Academic Year

Academic Year 2021-2022

The University's academic year is made up of 3 Semesters. Each of these is made up of teaching weeks followed by exams.

- Semester A Monday 27 September 2021 - Friday 21 January 2022 (induction w/c 20th Sep)
- Semester B Monday 24 January 2022 - Friday 13 May 2022 (induction w/c 17th Jan)
- Semester C Monday 16 May 2022 - Friday 09 September 2022 (induction w/c 9th May)

Important points

This programme is designed to attract students who wish to develop careers in the field of public health practice, management or research, as well as practitioners and managers already in the field, who wish to enhance their career development. The benefits of delivering the programme online means it offers greater flexibility than classroom taught programmes, it fits around busy work and family commitments and it offers a great opportunity to study and collaborate with students from across the globe, which further enhances knowledge skills and experience.

The programme is tailored towards the needs of diverse health professionals including doctors, pharmacists, nurses, health visitors, midwives, social workers and allied health, social care and environmental health professionals, as well as the wider public health workforce in the non-governmental sector in the following ways:

expertise in areas of research methods and evaluation; policy, planning and commissioning; theory and methods for promoting health and managing illness, is delivered by a highly experienced teaching team, which includes practitioners in the field of public health.

Compulsory modules on the programme provide a comprehensive understanding to critically review and evaluate evidence for interventions and strategies to improve public health outcomes. Students will gain the skills and understanding required to meet the societal, ethical, cultural, economic, political and management challenges to improve health in our populations.

The range of optional modules offered as well as the breadth of real-world cases studies used across the programme, will provide opportunities for specialism in the global and local context in areas including: commissioning and leadership, environmental health and well-being, promoting health, addressing internet addictive behaviour, exercise and nutrition, health systems approaches to improving public health outcomes and addressing health inequalities.

In addition, the programme incorporates the core competencies of public health practice as defined by the Faculty of Public Health (UK) and the programme learning outcomes are mapped to the expectations of the Agency for Accreditation of Public Health

Education in the European Region¹ (APHEA). These attributes ensure the programme is fit for purpose and fit for value, creating the potential of enhancing professional development, career advancement and employability.

In addition, the programme has the potential to enhance professional development, career advancement and employability as follows: the programme incorporates the core competencies of specialist public health practice as defined by the UK Faculty of Public Health; the programme learning outcomes are mapped to the expectations of the Agency for Accreditation of Public Health Education in the European Region and UK Public Health Register. Further details can be found in the **Programme Specification**.

IT Skills required:

Basic IT skills are a requirement for anyone wishing to study online. For example, you will need to be confident using an internet browser, communicating via email and using Microsoft Office tools (e.g. Word, Excel) or equivalent. An ability to learn and adapt to new technologies is also important, for example, you will be asked to participate in a virtual classroom session, contribute to a discussion forum and upload assignments to an online portal.

Our driving force as a team is to provide an exciting, challenging and valuable learning experience, underpinned by research, delivered by highly experienced teaching staff and practitioners, which aims to enthuse continued passion in the field of public health to improve the quality of people’s lives.

Awards

- There are three awards:
- Post-Graduate Certificate in Public Health (60 credits)
- Post Graduate Diploma in Public Health (120 credits)
- Master of Public Health (180 credits)

Outline Programme Structure

The Post Graduate Certificate in Public Health is part time only, Semester A (September) entry over eight months.
 The Post Graduate Diploma in Public Health is a Semester A only entry, part time over 12-15 months and full-time over 8 months.
 The Master of Public Health full time is a Semester A entry is over 12 months.
 The Master of Public Health part time is either a Semester A or Semester C (May) entry, over 2-5 years.
 The tables below are for guidance only for the Post Graduate Certificate, the Post Graduate Diploma full-time and the Master of Public Health full time. Full time students will study 60 credits per semester and for part-time study is up to 30 credits per semester.
If considering full-time, it is important to have very good organisational skills. Studying full-time will involve completing two (2) modules per semester and each module will involve completing between three (3) to four (4) assessments. The timing of these assessments could be very close between the modules.

Please note that the availability of optional modules will depend on uptake. They may not run every year and running semester may vary from year to year.

Master of Public Health – Full Time – Semester A Entry			
Semester A	Semester B	Semester C	
Public Health Foundations (C)	Evidence Based Practice (C)	Option	
Public Health Research and Epidemiology (C)	Communicable and Non-Communicable Conditions (C)	Project Report (C)	

Course delivery

This course is delivered 100% online via the University's virtual learning environment StudyNet. It can be studied flexibly, which allows students to fit their studies around work and life commitments. However, there will be specific deadlines to submit or take assessments.

Full details on assessment schedules can be found in the relevant Module Guide, which will be published at the start of the module.

The number of study hours will vary depending on student's prior knowledge and experience with the subject. The expectation for a 30-credit module is to study 20-25 hours per week over 12 weeks.

Method of assessment

Modules are assessed by a combination of coursework and online tests. The dates of assignment submission and online tests are fixed. At the beginning of each module, assessments dates and times are published. The online tests are available for a fixed period of time, to ensure all students can find a convenient opportunity to complete them within that period.

If you cannot meet the assignment deadlines or test dates, you must inform the Module Leader in advance of the deadlines to get appropriate advice.

Due to the ongoing effects of the pandemic some teaching sessions may be delivered online. Therefore, to study online you will need access to a suitable computer or similar electronic device and a good reliable Internet connection, which may incur additional expenses.

Please note that our Learning Resource Centres (LRCs) have PCs and Macs available to use, including hi-spec PCs. The university also has laptop loans available at both LRCs and provide a remote desktop portal service to allow users to access the software on Lab and LRC Windows PCs when not on campus.

Additional expenses

You can find full details of your course tuition fees in the Fees and Finance Policy.

Courses materials (i.e. e-books, software or support materials) are usually included in your tuition fees, unless specified otherwise.
