School of Life and Medical Sciences

Title of Programme:  MSc Molecular Biology
Programme Code:  HHMBIO

Programme Specification

This programme specification is relevant to students entering:
17 September 2018

Associate Dean of School (Academic Quality Assurance):
Stefanie Schmeer

Signature

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

Summary of amendments to the programme

<table>

If you have any queries regarding the changes please email AQO@herts.ac.uk
Programme Specification  MSc Molecular Biology

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

Section 1

A. Programme Rationale

The programme is designed to provide a postgraduate education in Biotechnology for graduates in the Biosciences or Biological Chemistry. A strong practical foundation is provided in the first semester with the study of modules that concentrate on the basic principles and techniques used in modern molecular biology investigations, and on aspects of cellular molecular biology and development. In the second semester there is a progression to problem-based learning (PBL) to develop an in-depth understanding of the application of molecular biological approaches to the production of industrial and medicinal proteins, the characterisation of selected diseases and the design of new drugs for their treatment. During the final semester, the research project may include aspects of, cardiovascular molecular biology, cancer, angiogenesis research, diabetes, general cellular molecular biology, bioinformatics, microbial physiology, fermentation biotechnology and environmental microbiology.

The use of problem based learning approaches is a key feature of the programme and will promote development of investigative skills, the ability to work in a group and confidence in the investigation of new research areas.

B. Educational Aims of the Programme

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in UPR TL03.

Additionally this programme aims to:

- engender a continuing and independent approach to learning, encouraging initiative and self-discipline such that students will be able to comprehend, contribute to, and apply advances in molecular biology;

- build and improve on students’ cognitive skills, including the ability to think logically and independently; to be reflective and critical of scientific hypotheses, to analyse, synthesise and be creative;

- enable students to develop a systematic understanding of knowledge and a critical awareness of associated issues, some of which are at the forefront of molecular biology;

- provide a framework for the acquisition of a comprehensive understanding of molecular biology techniques applicable to research, equivalent advanced scholarship and commercial situations;
• provide a framework for the acquisition of a comprehensive understanding of molecular biology techniques applicable to research, equivalent advanced scholarship and commercial situations;

• develop an ability to apply the techniques described above and an understanding of how the results may be used to inform judgements, and develop and advance ideas;

• provide opportunities for the continuing development of transferable skills including communication, mathematical analysis, use of information technology, problem solving both as part of a team and as an individual.

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2016) have been used as a guiding framework for curriculum design.

D. Programme Structures, Features, Levels, Modules, and Credits

The programme is offered in full-time mode (Semester A intake) and leads to the award of an MSc in Molecular Biology. Entry is normally at level 7.

Professional and Statutory Regulatory Bodies
None

Work-Based Learning, including Sandwich Programmes
Not Applicable

Programme Structure
The programme structure and progression information below (Table 1a and 1b) is provided for the award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

</table>

The award of an MSc requires 180 credit points passed at level 7. Although the modules are assessed by coursework, this will also include some in-course tests.

Table 1b Final and interim awards available
The programme provides the following final and interim awards:
Final Award | Award Title | Minimum requirements | Available at end of (normally): | Programme Learning Outcomes developed (see above)
--- | --- | --- | --- | ---
Masters | Molecular Biology | 180 credit points including at least 150 at level 7 | 3 Semesters | All programme learning outcomes (see Table 2)

Interim Award | Award Title | Minimum requirements | Available at end of Level | Programme Learning Outcomes developed (see above)
--- | --- | --- | --- | ---
Postgraduate Diploma | Molecular Biology | 120 credit points, including at least 90 at level 7 | 2, 3 Semesters | A1, A2, A3, A4, B1, B2, C1, D1, D2, D3, D4, D5
Postgraduate Certificate | | 60 credit points, including at least 45 at level 7 | 1-2 Semesters | For untitled awards: See UPR AS11, section 13: [http://sitem.herts.ac.uk/secreg/upr/AS11.htm](http://sitem.herts.ac.uk/secreg/upr/AS11.htm)

Masters and Diploma awards can be made "with Distinction" or "with Commendation" where criteria as described in UPR AS14, Section D and the students' handbook are met.

Programme-specific assessment regulations

The programme is compliant with the University's academic regulations (in particular, UPR AS11, UPR AS12/UPR AS13 (delete as applicable) and UPR AS14) with the exception of those listed below, which have been specifically approved by the University:

- None

Further points of clarification and interpretation relevant to this specific programme are given below:

- In order to pass any constituent module of the programme, attendance of at least 85% of the classes specified in the module is normally required. Failure to attend the required proportion of classes will normally result in the award of an FREN grade.

E. Management of Programme & Support for student learning

Management

The programme is managed and administered through:

- Dean of School
- Associate Deans (Academic Quality Assurance and Learning and Teaching)
- A Programme Leader who is responsible for the day to day management of the programme and admissions
- A designated Programme Administrator to deal with day to day administration associated with the programme
- Module Co-ordinators who are responsible for individual modules
- A Programme Committee with the following membership: Programme Leader (chair), a Programme Administrator, Module Co-ordinators, School Learning Information Services Consultant, lecturing staff who have a substantial input into the programme, and student representatives.

Support

Students are supported by:

- An induction period at the beginning of the academic session
• An extensive Learning Resources Centre, incorporating a library and computer centre
• A Programme Leader to give academic advice
• Personal tutors to provide pastoral and academic support
• A mentor to support the acquisition of study skills and report writing
• Project tutors
• Module guides providing module information and study guidance
• On-line module information provided via the University’s managed learning environment “Studynet” a University-wide system for study support
• A student handbook
• Comprehensive feedback on assessed assignments
• Student representatives on the Programme Committee
• An English Language Teaching Centre
• A substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters etc
• An Accommodation Office
• An Overseas Student Orientation course
• A Mathematics Drop-in Centre
• A Disabled Student Co-ordinator
• An Equal Opportunities Officer
• The Students’ Union
• Careers, Enterprise and Employment Service

F. Other sources of information

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:
• A Programme (or Student) Handbook;
• A Definitive Module Document (DMD) for each constituent module;
• A Module Guide for each constituent module.
• University of Hertfordshire Course website: http://www.herts.ac.uk/courses/
• Information on Programme and Module External Examiners http://www.studynet1.herts.ac.uk/pl/common/studentcentre.nsf/Teaching+Documents/184A221E5EECA6B780257A5C00250BA9?OpenDocument

The Herts Handbook is an introduction to the academic, social, cultural and sporting services and opportunities available at the University of Hertfordshire, and includes the Student Charter and Student Code of Conduct.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called ‘University Policies and Regulations’ (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: http://www.herts.ac.uk/secreg/upr/. In particular, UPR SA07 ‘Regulations and Advice for Students’ Particular Attention - Index’ provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

The UK Quality Assurance Agency for Higher Education (QAA) has confirmed the quality and standards of provision at the University of Hertfordshire. A key part of QAA's role is to review and report on how universities maintain their academic standards and quality, to inform students and the wider public. The team of QAA reviewers visited the University of Hertfordshire in 2015/16 and judged that its academic standards, the quality and enhancement of its students' learning experience, and the quality of information about this learning experience all meet UK expectations. In other words, the University meets national requirements for standards and quality. The QAA’s report can be accessed at: http://www.qaa.ac.uk/reviews-and-reports/provider?UKPRN=10007147#.V-KhajxyoN
G. Entry requirements

The normal entry requirements for the programme are:

i. a first or second class Honours Degree in Biosciences or Biological Chemistry with a final classification grade of a minimum of 60%; or

ii. a professional qualification accepted as equivalent to the above; or

iii. a qualification in veterinary science, medicine or dentistry or

iv. a first or second class Honours Degree in disciplines other than those described above but where the applicant, in the opinion of the Programme Leader, would benefit from, and succeed on, the programme; or

v. successful completion of the International Pre-Masters (IPM) programme at the University or at Hertfordshire International College (HIC).

In addition, all international students are required to demonstrate an English Language capability of IELTS 6.5 (with no less than 6.0 in any band) or equivalent qualification.

Non-Standard Entry
Applicants not within the categories described above, but who can demonstrate by other means, as specified below, that they can succeed on the programme will be considered on an individual basis.

i. at least 5 years experience working full-time in the biotechnology or pharmaceutical industry.

Applicants will be interviewed in order to establish their suitability based upon the criteria

The applicant will be rated on a 5 point scale for their ability to demonstrate:

1. an advanced knowledge in the field of Molecular Biology and Biotechnology and how this has been developed during employment.
2. critical awareness of current issues in Molecular Biology and Biotechnology, in particular the impact of these on recent developments in the discipline.
3. practical experience in a range of laboratory techniques relevant to the biosciences.

The programme is subject to the University's Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in UPR SA03), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you would like this information in an alternative format please contact:
Ria Clarke, Student Administrator

If you wish to receive a copy of the latest Programme Annual Monitoring and Evaluation Report (AMER) and/or the External Examiner’s Report for the programme, please email a request to ago@herts.ac.uk
**MSc Molecular Biology**

**Table 2: Development of Intended Programme Learning Outcomes in the Constituent Modules**

This map identifies where the programme learning outcomes are assessed in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the programme aims (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own learning, personal and professional development as the programme progresses.

KEY TO PROGRAMME LEARNING OUTCOMES

Knowledge and Understanding
A1. relate gene expression to the phenotype of an organism via an understanding of gene and protein structure and function, developmental biology and the influence of the environment on gene expression.

A2. critically evaluate the methodologies of gene mapping, recombinant DNA technology and introductory bioinformatics and apply them to the investigation and deconstruction of biological systems.

A3. Appreciate the nature and application of biopharmaceuticals and understand the molecular mechanisms underlying protein engineering, production and purification thus enabling the design of such processes.

A4. Evaluate the molecular mechanisms that underpin selected inherited, non-inherited and infectious human diseases and understand the molecular strategies in developing therapeutics.

Practical Skills
C1. design, execute, interpret and report investigations (practical and theoretical) of molecular biology problems and molecular genetics of disease, critically evaluate the contribution made to current knowledge and propose avenues for future study.

Intellectual Skills
B1. evaluate the applications of molecular methods in fundamental research and industry.

B2. critically evaluate scientific literature and experimental data.

Transferable Skills
D1. effectively communicate analyses of case studies in both the written and spoken word and defend the findings of their work.

D2. demonstrate self-direction and originality in tackling and solving problems and act autonomously in planning and executing tasks.

D3. contribute effectively to the functioning of a group and reflect on the learning experience

D4. demonstrate numeracy and manipulate, analyse and present data.

D5. apply appropriate information technology to the recovery, analysis and reporting of data.
