

Appendix 2: VBORNET model output quick view

The following figures provide a quick view of the final model outputs. Showing the probability of species presence where Orange is close to 100% likely to be present yellow close to 50% and green is unlikely to be present. The blue square in each figure indicates the area modelled.

Figure 3: Model probability of *Phlebotomus tobbi*

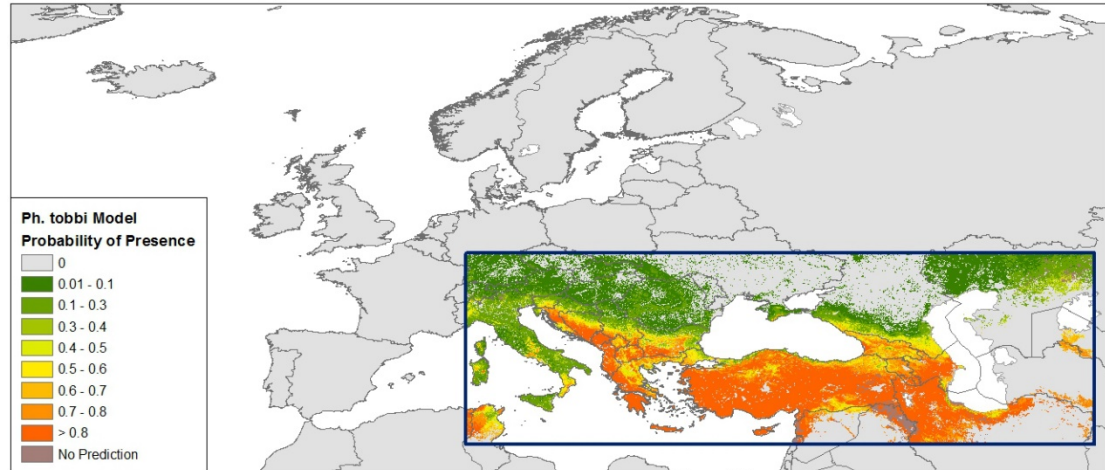

Figure 4: Model probability of *Phlebotomus perniciosus*

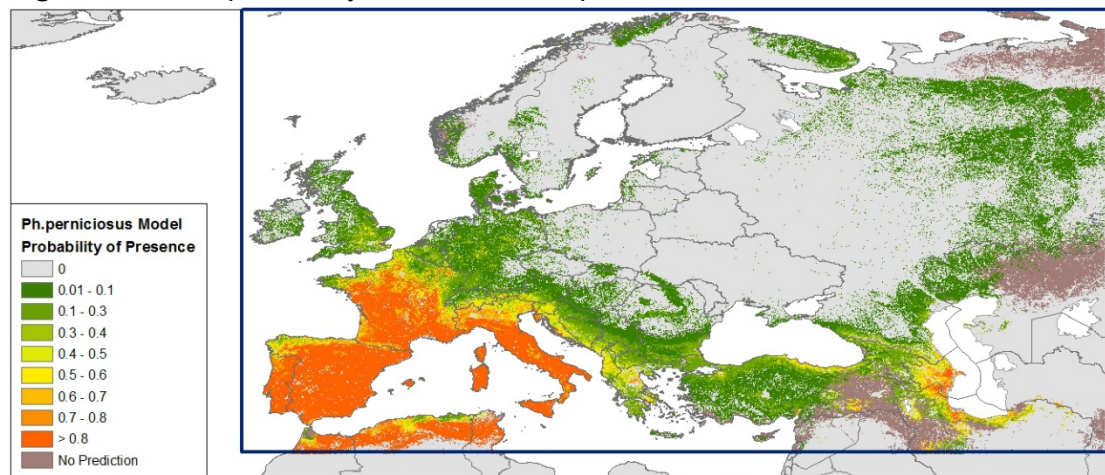

Figure 5: Model probability of *Phlebotomus ariasi*

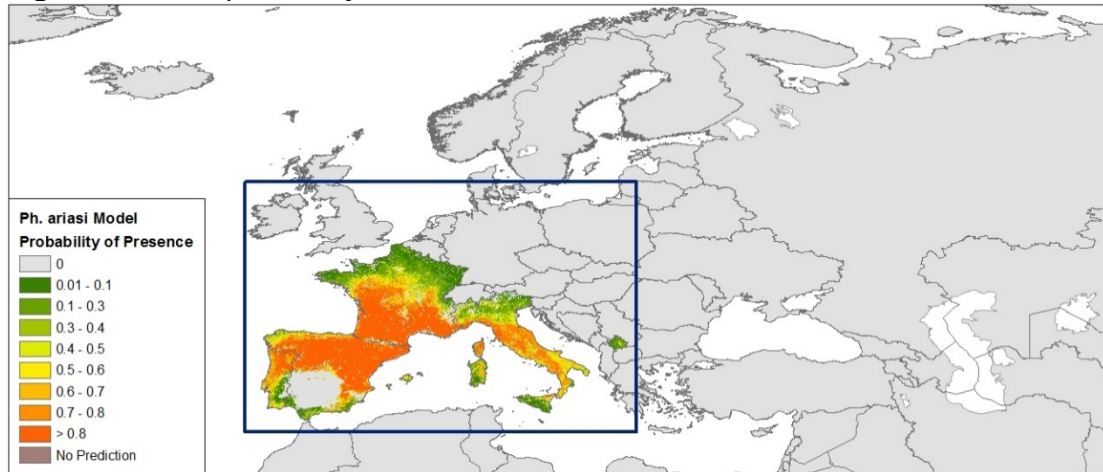

Figure 6: Model probability of *Phlebotomus papatasi*
