Programme Code: HETESOL

Programme Specification

This programme specification is relevant to students entering:
23 September 2019

Associate Dean of School (Academic Quality Assurance):
Marjolein Groefsema

Signature

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

A. Programme Rationale

The MA in Teaching English to Speakers of Other Languages at the University of Hertfordshire is a one-year full-time or two-year part-time programme for graduates in English, Languages or Education with little or no teaching experience who want a practical course in English Language Teaching at post-graduate level. The programme aims to develop the academic research skills of the students, to give an in-depth introduction to the teaching of English and to provide a strong theoretical and practical foundation in English Language Teaching for future development. A practical teaching element is a central feature of the programme; students will participate in practice teaching sessions and observations during their study period.

B. Educational Aims of the Programme

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in UPR TL03.

Additionally this programme aims to:

- develop a critical understanding of the approaches, methods and techniques of English Language Teaching as well as current issues and debates concerning ELT
- provide practical tools and techniques for teaching English in differing contexts
- develop students’ research skills in the context of English language teaching and learning
- improve students’ ability to critically reflect on their future practice and hence continue to develop their knowledge and skills autonomously, so as to utilise these skills in flexible and novel ways in their careers
- develop a critical and practical awareness of a range of English language teaching contexts, teaching methods, materials and course design, including blended learning and technology
- enable students to gain a systematic understanding of how second languages are learned and taught and developments in the world-wide use of English as first and additional language

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2016) have been used as a guiding framework for curriculum design.

### Teaching/learning methods & strategies

Acquisition of knowledge and understanding is through a combination of lectures (A1-7), seminars and workshops (A1-A7), class observation (A4-6) and coursework (A1-7). Throughout, the students are encouraged to undertake independent study both to supplement and consolidate what is being taught/learned and to broaden their individual knowledge and understanding of the subject.

### Assessment

Knowledge and understanding are assessed through assessed coursework in the form of essays (A1-7), analytical tasks (A1-7), practical materials and course development (A3-6), written & oral reports (A1-7), lesson planning & teaching practice (A6) and reflective writing (A1-A7).

### Teaching/learning methods & strategies

Intellectual skills are developed through methods outlined in section A above. Analysis and evaluation skills (B1-3; B5) are further developed in small group seminars, workshops, class observations and tutorials. The relationship between theory and practice (B3) will be developed in practical teaching sessions and case studies. Reflection skills (B4) will be developed in all modules.

Throughout, the learner is encouraged to develop intellectual skills further through independent study.

### Assessment

Intellectual skills are assessed through analysis and problem solving assignments and reflective writing in class and in assignments. Intellectual skills B2 & B3 will be further tested in the dissertation.
