

School of Physics, Engineering and Computer Science

Title of Programme: MEng / BEng Honours in Aerospace Engineering.

Programme Code: ENENGA

Programme Specification

This programme specification is relevant to students entering:
01 September 2021

Associate Dean of School (Academic Quality Assurance):
Dr Mariana Lilley

Signature

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

Summary of amendments to the programme:

Section	Amendment
D	Placement duration adjusted to 30 weeks in the academic year 2021/22 as defined in UPR AS 11.
D	4ENT1168 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	4ENT1169 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	5ENT1128 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	5ENT1133 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	5ENT1134 adjusted from 70% exam/ 30% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.

D	6ENT1132 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	6ENT1166 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	6ENT1167 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	6AAD0026 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	6ENT1171 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1152 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1153 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1135 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1157 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1158 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.
D	7ENT1069 adjusted from 60% exam/ 40% coursework to 100% coursework* in the academic year 2021/22, due to the covid pandemic.

* Learning outcomes for this module will be assessed via coursework using alternative modes of assessment. Alternative modes of assessment include, but are not limited to, take home coursework and online timed assessments.

If you have any queries regarding the changes please email AQO@herts.ac.uk

Programme Specification

BEng Honours in Aerospace Engineering
BEng Honours in Aerospace Engineering with Space Technology
BEng Honours in Aerospace Engineering with Pilot Studies
MEng Honours in Aerospace Engineering
MEng Honours in Aerospace Engineering with Space Technology
MEng Honours in Aerospace Engineering with Pilot Studies

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

Section 1

Awarding Institution/Body	University of Hertfordshire
Teaching Institution	University of Hertfordshire
University/partner campuses	College Lane
Programme accredited by	Royal Aeronautical Society
Final Qualification	BEng Honours / MEng Honours
All Final Award titles (Qualification and Subject)	Aerospace Engineering Aerospace Engineering with Space Technology Aerospace Engineering with Pilot Studies Aerospace Engineering (Sandwich) Aerospace Engineering with Space Technology (Sandwich) Aerospace Engineering with Pilot Studies (Sandwich) Aerospace Engineering with Year Abroad Aerospace Engineering with Space Technology with Year Abroad Aerospace Engineering with Pilot Studies with Year Abroad Aerospace Engineering with Study Abroad Aerospace Engineering with Space Technology with Study Abroad Aerospace Engineering with Pilot Studies with Study Abroad Aerospace Systems Technology *** *** (Piloting Experience alternative award) Not accredited *** (Direct entry L6)
FHEQ level of award	6 / 7
UCAS code(s)	H410, H400 and H496 (BEng) H401, H402 and H497 (MEng)
Language of Delivery	English

A. Programme Rationale

The School offers a variety of MEng/BEng degrees. This programme specification covers Aerospace Engineering, Aerospace Engineering with Space Technology and Aerospace Engineering with Pilot Studies. The programme has been developed to (i) satisfy the QAA Engineering Benchmark requirements (ii) to fulfil the initial partial academic requirements of UK-SPEC for CEng status and (iii) meet the professional employment needs of industry.

Initially students study a common portfolio of modules covering a broad range of topics necessary for professional engineering allowing flexibility for students to change their award/pathway as they become more familiar with the opportunities available. The differentiating features of the various awards are progressively introduced as the students' progress.

BEng students with a sufficient level of achievement during levels 4 and 5 are encouraged to consider transfer to the MEng programme. Progression to the MEng programme requires eligibility for at least an upper second-class BEng Honours exit award as defined in [UPR AS14](#). Students will be able to indicate this preference by discussion with their Programme Leader and completing a Study Agreement Form by the end of first teaching week at the start of level 6.

The School has close contacts with a wide range of engineering companies and students are encouraged to take the sandwich option. Alternatively, they may consider Study Abroad options.

Graduates can expect to gain employment either within the industries directly associated with their named award in Aerospace or in industries associated with engineering in general. These industries include small and large scale manufacturing, defence, civil and military aircraft and space. Alternatively graduates may continue their education to a post-graduate level and the University of Hertfordshire has a range of taught MSc awards or research awards that graduates may consider.

B. Educational Aims of the Programme

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in [UPR TL03](#).

Additionally this programme aims to:

- provide a high quality education in engineering;
- provide an education for the individual which enhances his/her prospects of professional employment in engineering and business both in national and international industries;
- provide studies which are accredited by one or more of the Professional Engineering institutions;
- provide studies which develop an awareness of, and underpinning knowledge and understanding of a broad range of Aerospace Engineering areas of expertise;
- provide studies which enable the student to attain a high level of expertise in a range of topics specific to their named award.
 - Aerospace Engineering students will particularly study aerodynamics and aircraft structural design.
 - Aerospace Engineering with Space Technology students will particularly study rocket and satellite technology and space vehicle design.
 - Aerospace Engineering with Pilot Studies students will particularly study the influence of pilot performance on aircraft design.

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are defined by the Engineering Council and recommended in the QAA benchmark statements for Engineering and the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2019). The outcomes relate to the typical student. In addition, the SEEC Credit Level Descriptors for Higher Education (2016) have been used to provide guidance for curriculum design at each level of the programme to reflect student development. The curriculum design has also taken into account UH Graduate Attributes.

	A. Knowledge & Understanding		Teaching and learning methods	Assessment strategy
	BEng	MEng		
A1	SM1b- Knowledge and understanding of the scientific principles and methodology underpinning aerospace engineering, and an understanding, to enable appreciation of the scientific and engineering context, and to support their understanding of relevant historical, current and future developments and technologies.	SM1m- A comprehensive knowledge and understanding of the scientific principles and methodology underpinning aerospace engineering, and an understanding and know-how of the scientific principles of related disciplines, to enable appreciation of the scientific and engineering context, and to support their understanding of relevant historical, current and future developments and technologies.	Acquisition of knowledge and understanding is through the following approaches: Acquisition of A1 and A2 is through a combination of lectures, small group tutorials, coursework and laboratory work at levels 4 and 5 of the programme. Additional support is provided through the Mathematics Support Service. Specialist aspects of A2 are further developed at level 6.	Knowledge and understanding are assessed through combination of unseen examinations and in-course assessments in the form of laboratory reports, essays and phase tests. Some aspects of knowledge and understanding are assessed by design exercises and project reports and presentations. At level 6 some aspects of A3 are assessed by case study reports.
A2	SM2b- Knowledge and understanding of mathematical and statistical methods underpinning aerospace engineering, and to enable the application of a range of mathematical and statistical methods, tools and notations proficiently in the analysis and solution of engineering problems.	SM2m- Knowledge and understanding of mathematical and statistical methods underpinning aerospace engineering, and to enable the application of a range of mathematical and statistical methods, tools and notations proficiently and critically in the analysis and solution of engineering problems.	Acquisition of A3 is through a combination of lectures, projects and coursework throughout the programme. Staff deploy a range of teaching and learning strategies in the most appropriate way for each individual module. This will vary depending on the subject nature of a particular module and the level of study. A more didactic approach will tend to be adopted at lower levels, in particular for A1 and A2. An increasingly self-directed and interactive approach will be adopted at higher levels, particularly for A3.	
A3	SM3b- Ability to apply and integrate knowledge and understanding of other engineering disciplines to support a study of aerospace engineering.	SM3m- Ability to apply and integrate knowledge and understanding of other engineering disciplines to support a study of aerospace engineering and the ability to evaluate them critically and to apply them effectively.	Throughout, the learner is encouraged to undertake independent study both to supplement and consolidate what is being taught/learnt and to broaden their individual knowledge and understanding of the subject.	
A4		SM4m – Awareness of developing technologies related to aerospace engineering		
A5		SM5m - A comprehensive knowledge and understanding of mathematical and computational models relevant to aerospace		

		engineering, and an appreciation of their limitations. SM6m – Understanding the range of concepts from a range of areas, including some outside engineering, and the ability to evaluate them critically and to apply them in engineering projects.		
	B. Intellectual Skills		Teaching and learning methods	Assessment strategy
	BEng	MEng		
B1	EA1b- Understanding of engineering principles and the ability to apply them to analyse of key engineering processes.	EA1m- Understanding of engineering principles and the ability to apply them to undertake critical analysis of key engineering processes.	Engineering analysis skills are developed throughout the programme by the methods and strategies outlined for section A of the intended learning outcomes above, again moving from a more didactic approach to an increasingly self-directed and interactive approach at higher levels, particularly for B2, B3 and B4. Analysis, problem solving and modelling skills are further developed through tutorial work, laboratory work, in-course exercises and project work.	Engineering analysis skills B1, B2 and B4 are assessed through unseen examination papers, laboratory reports and coursework related to in-course exercises. Engineering analysis skills B3 are assessed through project reports and presentations.
B2	EA2- Ability to identify, classify and describe the performance of systems and components through the use of analytical methods and modelling techniques.	EA2- Ability to identify, classify and describe the performance of systems and components through the use of analytical methods and modelling techniques.		
B3	EA3b- Ability to apply quantitative and computational methods in order to solve engineering problems and implement appropriate action.	EA3m- Ability to apply quantitative and computational methods, using alternative approaches, and understanding their limitations, in order to solve engineering problems and implement action.		
B4	EA4b- Understanding of, and the ability to apply, an integrated or systems approach to solving engineering problems.	EA4m- Understanding of, and the ability to apply, an integrated or systems approach to solving complex engineering problems.		
B5		EA5m – Ability to use fundamental knowledge to investigate new and emerging technologies.		
B6		EA6m – Ability to extract and evaluate pertinent data and to apply engineering analysis techniques in the solution of unfamiliar problems.		

	C. Practical skills		Teaching and learning methods	Assessment strategy
	BEng	MEng		
C1	D1- Understand and evaluate business, customer and user needs, including considerations such as the wider engineering context, public perception and aesthetics.	D1- Understand and evaluate business, customer and user needs, including considerations such as the wider engineering context, public perception and aesthetics.	Design skills are developed throughout the programme by the methods and strategies outlined above, again moving from a more didactic approach to an increasingly self-directed and interactive approach at higher levels, particularly for C3 and C4.	C1, C2, C5 and C6 are assessed through unseen examination, coursework, project reports, technical reports and oral presentations.
C2	D2- Investigate and define the problem, identifying any constraints including environmental and sustainability limitations; ethical health, safety, security and risk issues; intellectual property; codes of practice and standards.	D2- Investigate and define the problem, identifying any constraints including environmental and sustainability limitations; ethical health, safety, security and risk issues; intellectual property; codes of practice and standards.	Feedback is given to all students on all coursework produced.	C3, C4 is assessed by review of group project work.
C3	D3b- Work with information that may be incomplete or uncertain, and quantify the effect of this on the design.	D3m- Work with information that may be incomplete or uncertain, quantify the effect of this on the design and, where appropriate, use theory or experimental research to mitigate deficiencies.	Throughout, the learner is encouraged to develop intellectual skills further by independent study.	
C4	D4- Apply advanced problem solving skills, technical knowledge and understanding, to establish rigorous and creative solutions that are fit for purpose for all aspects of the problem including production, operation, maintenance and disposal.	D4- Apply advanced problem solving skills, technical knowledge and understanding, to establish rigorous and creative solutions that are fit for purpose for all aspects of the problem including production, operation, maintenance and disposal.		
C5	D5- Plan and manage the design process, including cost drivers, and evaluate outcomes.	D5- Plan and manage the design process, including cost drivers, and evaluate outcomes.		
C6	D6- Communicate their work to technical and non-technical audiences.	D6- Communicate their work to technical and non-technical audiences.		
C7		D7m – Demonstrate wide knowledge and comprehensive understanding of design processes and methodologies		

C8		and the ability to apply and adapt them in unfamiliar situations. D8m – Demonstrate the ability to generate an innovative design for products, systems, components or processes to fulfil new needs.		
D. Economic, Legal, Social, Ethical & Environmental Context		Teaching and learning methods		Assessment strategy
BEng		MEng		
D1	EL1b- Understanding of the need for a high level of professional and ethical production in engineering and a knowledge of professional codes of conduct.	EL1m- Understanding of the need for a high level of professional and ethical production in engineering, a knowledge of professional codes of conduct, and how ethical dilemmas can arise.	The economic, legal, social, ethical and environmental context of the role of engineers is developed in a series of project based exercises through the programme, and reinforced by a taught module at the start of the programme.	Transferable skills D1 to D6 are assessed through coursework, project reports, technical reports and presentations.
D2	EL2- Knowledge and understanding of the commercial, economic and social context of engineering processes.	EL2- Knowledge and understanding of the commercial, economic and social context of engineering processes.		
D3	EL3b- Knowledge and understanding of management techniques, including project management, that may be used to achieve engineering objectives.	EL3m- Knowledge and understanding of management techniques, including project and change management, that may be used to achieve engineering objectives, their limitations, and how they be applied appropriately.		
D4	EL4- Understanding of the requirement for engineering activities to promote sustainable development and ability to apply quantitative techniques where appropriate.	EL4- Understanding of the requirement for engineering activities to promote sustainable development and ability to apply quantitative techniques where appropriate.		
D5	EL5b- Awareness of the relevant legal requirements governing engineering activities, including personnel, health and safety, contracts, intellectual property rights, product safety and liability issues.	EL5m- Awareness of the relevant legal requirements governing engineering activities, including personnel, health and safety, contracts, intellectual property rights, product safety and liability issues, and an awareness that these may differ internationally.		

D6	EL6b- Knowledge and understanding of risk issues, including health and safety, environmental and commercial risk, risk assessment and risk management techniques.	EL6m- Knowledge and understanding of risk issues, including health and safety, environmental and commercial risk, risk assessment and risk management techniques, and an ability to evaluate commercial risk.		
D7		EL7m - Understanding the key drivers for business success, including innovation, calculated commercial risks and customer satisfaction.		
E. Engineering Practice			Teaching and learning methods	Assessment strategy
	BEng	MEng		
E1	P1- Understanding of contexts in which engineering knowledge can be applied (e.g. operations and management, application and development of technology, etc.)	P1- Understanding of contexts in which engineering knowledge can be applied (e.g. operations and management, application and development of technology, etc.)	<p>Staff deploy a range of teaching and learning strategies in the most appropriate way for each individual module. This will vary depending on the subject nature of a particular module and the level of study. A more didactic approach will tend to be adopted at lower levels, in particular for E1, E2, E3, E4 and E11.</p> <p>Acquisition of skills for E5, E6 and E7 are through a combination of formal lectures and tutorials, as well as project based work.</p> <p>An increasingly self-directed and interactive approach will be adopted at higher levels, particularly for E6, E7 and E8.</p>	<p>Engineering practice is assessed through combination of unseen examinations and in-course assessments.</p> <p>Assessments take many forms as appropriate, and include laboratory reports, demonstrations, essays and phase tests.</p>
E2	P2b- Knowledge of characteristics of particular materials, equipment, processes or products.	P2m- Knowledge of characteristics of particular materials, equipment, processes or products, with extensive knowledge and understanding of a wide range of engineering materials and components.		
E3	P3- Ability to apply relevant practical and laboratory skills.	P3- Ability to apply relevant practical and laboratory skills.		
E4	P4- Understanding use of technical literature and other information sources.	P4- Understanding use of technical literature and other information sources.		
E5	P5- Knowledge of relevant legal and contractual issues.	P5- Knowledge of relevant legal and contractual issues.		
E6	P6- Understanding of appropriate codes of practice and industry standards.	P6- Understanding of appropriate codes of practice and industry standards.		

E7	P7- Awareness of quality issues and their application to continuous improvement.	P7- Awareness of quality issues and their application to continuous improvement.		
E8	P8- Ability to work with technical uncertainty.	P8- Ability to work with technical uncertainty.		
E9		P9m – A thorough understanding of current practice and its limitations, and some appreciation of likely new developments.		
E10		P10m – Ability to apply engineering techniques taking account of a range of commercial and industrial constraints.		
E11	P11b- Understanding of, and the ability to work in, different roles within an engineering team.	P11m- Understanding of, and the ability to work in, different roles within an engineering team, and the ability to exercise initiative and personal responsibility, which may be as a team member or leader.		
	F. Transferable Skills BEng	MEng	Teaching and learning methods	Assessment strategy
F1	G1- Apply their skills in problem solving, communication, information retrieval, working with others and the effective use of general IT facilities.	G1- Apply their skills in problem solving, communication, information retrieval, working with others and the effective use of general IT facilities.	Additional general skills are developed throughout the programme by the methods and strategies outlined in above.	Additional general skills are assessed through the following approaches:
F2	G2- Plan self-learning and improve performance, as the foundation for lifelong learning/CPD.	G2- Plan self-learning and improve performance, as the foundation for lifelong learning/CPD.	F1 is developed through feedback on coursework reports, oral presentations and project reports.	F1, and F2 are assessed through coursework, individual project and technical reports and oral presentations.
F3	G3b- Plan and carry out a personal programmes of work, adjusting where appropriate.	G3m- Monitor and adjust a personal programme of work on an ongoing basis.	F2 is developed in a dedicated module that emphasises the role of such practice.	F3 and F4 are assessed by review of an individual's progress during individual project work.
F4	G4- Exercise initiative and personal responsibility, which may be as a team member or leader.	G4- Exercise initiative and personal responsibility, which may be as a team member or leader.	F3 is developed through project work planning and throughout the programme.F4 is developed through group project and assignment work.	
			Throughout, the learner is encouraged to develop transferable skills by maintaining a record of evidence and completing a personal development plan.	

D. Programme Structures, Features, Levels, Modules, and Credits

The BEng programme is normally offered in full-time (3 years), sandwich (4 years) or part-time (6 years) modes, and leads to the award of a BEng degree with Honours in the student's chosen engineering discipline. If students' progress or enter on the MEng route then this will be for full-time (4 years), sandwich (5 years) or part-time (8 years).

Entry is normally at level 4 (with A-Level, or equivalent qualifications) but is possible at level 5 with suitable qualifications (e.g. an Edexcel HND in Engineering with appropriate subjects studied). Direct entry into level 6 is also possible, for example following successful completion of two years of a similar BEng or MEng degree programme at another HE institution. In this case, the final award will not be accredited. Intake is normally Semester A (September).

Professional and Statutory Regulatory Bodies

Current MEng and BEng Aerospace degrees accredited by RAeS from 2016 up to, and including, 2021:

BEng (Hons) Aerospace Engineering (Full Time - 3 years duration; Sandwich - 4 years duration; Part Time 6 years duration)

BEng (Hons) Aerospace Engineering with Space Technology (Full Time - 3 years duration; Sandwich - 4 years duration; Part Time 6 years duration)

BEng (Hons) Aerospace Engineering with Pilot Studies (Full Time - 3 years duration; Sandwich - 4 years duration; Part Time 6 years duration)

MEng (Hons) Aerospace Engineering (Full Time - 4 years duration; Sandwich - 5 years duration; Part Time 8 years duration)

MEng (Hons) Aerospace Engineering with Space Technology (Full Time - 4 years duration; Sandwich - 5 years duration; Part Time 8 years duration)

MEng (Hons) Aerospace Engineering with Pilot Studies (Full Time - 4 years duration; Sandwich - 5 years duration; Part Time 8 years duration)

Work-Based Learning, including Sandwich Programmes

A designated sandwich programme leads to a University award in the sandwich mode and the word "sandwich" appears on the award certificate. In order for the MEng/BEng to lead to an award in the sandwich mode, the student must undertake a period of approved work experience (industrial placement) of not less than 30 weeks, excluding holidays, normally during year 3. A maximum of two (2) separate placements can be taken neither of which should normally be less than 12 weeks in duration. As defined in [UPR AS11](#).

The work experience will normally be completed within the United Kingdom but with approval may be completed within other countries. Progress of the student's training is monitored by visits from University academic staff. Students will be required to document this period of work in accordance with the guidelines produced by the School. Students on industrial placement will be registered on the Placement Year module (6AAD0015)

Students who have not achieved the minimum progression requirements at the end of level 5 may be prevented from undertaking a sandwich placement. The policy relating to progression onto the placement year from level 5 is given in the School Guidelines on Industrial Placements. Additionally, students on industrial placement but who have level 4 or 5 modules to repeat, will not normally be allowed to re-enrol on these modules until they return from industrial placement. This is to avoid a conflict between UH attendance requirements and the student's commitment to their employer.

Students who do not take the sandwich option, progressing directly to level 6, are automatically transferred to the full-time mode.

All students are required to complete a level 4 15-credit module titled "Professional Engineering" giving them information to prepare for industrial experience and work based learning. Sustainability, recyclability and advances in technology and their impact on engineers and specifically the Aerospace industry sector will be covered in the materials, design and design and build CDIO modules at all levels and explicitly researched in the project modules.

Study Abroad Options

Students may also opt to take additional studies through the Year Abroad or Semester Abroad options at a partner institution in place of all or part of the sandwich placement year, i.e. between Levels 5 and 6. To be eligible for these options students will be expected to have passed 120 credits at level 4 and 120 credits at level 5 with an average of at least 60%. In order to maintain registration with UH, students studying abroad for a full year will be registered on the 6ENT0001 Year Abroad module whilst students studying abroad for a single semester will be enrolled on the 6ENT1051 Semester Abroad module. In recognition of the extra study, provided a full transcript of their achievement in the host academic institution is submitted to the Board of Examiners, this will lead to an award of a BEng degree with Honours in one of the named awards as listed in Section 1 (page 2) “with Year Abroad” or “with Study Abroad” on the award.

Further Features

In order to recognise the significant programme-related extra-curricular commitment and experience that can be gained by students who participate in Formula Student, BMFA University Challenge, IMechE UAS Challenge or other similar competitions, there are two zero-credit-rated elective modules that students may take. These are:

Formula Student (6ENT1043)
UAV Projects (6ENT1042)

They are assessed on a Pass/Fail basis. If taken, they do not contribute to degree classification, but will appear on a student’s results transcript.

Programme Structure

The programme structure and progression information below (Table 1a and 1b) is provided for the Honours award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

Table 1a Outline Programme Structure

Mode of study BEng Full Time: 3 years; Sandwich: 4 years and Part-time: 6 years
MEng Full time: 4 years; Sandwich: 5 years and Part-time: 8 years

Entry point Semester A

The following notations should be read in conjunction with table below:

Course code: EIBENGAE - BEng (Hons) Aerospace Engineering

Course instances for EIBENGAE:

A = Aerospace Engineering

AEST = Aerospace Engineering with Space Technology

AEPSA = Aerospace Engineering with Pilot Studies

Course code: EIMENGA - MEng (Hons) Aerospace Engineering

Course instances for EIMENGA:

MENGA = Aerospace Engineering

MENGAST = Aerospace Engineering with Space Technology

MAEPSA = Aerospace Engineering with Pilot Studies

Level 4

C = compulsory module

Module Title	Module Code	Award			Credit Points	Language of Delivery	% Examination	% Coursework	% Practical	Semester	Year of Study	
		A MENGA	AEST MENGAST	AEPSA MAEPSA							Full Time Mode	Part Time Mode
Engineering Mathematics for Aerospace	4ENT1168	C	C	C	15	English	0	100	0	A	1	1
Mechanical Science for Aircraft Engineering	4ENT1169	C	C	C	15	English	0	100	0	A	1	1
Aerospace Technology & Industry	4AAD0016	C	C	C	15	English	0	100	0	A	1	2
Introduction to Projects & Design	4ENT1170	C	C	C	15	English	0	60	40	A	1	2
Electrical Science for Aircraft Engineering	4ENT1171	C	C	C	15	English	0	100	0	B	1	1
Programming for Aircraft Engineers	4ENT1172	C	C	C	15	English	0	100	0	B	1	2
Aerospace Engineering Professionalism	4ENT1173	C	C	C	15	English	0	100	0	B	1	1
Introductory Robotics & Microcontrollers	4ENT1174	C	C	C	15	English	0	60	40	B	1	2

Progression to level 5 requires:

A minimum of 90 credits to remain on honours award.

Progression to non-honours level 5 with 75 credits may be permissible. The maximum study rate in such an instance would normally be 120 credits but students would be expected to remedy any failed modules from level 4 in the first instance.

Level 5

C = compulsory module

Module Title	Module Code	Award			Credit Points	Language of Delivery	% Examination	% Coursework	% Practical	Semester	Year of Study	
		A MENGA	AEST MENGAST	AEPSA MAEPSA							Full Time Mode	Part Time Mode
Fluids & Aerodynamics	5ENT1128	C	C	C	15	English	0	100	0	A	2	3

Progression to level 6 requires:

210 credit points and above to remain on Honours award.

Progression to non-honours level 6 with 180 credits may be permissible. The maximum study rate in such an instance would normally be 120 credits but students would be expected to remedy any failed modules from level 5 in the first instance.

Level 6

C = compulsory module

O = optional module

Module Title	Module Code	Award			Credit Points	Language of Delivery	% Examination	% Coursework	% Practical	Semester	Year of Study

If any of the progression requirements stated above are not met then the Board of Examiners is empowered to require the student to transfer to the BEng (non-Honours). The study pattern for students transferring onto the BEng (non-Honours) route shall be agreed on a case-by-case basis with the BEng Programme Leader (Aerospace) or Associate Dean of School.

Honours Classification

The University has approved structure and assessment regulations common to all programmes. Full details are provided in [UPR AS14](#), Section D. However, this programme has specific regulations relating to the determination of Honours classification given under the Programme-Specific Regulations in Section 2.

Table 1b Final and interim awards available

The programme provides the following final and interim awards:

Final Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
MEng (Hons) in the named award	Aerospace Engineering Aerospace Engineering with Space Technology Aerospace Engineering with Pilot Studies	480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7. Additionally, students must satisfactorily complete the MEng Individual Project (Aerospace) and MEng Team Project modules.	7	All programme learning outcomes for the specified named award (see Table 2)
MEng (Hons) in the named award (Sandwich)		480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7. Additionally, students must satisfactorily complete the MEng Individual Project (Aerospace), MEng Team Project and Placement Year modules.	7	All programme learning outcomes for the specified named award (see Table 2)
MEng (Hons) in the named award with Study Abroad		480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7. Additionally, students must satisfactorily complete the MEng Individual Project (Aerospace), MEng Team Project and Semester Abroad modules.	7	All programme learning outcomes for the specified named award (see Table 2)
MEng (Hons) in the named award with Year Abroad		480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7. Additionally, students must satisfactorily complete the MEng Individual Project	7	All programme learning outcomes for the specified named award (see Table 2)

		(Aerospace), MEng Team Project and Year Abroad modules.		
BEng (Hons) in the named award	Aerospace Engineering Aerospace Engineering with Space Technology	360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) module.	6	All programme learning outcomes for the specified named award (see Table 2)
BEng (Hons) in the named award (Sandwich)	Aerospace Engineering with Pilot Studies	360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Placement Year modules.	6	All programme learning outcomes for the specified named award (see Table 2)
BEng (Hons) in the named award with Study Abroad		360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Semester Abroad modules.	6	All programme learning outcomes for the specified named award (see Table 2)
BEng (Hons) in the named award with Year Abroad		360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Year Abroad modules.	6	All programme learning outcomes for the specified named award (see Table 2)
MEng (Hons) in the named award	Aerospace Studies Aerospace Studies with Space Technology Aerospace with Pilot Studies***	480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7 (minimum Engineering Council compensation requirements have not been achieved). Compliant with UH compensation requirements. Additionally, students must satisfactorily complete an MEng Individual Project and the MEng Team Project modules. (**)	7	All programme learning outcomes for the named award (see Table 2)

MEng (Hons) in the named award (Sandwich)	<p>Aerospace Studies</p> <p>Aerospace Studies with Space Technology</p> <p>Aerospace with Pilot Studies***</p>	<p>480 credit points including 360 at levels 7/6/5 of which 120 must be at level 7 (minimum Engineering Council compensation requirements have not been achieved). (**)	6	All programme learning outcomes (see Table 2)
BEng (Hons) in the named award with Year Abroad	Aerospace Studies Aerospace Studies with Space Technology Aerospace with Pilot Studies***	360 credit points including 240 at level 6/5 of which 120 must be at level 6 (minimum Engineering Council compensation requirements have not been achieved). Compliant with UH compensation requirements. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and the Year Abroad modules. (**)	6	All programme learning outcomes (see Table 2)

Interim Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
University Certificate		45 credit points at level 4	4	See UPR AS11, section 13: http://sitem.herts.ac.uk/secreg/upr/AS11.htm
Certificate of Higher Education		120 credit points at level 4	4, 5	See UPR AS11, section 13: http://sitem.herts.ac.uk/secreg/upr/AS11.htm
Diploma of Higher Education		240 credit points including at least 120 at level 5	5, 6	<i>For untitled awards:</i> See UPR AS11, section 13: http://sitem.herts.ac.uk/secreg/upr/AS11.htm
BEng in the named award	Aerospace Studies Aerospace Studies with Space Technology Aerospace with Pilot Studies***	For students entering directly at level 6 only, 75 UH specified credits must be at level 6. (*) (**)	6	A1, A2, A3, B1, B2, B3, B4, C1, C2, C3, C4, C5, C6, D1, D2, D3, D4, D5, D6, E1, E2, E3, E4, E5, E6, E7, E8, E11, F1, F2, F3, F4
BEng in the named award	Aerospace Engineering Aerospace Engineering with Space Technology	300 credit points including 180 at level 6/5 of which 60 must be at level 6. (**)	6	A1, A2, A3, A4, A5, B1, B2, B3, B4, C1, C2, C3, C4, C5, C6, D1, D2, D3, D4, D5, D6, E1, E2, E3, E4, E5, E6, E7, F1, F2, F3
BEng in the named award (Sandwich)	Aerospace Engineering with Pilot Studies*** Aerospace Systems Technology	300 credit points including 180 at level 6/5 of which 60 must be at level 6. Additionally, students must satisfactorily complete the Placement Year module. (**)	6	A1, A2, A3, A4, A5, B1, B2, B3, B4, C1, C2, C3, C4, C5, C6, D1, D2, D3, D4, D5, D6, E1, E2, E3, E4, E5, E6, E7, F1, F2, F3
BEng in the named award with Study Abroad		300 credit points including 180 at level 6/5 of which 60 must be at level 6. Additionally, students must satisfactorily complete the Semester Abroad module. (**)	6	A1, A2, A3, A4, A5, B1, B2, B3, B4, C1, C2, C3, C4, C5, C6, D1, D2, D3, D4, D5, D6, E1, E2, E3, E4, E5, E6, E7, F1, F2, F3
BEng in the named award with Year Abroad		300 credit points including 180 at level 6/5 of which 60 must be at level 6. Additionally, students must satisfactorily complete the Year Abroad module. (**)	6	A1, A2, A3, A4, A5, B1, B2, B3, B4, C1, C2, C3, C4, C5, C6, D1, D2, D3, D4, D5, D6, E1, E2, E3, E4, E5, E6, E7, F1, F2, F3
BEng (Hons) in the named award	Aerospace Systems Technology***	360 credit points including 240 at level 6/5 of which 120 must be at	6	All programme learning outcomes for the specified named award (see Table 2).

	level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) module. (**)		
BEng (Hons) in the named award (Sandwich)	360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Placement Year modules. (**)	6	All programme learning outcomes for the specified named award (see Table 2).
BEng (Hons) in the named award with Study Abroad	360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Semester Abroad modules. (**)	6	All programme learning outcomes for the specified named award (see Table 2)
BEng (Hons) in the named award with Year Abroad	360 credit points including 240 at level 6/5 of which 120 must be at level 6. Additionally, students must satisfactorily complete the BEng Individual Project (Aerospace) and Year Abroad modules. (**)	6	All programme learning outcomes for the specified named award (see Table 2)

Notes:

(*) in accordance with UPR AS11, the maximum APL permitted towards this interim award is 225 points at levels 4/5.

(**) this award is not accredited by the Professional Bodies

(***) Students who fail the 6ENT1151 Piloting Experience module cannot be considered for a degree in Aerospace Engineering with Pilot Studies. However, they can be considered for a degree in Aerospace Systems Technology (which is not currently accredited) as an Interim Award.

Programme Specific Assessment Regulations

The programme complies with the University's academic regulations (in particular, [UPR AS11](#), [UPR AS12](#) and [UPR AS14](#)) with the exception of those listed below, which have been approved by the University:

A maximum of 30 credit points can be compensated across the programme, in line with University regulations. Compensation is not permitted for individual modules worth 30 or more credit points at any level of study.

For non-honours awards, the standard University regulations on progression and compensation shall apply, and the Programme Board of Examiners shall have discretion to transfer a student onto a non-honours award where it is to the advantage of the student to do so (for example, where the criteria for progression on an accredited award have not been met).

Major projects (group and individual) i.e. BEng Individual Project, MEng Individual Project and MEng Team Project cannot be compensated. Students who do not succeed in the major projects may be eligible to repeat and will be allocated an entirely different project.

Students exiting with a BEng (Hons) award or MEng (Hons) award shall have their degree classification determined in accordance with UPR AS14 and include the major projects in the calculation of degree.

Course Code	Course Instance	Award Title	Modules (child instance codes & title)	Must be included in classification algorithm?
EIBENGAAE	A3F, A4S, A6P	BEng (Hons) Aerospace Engineering	6ENT1079-0906 BEng Individual Project (Aerospace)	Yes
EIBENGAAE	AEST3F, AEST4S, AEST6P	BEng (Hons) Aerospace Engineering with Space Technology	6ENT1079-0906 BEng Individual Project (Aerospace)	Yes
EIBENGAAE	AEPSA3F, AEPSA4S, AEPSA6P	BEng (Hons) Aerospace Engineering with Pilot Studies	6ENT1079-0906 BEng Individual Project (Aerospace)	Yes
EIMENGAE	MENGA4F, MENGA5S, MENGA8P	MEng (Hons) Aerospace Engineering	6ENT1096-0906 MEng Individual Project (Aerospace)	Yes
			7ENT1073-0906 MEng Team Project	Yes
EIMENGAE	MENGAST4F, MENGAST5S, MENGAST8P	MEng (Hons) Aerospace Engineering with Space Technology	6ENT1096-0906 MEng Individual Project (Aerospace)	Yes
			7ENT1073-0906 MEng Team Project	Yes
EIMENGAE	MAEPSA4F, MAEPSA5S, MAEPSA8P	MEng (Hons) Aerospace Engineering with Pilot Studies	6ENT1096-0906 MEng Individual Project (Aerospace)	Yes
			7ENT1073-0906 MEng Team Project	Yes

Professional Statutory Regulatory Bodies thresholds will apply for accredited awards as per the Engineering Council Compensation and Condonement notice November 2018.

BEng (Hons) accredited awards

- To comply with professional body regulations students must achieve in all 15 credit point modules, after all available attempts under the University regulations, a minimum of 30% (in any allowable attempt) at levels 4, 5 and 6, before the board of examiners will be able to consider compensation for an accredited honours degree. A maximum of 30 credit points can be compensated across the programme, in line with University regulations and professional body accreditation requirements.

MEng (Hons) accredited awards

- To comply with professional body regulations students must achieve in all 15 credit point modules, after all available attempts under the University regulations, a minimum of 30% (in any allowable attempt) at levels 4, 5 and 6, and 40% (in any allowable attempt) at level 7, before the board of examiners will be able to consider compensation for an accredited honours degree. A maximum of 30 credit points can be compensated across the programme, in line with University regulations and professional body accreditation requirements. Compensation is not permitted for individual modules worth more than 30 credit points at level 7.

Further programme-specific regulations (requiring School-level approval) are given below:

- Students wishing to take the CAA or FAA PPL, or BMAA NPPL, Ground School Examinations are responsible for paying the examination fees.
- In order to fly solo, students must meet the medical requirements specified by the relevant regulatory body (EASA, CAA, FAA or BMAA). Where a specific medical examination is required it can be carried out by any UK CAA approved Authorised Medical Examiner (AME) and can be arranged through the flying school. However, there are several AMEs in each county and others overseas. Further details of the medical requirements for flying and the necessary medical examination can be found on the UK Civil Aviation Authority website <http://www.caa.co.uk> which must be consulted; the costs of any

medical certificate shall be borne by the student. (Note that the medical requirements for flying are currently under review, so may change during the currency of this document.)

- The costs of Headsets, Charts, Navigation Equipment and other items necessary for the Aerospace Engineering with Pilot Studies pathway shall be borne by the student.
- The minimum 20 hours flying requirement associated with the 6ENT1151 Piloting Experience module shall be completed by students by the end of Semester B in their final year of study (level 6). Students should note that they may commence flying at a University-approved Flying School at any point after the commencement of their study on the programme. Students may also optionally pay for additional flying by direct arrangement with the Flying School. This might be done, for example, to top up to a PPL.

E. Management of Programme & Support for Student Learning

Management

The programme is managed and administered through:

- Dean of School;
- Associate Dean of School (AQA) who has overall responsibility for Quality Assurance;
- Associate Dean of School (L&T) who has overall responsibility for Learning & Teaching;
- Associate Dean of School (SE & P) who has overall responsibility for Student Experience and professional body accreditation.
- the Programme Leader who is responsible for chairing the programme committee and advising students on the programme as a whole;
- Programme Leaders who are responsible for the day to day management;
- an Admissions Tutor, with specific responsibility for selection;
- a programme committee that includes the above plus student representation;
- module leaders who are responsible for individual modules.

Support

Students are supported by:

- an induction week at the beginning of each new academic session;
- an extensive Learning Resources Centre, incorporating a library and computer centre;
- guided student-centred learning through the use of StudyNet;
- a student handbook that is specific to the programme;
- a Programme Leader who can advise on programme issues;
- Module teaching teams who provide academic support;
- Computer and technical laboratories facilities and technical support staff;
- a Project Supervisor;
- Student Representatives on the programme committee;
- the Study Success Hubs, includes Maths Support Service;
- the Careers, Employment and Enterprise Service that support students looking for either graduate employment or an industrial placement.
- a substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters etc.;
- the Medical Centre;
- the Accommodation Office;
- the International Students Centre who organise an Overseas Student Orientation induction programme;
- printing, photocopying, laminating and document binding facilities;
- a confidential counselling service;
- University Disability Advisors;
- an Equal Opportunities Officer;
- the Students' Union.

F. Other Sources of Information

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:

- A Programme (or Student) Handbook;
- A Definitive Module Document (DMD) for each constituent module;
- A Module Handbook for each constituent module.

The [Ask Herts](#) website provides information on a wide range of resources and services available at the University of Hertfordshire including academic support, accommodation, fees, funding, visas, wellbeing services and student societies.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called 'University Policies and Regulations' (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: <http://www.herts.ac.uk/secreg/upr/>. In particular, [UPR SA07](#) 'Regulations and Advice for Students' Particular Attention - Index' provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

In accordance with section 4(5) of the Higher Education and Research Act 2017 (HERA), the UK Office for Students (OfS) has registered the University of Hertfordshire in the register of English higher education providers. The Register can be viewed at: <https://www.officeforstudents.org.uk/advice-and-guidance/the-register/the-ofs-register/>. Furthermore, the OfS has judged that the University of Hertfordshire delivers consistently outstanding teaching, learning and outcomes for its students. It is of the highest quality found in the UK. Consequently, the University received a Gold award in the 2018 Teaching Excellence and Student Outcomes (TEF) exercise. This award was made in June 2018 and is valid for up to 3 years. The TEF panel's report and conclusions can be accessed at: <https://www.officeforstudents.org.uk/advice-and-guidance/teaching/tef-outcomes/#/provider/10007147>

G. Entry Requirements

For current entry tariff point requirements, please refer to the relevant page for the Course on the University website or on the online prospectus.

Applications are also welcomed from those holding other qualifications including equivalent Scottish Higher or Irish Higher Certificates, International Baccalaureate, and appropriate equivalent international qualifications.

In addition to the academic fees, students studying the module 6ENT1151 Piloting Experience as part of the BEng in Aerospace Engineering with Pilot Studies will be responsible for the cost of at least 20 hours flying tuition at a UH approved flying school. Students who are unable to pay these fees may be awarded an Interim Award as stated in the Programme-Specific Regulations (Section D).

Direct Entry at Second and Final Year

In accordance with University Admissions Policy to allow flexible entry at different levels, it may be possible for applicants to enter the programme at second and final year level. In all instances, candidates will be required to discuss their individual circumstances with the appropriate Admissions Tutor.

Students applying for direct entry into level 5 are required to have an Edexcel HND in an appropriate discipline with merits and distinctions in appropriate subjects which must include Mathematics plus technical or physical sciences. Equivalent European and overseas qualifications are also accepted subject to University approval.

Direct entry into level 6 is also possible, for example following successful completion of two years of a similar BEng or MEng degree programme at another HE institution with either a GPA of 4 from 5, 8 from 10 or a 2:1 performance across the years of study.

Level 4 of this programme includes provision to Hertfordshire International College (HIC), through parallel HIC modules. HIC students, having completed Level 4, may articulate onto this programme at Level 5. In order to do so, they must have successfully completed 120 credits of study at Level 4.

Level 4 of this programme includes provision for progression to level 4 for Technology Degree Programme (Initial Year) students.

The programme is subject to the University's Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in [UPR SA03](#)), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you would like this information in an alternative format please contact: Hutton Hub Student Administration Service hhaq@herts.ac.uk

If you wish to receive a copy of the latest Programme Annual Monitoring and Evaluation Report (AMER) and/or the External Examiner's Report for the programme, please email a request to aqo@herts.ac.uk

MEng / BEng with Honours in Aerospace Engineering

Table 2: Development of Intended Programme Learning Outcomes in the Constituent Modules

The following maps identify where the programme learning outcomes are assessed in the constituent modules. They provide

- i. an aid to academic staff in understanding how individual modules contribute to the programme aims
- ii. a checklist for quality control purposes and
- iii. a means to help students monitor their own learning, personal and professional development as the programme progresses.

Procurement & Supply Chain Management	7ENT1069																																																						

Section 2

Programme management

Relevant QAA subject benchmarking statements	Aerospace Engineering
Type of programme	Undergraduate / Integrated Masters
Date of validation/last periodic review	November 19
Date of production/ last revision of PS	April 21 / April 20
Relevant to level/cohort	Level 4 entering September 2021
Administrative School	School of Physics, Engineering & Computer Science

Table 3 Course structure

Course details		
Course code	Course description	HECOS
EIBENGAAE	BEng (Hons) Aerospace Engineering	100115
EIMENGAAE	MEng (Hons) Aerospace Engineering	100115
