Job title	Senior Web Developer
Reports to	Lead Developer
Department	Engineering
Job type	Full time (permanent)
Work location	Waterloo, London / Remote

About uMotif

uMotif's mission is to put patients at the centre of research by building data capture solutions people love to use. Designed with patients for patients, the uMotif platform supports data capture for each phase of clinical research across all therapeutic areas. Over 22,000 participants use our applications to track and submit e-consent, symptom, eCOA, ePRO, and wearable device data. With expertise in engaging patients and fast deployments, we work with 10 of the top 20 global pharmaceutical companies to power large real-world evidence (RWE) and virtual studies.

Job Summary

We are looking for an experienced senior full stack web developer with a particular focus on Front End web technologies to help build and maintain our award-winning patient data capture platform. We are offering the opportunity to be a key member of the team focussing on all web based UI components within our SOA system ensuring a good user experience, high performance, and responsiveness. We are looking for a proactive and driven individual to take responsibility for key projects and ensure robust delivery of new functionality.

Responsibilities

- Building performant reusable code and libraries
- Optimising the applications for robustness and a good user experience
- Integrating with back-end and mobile services
- Maintaining and ensuring the continual improvement of the code and pipeline

Requirements

- Proficient knowledge of the core Web Technologies (HTML5+, CSS3+ ECMAScript7+)
- Experience using CSS preprocessors (SASS, Less, PostCSS)
- Knowledge of Frontend Frameworks (React, Vue, Angular)
- Experience dealing with authentication and APIs (OAuth, JWTs, REST, GraphQL)
- Experience in using workflow automation and build tools (Babel, Webpack)
- Knowledge of appropriate front end programming design patterns
- Understanding of good accessibility practices
- Experience with localisations
- Knowledge of web frontend security concerns
- Appreciation of multiple delivery platforms such as mobile vs desktop, and optimizing output to match the specific platform
- Experience and appreciation of automated testing - unit, integration and acceptance testing
- Experience using Version Control, preferably Git

Nice to have

- Experience with PHP (7.4+), mySql, various AWS services
- Some experience with AngularJS for legacy projects
- Experience with build pipelines and deploy solutions

What we offer

- 25 days holiday per year, plus an additional day off for your birthday
- Bupa private medical insurance
- Workplace pension contribution
- Share options
- Cycle to Work scheme
- 'uToken' annual lifestyle bonus
- Flexible working hours
- Training and personal development contribution

How to apply

Click the “Apply” button on the uMotif Careers webpage for the appropriate role. Attach your CV and a cover letter including a statement to confirm you consent to uMotif holding your CV for a duration of the current recruitment phase.

uMotif is an equal opportunities employer and positively encourages applications from suitably qualified and eligible candidates regardless of sex, race, disability, age, sexual orientation, gender reassignment, religion or belief, marital status, or pregnancy and maternity.

We are looking for the successful candidate to start as soon as possible and applications will be considered in the order they are received.

No recruiters please.
