

Job Description

Job title:	iOS Developer
Reports to:	Director of Engineering
Department:	Engineering
Work location:	London

About uMotif

uMotif's mission is to put patients at the centre of research by building data capture solutions people love to use. Designed with patients for patients, the uMotif platform supports data capture for each phase of clinical research across all therapeutic areas. Over 22,000 participants use our applications to track and submit e-consent, symptom, eCOA, ePRO, and wearable device data. With expertise in engaging patients and fast deployments, we work with 10 of the top 20 global pharmaceutical companies to power large real-world evidence (RWE) and virtual studies.

Job Summary

As we scale as an organisation we are looking for a motivated and talented mid to senior level iOS developer to join our mobile team.

We are offering the opportunity to work within our multi-disciplinary engineering team to support the delivery of our patient-centric platform. You will be an integral part of our iOS product team owning the development of key features. The role will bring plenty of interesting technical challenges and provide the opportunity for personal growth.

We are looking for someone who:

- Is passionate about technology and keeps up with progressing innovations across the industry
- Has excellent interpersonal and communication skills
- Has a positive "can-do" attitude
- Is fluent in Swift and Objective-C
- Writes high-quality and testable code
- Is capable of managing time and prioritising tasks, and persistent in the face of blockers
- Can estimate and scope new requirements
- Has experience releasing commercial applications in the Apple App Store
- Has experience in Jira and Github in a collaborative environment

- Can identify potential risks and regulatory issues to end users (e.g. data security, data integrity, etc.)

Responsibilities

- Advise, estimate, and deliver proposed features
- Deliver high quality code
- Create unit and automated tests
- Improve quality of existing code base
- Support testers in their roles
- Collaborate with backend developers
- Advise on new and existing issues
- Contribute to developer code reviews

Requirements

- Experience in iOS native mobile development
- Experience with both Swift and Objective-C
- Experience with TDD
- Experience with CoreData, encryption, storyboards, xibs, and autolayout
- Experience with writing frameworks for third-parties
- Sound knowledge of iOS UI design principles and software design patterns
- Experience with version control (e.g. Git)
- Ability to collaborate in a cross-functional team
- Exposure to Agile methodologies

Nice to have

- CI/CD
- JUnit / Espresso
- Docker
- Previous experience in a regulated industry
- Commercial experience with application that use encryption and secure communication

What we offer

- 25 days holiday per year, plus an additional day off for your birthday
- Bupa private medical insurance

- Pension contribution
- Share options
- Cycle to work scheme
- 'uToken' annual lifestyle bonus
