia | bilities | |
| a Calculate the current ratio for | or Dylan's enterprise. Show you | workings. |
| | | |
| Dylan has provided you with th | e formula working out the liqui | d capital ratio: |
| Liquid capital ratio = Cur | rent assets - inventory | |
| | Current liabilities | |
| Dylan had an inventory of £3 2 | 40. | |
| b Calculate the liquid capital r | atio for Dylan's enterprise. <mark>Sho</mark> v | v your workings. |
| | | |

- b i) Identify how many units need to be sold per year for Katie's enterprise to break-even.
 - ii) Identify the sales revenue of the enterprise if 2 250 units are sold per year.
 - iii) Identify the total costs of the enterprise if 1 250 units are sold per year.
 - iv) Identify the fixed costs of the enterprise if 750 units are sold per year.

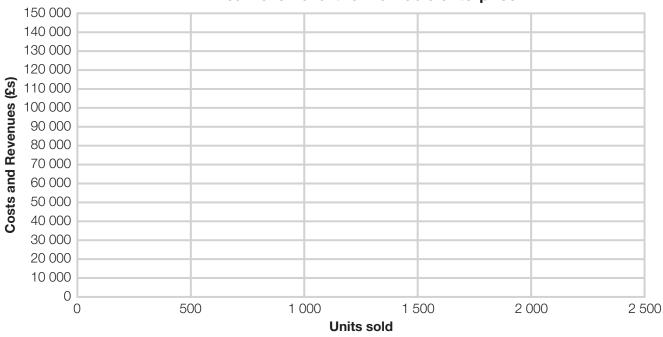

Farhad, the owner of an enterprise, has provided you with the following cost and revenue information. He wants to know how many units he needs to sell in order to break-even.

| Cost and revenue information for Farhad's enterprise | | | | | | | | |
|--|--------|--------|--------|--------|---------|---------|--|--|
| Number of units | 0 | 500 | 1 000 | 1 500 | 2 000 | 2 500 | | |
| Sales revenue | 0 | 30 000 | 60 000 | 90 000 | 120 000 | 150 000 | | |
| Fixed costs | 60 000 | 60 000 | 60 000 | 60 000 | 60 000 | 60 000 | | |
| Total costs | 60 000 | 70 000 | 80 000 | 90 000 | 100 000 | 110 000 | | |

Using the data above and the following blank break-even chart, you should:

- Draw and label the fixed costs, total costs and sales revenue lines
- Identify the break-even point for Farhad's enterprise.

Break-even chart for Farhad's enterprise

Suraj is the owner of an online enterprise that sells personalised keyrings. Each key ring can be personalised with either a photograph or someone's name. He has given you some forecasted cost and revenue information that can be used to construct a break-even chart.

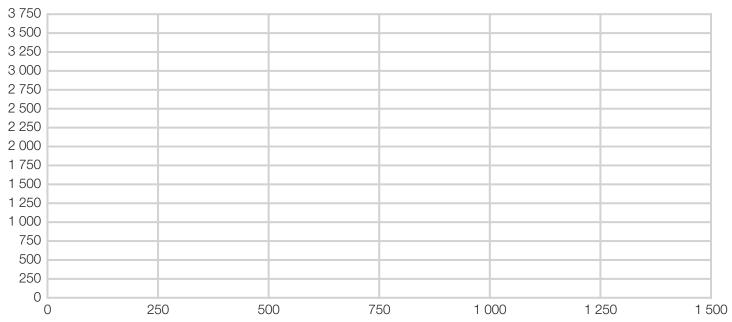

| Cost and revenue forecast information | | |
|--|--------|--|
| Variable costs per personalised key ring | £1 | |
| Total fixed costs per month | £1 500 | |
| Selling price of a personalised key ring | £2.50 | |

a Use the graph supplied below to draw a break-even chart for Suraj's personalised key ring enterprise. Remember to label it fully. You may find it helpful to complete the activity table before you start the chart.

Activity Table

| Number of key rings per month | 0 | 500 | 1 000 | 1 500 |
|-------------------------------|---|-----|-------|-------|
| Sales revenue | | | | |
| Variable costs | | | | |
| Fixed costs | | | | |
| Total costs | | | | |

Break-even Chart for Suraj's enterprise

b Identify how many key rings need to be sold per month for the enterprise to break-even. Show your workings.

| key rings per month |
|---------------------|
