School of Life and Medical Sciences

Title of Programme: Master of Science in Psychology
Programme Code: HHPSYM

Programme Specification

This programme specification is relevant to students entering:
17 September 2018

Associate Dean of School (Academic Quality Assurance):
Stefanie Schmeer

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

Summary of amendments to the programme

If you have any queries regarding the changes please email AQO@herts.ac.uk
Programme Specification  Master of Science in Psychology

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

Section 1

A. Programme Rationale
The rationale of this programme is to provide graduates with GBC (Graduate Basis for Chartered Membership, formerly known as GBR Graduate Basis for Registration) with the BPS (British Psychological Society) allowing them to continue their studies in their chosen specialist area such as Clinical, Forensic, Health, Occupational, Counselling, Neuropsychology, Sport and Exercise, or Educational and Child Psychology with a view to becoming a Chartered Clinical, Forensic, Health, Occupational, or Counselling Psychologist, etc. In addition to gaining knowledge of the core domains of psychology through a combination of interactive and traditional lectures, students develop skills through practical laboratory assignments that enable them to design, carry out and evaluate psychological research. This culminates in the advanced project, conducted independently by the student under the guidance of a supervisor, which investigates a psychological research question of interest. The skills gained by successfully completing a psychology degree are transferrable and highly regarded by employers across a range of career pathways. Further details on careers in psychology can be found on the BPS website.

B. Educational Aims of the Programme
The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in UPR TL03.

Additionally this programme aims to:
- Provide graduates with GBC (Graduate Basis for Chartered Membership) with the British Psychological Society.
- Encourage a dynamic and supportive learning environment in which students are enthused about the academic study of psychology.
- Enable students to display a comprehensive understanding of psychological knowledge, and critical awareness of current problems, debates and insights in psychology.
- Develop students' knowledge, skills, and understanding of the principles, methods, theories and ethical requirements of psychology to progress to and benefit from other post-graduate programmes or professional training in psychology.
- Enhance students’ ability to exercise personal responsibility and to develop further their capacities as autonomous learners.
- Enable students to be able to test claims and assertions using appropriate evidence to support or challenge a position.
• Equip students with the knowledge and skills to conduct advanced research and to understand comprehensively to design and to apply appropriate research methodologies and techniques.

• Enable students to conduct ethically sensitive research.

• Facilitate amongst students the ability to adopt an independent and reflective approach to learning. Further information is available in section D.

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2016) have been used as a guiding framework for curriculum design.

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the discipline of Psychology.

supplement and consolidate what is being taught/learnt and to broaden their individual knowledge and understanding of the subject.

**Intellectual skills:**

<table>
<thead>
<tr>
<th>Teaching/learning methods &amp; strategies</th>
<th>B1 - Formulate and test psychological hypotheses</th>
<th>B2 - Plan, conduct, and report a programme of research</th>
<th>B3 - Identify and select relevant sources of information</th>
<th>B4 - Integrate and critically evaluate information and data from a variety of sources to construct cogent arguments</th>
<th>B5 - Attend to the distinction between primary and secondary sources of information</th>
<th>B6 - Assess the relevance of theoretical knowledge to applied contexts</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intellectual skills are developed through learning and teaching methods where students are guided to apply these skills in constructing critical reviews (B3, B4 and B5), developing and evaluating research proposals (B1, B2 and B6), and in presenting and defending their ideas to other students and to staff (B2, B4, B5). Throughout, the learner is encouraged to develop intellectual skills further by independent study</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Intellectual skills are assessed through:</td>
<td>Unseen examinations (B3, B4, B5)</td>
<td>Laboratory reports (B1, B2)</td>
<td>Essays (B3, B4, B5)</td>
<td>A project report (B1, B2, B3, B4, B5, B6)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Practical skills:**

<table>
<thead>
<tr>
<th>Teaching/learning methods &amp; strategies</th>
<th>C1 - Design and execute investigations</th>
<th>C2 - Interact ethically and professionally with research participants</th>
<th>C3 - Analyse and interpret quantitative and qualitative data</th>
<th>C4 - Write research reports</th>
<th>C5 - Effectively employ specialist computer packages</th>
<th>C6 - Search specialist databases</th>
<th>C7 - Write literature reviews</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practical skills are developed through the programme by: Workshops of searching electronic databases (C5, C6), tutor-led study group sessions (C2, C6), laboratory classes and statistics workshops (C1, C3, C4, C5, C6), carrying out a project under supervision (C1, C2, C3, C4, C7), acting as a participant in research (C1, C2)</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Practical skills are assessed through laboratory reports (C3, C4), statistics class tests (C3, C5), essays (C7), project reports (C1, C2, C3, C4, C5, C6, C7).</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>

</table>
D. Programme Structures, Features, Levels, Modules, and Credits

The programme is offered in 1 year full time and 2 years part time modes, and leads to the award of a Master of Science degree in Psychology. Entry is normally at level 7 with any degree (typically an upper second class classification).

Intake is normally in Semester A (September).

Professional and Statutory Regulatory Bodies

In order to obtain Graduate Basis for Chartered Membership from the British Psychological Society modules marked * must be passed.

Programme Structure

The programme structure and progression information below (Table 1a and 1b) is provided for the award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

Throughout, the learner is encouraged to develop transferable skills by maintaining a record of evidence and completing a personal development plan.

D6-Show respect for the views and ideas of others
D7-Recognise the need to continually update knowledge and skills

D4 is developed by the introduction of supplementary material.
D5 is developed through formal instruction and practice in producing all types of coursework.
D6 is introduced in the induction programme.

D2 is assessed through a poster task and D1-D6 in laboratory group work.

D4 is developed by the introduction of supplementary material.
D5 is developed through formal instruction and practice in producing all types of coursework.
D6 is introduced in the induction programme.

</tr>
</tbody>
</table>

Masters and Diploma awards can be made “with Distinction” or “with Commendation” where criteria as described in UPR AS14, Section D and the students’ handbook are met.

Programme-specific assessment regulations
The programme is compliant with the University's academic regulations (in particular, UPR AS11, UPR AS12 and UPR AS14) with the exception of those listed below, which have been specifically approved by the University:

Further points of clarification and interpretation relevant to this specific programme are given below:

- As specified by the external validating body no compensation for failed modules is permitted

E. Management of Programme & Support for student learning

Management
The programme is managed and administered through:

- A Programme Leader to help students understand the course/programme structure
- Student representatives on programme committees
- A designated programme administrator
- Module Leaders

**Support**

Students are supported by:

- Induction days at the beginning of each new academic session
- Orientation for overseas students
- A Personal Tutor (the programme leader) to provide academic and pastoral support
- A substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters, accommodation, international student support, etc.
- Office of the Dean of Students, incorporating the Chaplaincy, Counselling and nursery
- A versatile online interactive intranet and learning environment
- Access to extensive digital and print collections of information resources
- Attractive modern study environments in two Learning Resources Centres
- A Mathematics Drop-in Centre
- Medical Centre
- University Disability Advisors
- An Equality Office
- Careers Enterprise and Employment Services
- The Students’ Union

**F. Other sources of information**

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:

- A Student Handbook;
- A Definitive Module Document (DMD) for each constituent module;
- A Module Guide for each constituent module.

The Herts Handbook is an introduction to the academic, social, cultural and sporting services and opportunities available at the University of Hertfordshire, and includes the Student Charter and Student Code of Conduct.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called ‘University Policies and Regulations’ (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: [http://www.herts.ac.uk/secreg/upr/](http://www.herts.ac.uk/secreg/upr/). In particular, UPR SA07 ‘Regulations and Advice for Students’ Particular Attention - Index’ provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

The UK Quality Assurance Agency for Higher Education (QAA) has confirmed the quality and standards of provision at the University of Hertfordshire. A key part of QAA's role is to review and report on how universities maintain their academic standards and quality, to inform students and the wider public. The team of QAA reviewers visited the University of Hertfordshire in 2015/16 and judged that its academic standards, the quality and enhancement of its students' learning experience, and the quality of information about this learning experience all meet UK expectations. In other words, the University meets national requirements for standards and quality. The QAA's report can be accessed at: [http://www.qaa.ac.uk/reviews-and-reports/provider?UKPRN=10007147#.V-KHajXy0nE](http://www.qaa.ac.uk/reviews-and-reports/provider?UKPRN=10007147#.V-KHajXy0nE)

**G. Entry requirements**

The normal entry requirements for the programme are:

A good BSc or BA Honours degree (at least a 2:1 degree classification) in any subject;
All International students are required to demonstrate an English Language capability of IELTS 6.5 overall, with at least 6.0 in each band.

The programme is subject to the University’s Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in UPR SA03), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you would like this information in an alternative format please contact: Jodie Berry (j.berry3@herts.ac.uk), Student Administrator.

If you wish to receive a copy of the latest Programme Annual Monitoring and Evaluation Report (AMER) and/or the External Examiner’s Report for the programme, please email a request to aqo@herts.ac.uk
Master of Science degree in Psychology

Table 2: Development of Intended Programme Learning Outcomes in the Constituent Modules

This map identifies where the programme learning outcomes are assessed in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the programme aims (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own learning, personal and professional development as the programme progresses.

| Module Title                                      | Module Code | A1 | A2 | A3 | A4 | B1 | B2 | B3 | B4 | B5 | B6 | C1 | C2 | C3 | C4 | C5 | C6 | C7 | D1 | D2 | D3 | D4 | D5 | D6 | D7 |

Key: Learning Outcome which is assessed as part of the module [X]
KEY TO PROGRAMME LEARNING OUTCOMES

Knowledge and Understanding
A1. The core domains within Psychology
A2. Research methods in Psychology
A3. Application of core domain knowledge to a range of contexts
A4. Selected specialist areas of Psychology to an advanced level

Practical Skills
C1. Design and execute investigations
C2. Interact ethically and professionally with research participants
C3. Analyse and interpret quantitative and qualitative data
C4. Write research reports
C5. Effectively employ specialist computer packages
C6. Search specialist databases
C7. Write literature reviews

Intellectual Skills
B1. Formulate and test psychological hypotheses
B2. Plan, conduct and report a programme of research
B3. Identify and select relevant sources of information
B4. Integrate and critically evaluate information and data from a variety of sources to construct cogent arguments
B5. Attend to the distinction between primary and secondary sources of information
B6. Assess the relevance of theoretical knowledge to applied contexts

Transferable Skills
D1. Communicate effectively, both orally and in writing
D2. Work effectively within a group
D3. Manage time and work to deadlines efficiently
D4. Learn independently and with an enquiring mind
D5. Effectively use information and communication technology, manipulate, sort and present data
D6. Show respect for the views and ideas of others
D7. Recognise the need to continuously update knowledge and skills
