

Instructions for Filling Oasis Pro20

Cleaning/Sanitiser Bottles

and use of Product

Oasis Pro20 is a Cleaning product which sanitizes and cleans surfaces.
(It is not for use on your hands).

Instructions for Use

1. Remove the spray trigger device from the bottle by unscrewing it
2. Place the empty bottle into the auto-dilution device ensuring the black refill hose goes into the open neck of the bottle

Fill to
this
point

3. Press and hold the blue button with Ecolab written on it above the bottle and hold it until the solution has filled up to the area of the bottle above the label as shown in the picture, once it reaches this point release the blue button
4. Allow 1-2 seconds for the refill hose to completely empty into the bottle
5. Carefully remove the bottle from the auto-dilution station and replace the spray trigger on the bottle.
6. Apply the solution to a paper towel and wipe the surface to be cleaned and allow to air dry
7. Once applied, allow 5 minutes to ensure sanitisation of a surface potentially contaminated with Covid-19.

These can be filled at various Filling Stations that will be located around the Campuses.
