

Title of Programme: BSc (Hons) Bioscience

Programme Code: HHBIO

*Title of Course: BSc (Hons) Bioscience (Pharmacology)*

*Course Code: HHBIOPHA*

# Programme Specification

This programme specification is relevant to students entering:  
25 September 2023

Associate Dean of School (Academic Quality Assurance):  
Stefanie Schmeer

Signature:

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

---

## Summary of amendments to the programme:

Section	Amendment

If you have any queries regarding the changes please email [AQO@herts.ac.uk](mailto:AQO@herts.ac.uk)

# Programme Specification

## BSc (Hons) Bioscience (Pharmacology)

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

### Section 1

<b>Awarding Institution/Body</b>	University of Hertfordshire
<b>Teaching Institution</b>	University of Hertfordshire
<b>University/partner campuses</b>	College Lane/de Havilland
<b>Programme accredited by</b>	Royal Society of Biology
<b>Final Qualification</b>	BSc (Hons)
<b>All Final Award titles</b>	BSc (Hons) Pharmacology
<b>(Qualification and Subject)</b>	BSc (Hons) Pharmacology (Sandwich)
	BSc (Hons) Pharmacology with a Year Abroad
<b>FHEQ level of award</b>	6

#### A. Programme Rationale

The award is aimed at students who wish to develop an understanding of the discovery and development of new medicines and their use in the treatment of disease. The study of pharmacology will consider both the actions of drugs on the body and its systems through an interaction with cells, receptors, enzymes and genes, and the ability of the body to absorb, distribute, metabolise, and excrete drugs. Pharmacology staff have over 50 years combined experience working in the pharmaceutical industry. Their expertise feeds into the content and delivery of the programme. This programme has been accredited by the Royal Society of Biology. Accreditation by the Royal Society of Biology recognises and supports the advancement of skills and education in the biosciences, throughout the UK and internationally. Graduates from accredited degree programmes are equipped with well-rounded knowledge and skill sets, making them highly employable both within and beyond their chosen field. All students wishing to complete a Level 6 laboratory-based research project will have the opportunity to do so, which is a substantial skills enhancement for students going on to study for research degrees and move into research roles. Successful students will be equipped for graduate employment in pharmaceutical and related industries. The strong foundation provided is endorsed by our alumni. In addition, graduates are well prepared for further study in the field including medicine.

#### B. Educational Aims of the Programme

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in [UPR TL03](#).

##### **Additionally this programme aims to:**

Enable students to develop knowledge, understanding and investigative skills relevant to:

- the source and development of new medicines, including clinical testing;
- the factors influencing the absorption, distribution, biotransformation and excretion of drugs;
- the actions of drugs on living systems defined by molecular, biochemical and physiological processes that account for their therapeutic use;
- support the development of the transferable skills and attributes necessary for the students' future professional development through academic study and continual lifelong learning as scientists.

## C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced to the QAA benchmark statements for Bioscience and the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014) and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2021) have been used as a guiding framework for curriculum design.

Knowledge and Understanding	Teaching and learning methods	Assessment strategy
<p>Successful students will be able to:</p> <p>A1- acquire the specific knowledge and skills appropriate to Pharmacology.</p> <p>A2- appreciate the principles of biochemistry, chemistry, genetics, evolution, molecular and cellular biology, mathematics, statistics and physiology upon which an understanding of the discipline pharmacology is based.</p> <p>A3- describe the sources of drugs, the drug discovery and development process, their uses in treatment of disease and their social impact.</p> <p>A4- explain the processes of drug absorption, distribution, metabolism (biotransformation) and excretion.</p> <p>A5- describe the targets for drug action in terms of cells, receptors, enzymes and genes.</p> <p>A6- quantify and explain the mechanisms of drug action on receptors, enzymes and genes.</p> <p>A7- appreciate how theoretical concepts of pharmacology are used in the development of new medicines.</p>	<p>Acquisition of A1 – A7 is through a combination of lectures, laboratory classes, workshops throughout the course as well as the research project and, for sandwich students, the industrial training experience.</p> <p>Acquisition of A2 is through a combination of lectures, laboratory classes, workshops and assignments throughout Levels 4 and 5.</p> <p>Acquisition of A3 is initiated at Level 4 in Physiology with Pharmacology, continued at Level 5 through a combination of lectures, laboratory classes, workshops and assignments in Pharmacology and extended at Level 6 in Translation of Science into Medicines, Neurobiology and Disease, and Therapeutic Pharmacology. The outcome is supported by interpretative exercises at Levels 5 and 6 and seminars at Level 6.</p> <p>A4 is acquired through the lecture, laboratory, computer simulation and workshop programme at Level 5 in Pharmacology and Level 6 in Translation of Science into Medicines. Role play exercises contribute to the achievement of these outcomes.</p> <p>A5 and A6 are acquired through the lecture, laboratory, computer simulation and workshop programme at Level 5 in Biochemistry for Pharmacology, Genes and Genomes, Cell and Molecular Biology and Pharmacology; and at Level 6 in Therapeutic Pharmacology.</p> <p>A7 is acquired throughout final year modules but, in particular, in Applied and Integrated Pharmacological Science.</p> <p>Additional support is provided by visiting speakers from the Pharmaceutical Industry.</p> <p>Throughout, the learner is encouraged to undertake</p>	<p>Knowledge and understanding are assessed by a combination of laboratory reports, seminars, group work, problem-solving exercises, interpretative exercises written assignments and unseen examinations. (A1 – A7).</p>

	independent study both to supplement and consolidate what is being taught/learned and to broaden their individual knowledge and understanding of the subject.	
Intellectual skills	Teaching and learning methods	Assessment strategy
<p>B1- analyse and solve problems related to Pharmacology.</p> <p>B2- understand the ethical implications of their work.</p> <p>B3- be able to execute and report a research project in order to develop skills necessary for independent research (BSc Hons).</p> <p>B4- apply theoretical concepts to the study of pharmacology and evaluate the relationships between theory and practice.</p> <p>B5- display an awareness of the existence and nature of value judgements.</p> <p>B6- demonstrate a critical approach in enquiry and a readiness to test hypotheses, interpret scientific data and, at Level 6, evaluate published literature.</p>	<p>Problem analysis and solving skills (B1) will be developed in all Level 4 and 5 modules but focused on in Bioscience Research Methods at Level 5. Analysis of pharmacology problems will be focused on in final year modules with integration across the topic areas in Applied and Integrated Pharmacological Science. Students are given a firm grounding in ethical practices in science (B2) throughout Level 4 and issues pertinent to Pharmacology are developed in the Level 5 module, Bioscience Research Methods.</p> <p>Aspects relevant to independent research (B3) are introduced in the Level 5 module, Bioscience Research Methods and come into fruition in the Project module at Level 6. The relationship of theory to practice (B4) is achieved throughout the whole programme, focused on in case studies in Applied and Integrated Pharmacological Science, and is the fundamental basis of the placement training (where appropriate).</p> <p>Workshop exercises in all modules make a significant contribution to B5 and this is enhanced by taught material in Bioscience Research Methods.</p> <p>To acquire B6 the student is introduced to the analysis of published literature as part of Bioscience Research Methods at Level 5 and other written assignments, evaluation is developed at Level 6 in lectures, assignments including problem-based learning, and their project. Maths skills are introduced as part of Practical and Transferable Skills at Level 4, developed in practical reports throughout Level 5 and in the Bioscience Research Project. Data handling and statistical analysis is introduced in Practical and Transferable Skills at Level 4, developed in assignments and Bioscience Research Methods at Level 5 and reinforced in the project at Level 6.</p> <p>Throughout, the learner is encouraged to develop intellectual skills further by independent study.</p>	<p>B1, B2 and B4 are assessed in laboratory reports and written assignments. In addition B1 is assessed by unseen examinations. The development of the project proposal in Bioscience Research Methods demonstrates B1, B2 and B4.</p> <p>The Project (B3) is tested by the assessment of performance whilst undertaking the research, the assessment of the report and a poster. B5 and B6 are assessed in laboratory reports, unseen examinations, interpretative exercises, seminars, vivas and the project. Regular on-line assessments are used for maths skills and data analysis.</p>

Practical skills	Teaching and learning methods	Assessment strategy
<p>Successful students will be able to:</p> <p>C1- acquire appropriate laboratory skills, including safe working practices.</p> <p>C2- acquire appropriate computer skills.</p>	<p>The majority of laboratory based practicals will be taught in Practical and Transferable Skills at Level 4. All modules in Level 5 contain a substantial practical component. Practical skills and safe working practices (C1) are built up during Level 4 and applied to experiments in Level 5, consolidated on the work placement and culminate in an individual project.</p> <p>Computer skills (C2) are developed throughout the programme with subject specific software being introduced and used where appropriate.</p> <p>Throughout, the learner is expected to consolidate their development of practical computer skills by use of computers available in the Learning Resource Centre.</p>	<p>Assessment of practical skills and attributes is by both formative and summative assessment in laboratory classes; laboratory reports; problem-solving exercises; unseen examinations; interpretative exercises; preparing abstracts; seminars; and the Bioscience Research Project.</p>
Transferable skills	Teaching and learning methods	Assessment strategy
<p>D1- communicate effectively using a variety of formats.</p> <p>D2- use effectively a range of information sources.</p> <p>D3- organise and present intellectual argument commensurate with the level of award.</p> <p>D4- work effectively independently (e.g., on assignments or during the project).</p> <p>D5- work effectively as part of a team (e.g., in group work, during group discussions and workshops).</p> <p>D6- be numerate.</p> <p>D7- develop the skills required for continued self-managed professional development. reflective practice and life-long learning.</p> <p>D8- to appreciate the importance of graduate attributes through reflective practice.</p> <p>D9- develop skills relevant to a work-place environment.</p> <p>D10- develop the skills necessary to gain a knowledge and understanding of Bioscience topics in a different cultural environment.</p>	<p>Although transferable skills are embedded in the constituent modules of the programme, they are brought together in Level 4 in Practical and Transferable Skills and at Level 5 in Bioscience Research Methods. Personal tutors assist their students to produce a portfolio of evidence substantiating their achievements in this area.</p> <p>Acquisition of D1 is through exercises throughout Level 4; laboratory reports and assignments; oral presentations in personal tutor groups, where presentations can be delivered in a non-threatening atmosphere and tutors give feedback; seminars, vivas and poster at Level 6.</p> <p>Acquisition of D2 is through induction classes at all three Levels and in lectures and workshops in Level 4, in particular in Practical and Transferable Skills and Level 5, Bioscience Research Methods; scientific writing is throughout the course and the Project module in which information seeking will be facilitated by the project tutor.</p> <p>The teaching of D3 is initiated in Practical and Transferable Skills with exercises on report writing; during year 1, personal tutors give feedback on written assignments from a number of modules to facilitate the development of skills; Bioscience Research Methods at Level 5, feedback on assignments at all Levels, seminars at Level 6 and the project introduction make a significant contribution to the development of</p>	<p>Testing of D1, D2 and D3 is through a combination of essays, abstracts, laboratory reports, posters, seminars, group reports, the Project report and written examinations throughout the course.</p> <p>Performance in these skills is monitored by personal tutors and assessed as a portfolio in Practical and Transferable Skills, and Bioscience Research Methods.</p> <p>D4 and D5 are assessed formatively by feedback in the laboratory, workshops and personal tutor groups and summatively in individual and group reports, poster presentations and the project. Teamwork is assessed in an interdisciplinary assignment at Level 5 as part of the portfolio in Bioscience Research Methods. Testing of these skills is a major component of the assessment of the sandwich year.</p> <p>D6 (numeracy) is assessed in numerous assignments throughout the programme and monitored by the personal tutor in a portfolio in Practical and Transferable Skills and Bioscience Research Methods.</p> <p>D7 is assessed in Practical and Transferable Skills and Bioscience Research Methods. The placement report will</p>

this skill. Level 5 BRM tutor groups analyse the arguments contained in a research paper.

The acquisition of D4 and D5 is throughout all the practical components of the programme where students are required to work alone or as part of a team and in some modules, to carry out group assignments. In addition, working as a member of a team is introduced in Human Physiology with Pharmacology at Level 4, explored through an interdisciplinary assignment in Level 5 in Bioscience Research Methods and further enhanced during an exercise in final year induction week.

The acquisition of D6 (numeracy) is initiated in lectures, workshops and class exercises in Practical and Transferable Skills (Level 4) and is developed and reinforced throughout the programme in laboratory classes, workshops, personal tutor meetings and the project. Students have access to the 'Maths Drop-in Centre' and self-learning 'MyMaths lab' compute- based learning package.

Statistical knowledge is developed in Bioscience Research Methods and applied in data analysis in Level 5 and 6 modules including the Bioscience Research Project.

The development of self-management skills (D7) is facilitated, and monitored, by personal tutors involving discussion of skills relevant to successful performance on the degree and future employability. The placement year (if taken) makes significant contributions to the attainment of this skill.

The importance of graduate attributes (D8) is discussed in Practical and Transferable Skills in Level 4 and focused upon in Level 5 induction programme and Bioscience Research Methods where students prepare their CV and reflect on their career development. Finally the importance of graduate attributes is a key part of the placement year/Bioscience Work Experience (if taken) and the Applied and Integrated Pharmacological Science module

Throughout, the learner is encouraged to develop transferable skills and graduate attributes by maintaining a record of evidence and completing a personal development plan.

assess this skill, as does the Project.

D8 is assessed in Practical and Transferable Skills and Bioscience Research Methods and as part of the placement year portfolio and/or Bioscience Work Experience (if taken).

D9 is assessed as part of the portfolio in Bioscience Work Experience and in the placement report for those who undertake a placement year.

D10 is assessed by successful completion of the Year Abroad.

---

## D. Programme Structures, Features, Levels, Modules, and Credits

The programme is offered in full-time (3 years), Sandwich (4 years), with a Year Abroad (4 years) and part-time (6 years) modes and leads to the award of a BSc (Hons) Pharmacology, BSc (Hons) Pharmacology (Sandwich) or BSc (Hons) Pharmacology with a Year Abroad. Entry is normally at Level 4 with suitable A Levels or equivalent qualifications but is possible at Level 5 or Level 6 with suitable qualifications (eg successful completion of Level 4/5 of comparable degrees elsewhere). Intake is normally at the beginning of Semester A in September.

The course structure and progression information below is provided for the final awards (Table 1).

The Programme Learning Outcomes detailed in section C are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

### Professional and Statutory Regulatory Bodies

The awards of BSc (Hons) Pharmacology, BSc (Hons) Pharmacology (Sandwich) and BSc (Hons) Pharmacology with a Year Abroad are accredited by the Royal Society of Biology.

### Work-Based Learning, including Sandwich Programmes

#### BSc (Hons) Pharmacology (Sandwich)

A designated sandwich programme leads to a University award in the sandwich mode and the word "Sandwich" appears on the award certificate. In order for the programme of study to lead to an award in the sandwich mode, the student must undertake a period of approved work experience (industrial/hospital-based placement) of not less than 30 weeks excluding holidays, normally between the end of Year 2 and the beginning of Year 4. This is an academic requirement regarding the minimum number of weeks necessary in order to gain a sandwich award. Students may be expected to work further additional weeks in order to fulfil their contractual obligations to the employer. Students must start their placement before 1st October. The placement will normally be completed within the United Kingdom but there is also the opportunity for a placement abroad subject to University approval. Students on a sandwich placement will be registered on the module Sandwich Year: Bioscience (6LMS0023) for the placement year.

#### Bioscience Work Experience (5LMS0003)

We encourage students to participate in work experience and all students are encouraged to enrol on the optional 5LMS0003 Bioscience Work Experience module. This is additional to the taught modules on the programme. Students undertaking the module are required to complete a minimum of 50 hours within the workplace, either paid or voluntary, and to submit a portfolio to demonstrate their employability skills. The portfolio will include evidence of any employment experiences the student has, evidence of any voluntary work experience, a reflection on the employability skills gained during work experience and a careers action plan, including a curriculum vita, to further their employability skills following graduation.

Student negotiated work experience is available, by agreement with programme staff at Level 5. It is also possible for a student to undertake a summer placement between Level 5 and Level 6.

### Student Exchange programme

#### Incoming Exchange

Incoming students are permitted to study modules on the course at Levels 4, 5 and 6, subject to timetabling constraints.

#### Study Abroad

##### BSc (Hons) Pharmacology with a Year Abroad

There is also an option to study abroad at approved partner institutions. A year abroad is deemed to be not less than two semesters in the host institution. Progress of the student's training is monitored by visits from the University's academic staff. Students will be required to document this period of work in accordance with

the guidelines produced by the Department of Biological and Environmental Sciences. Students who study abroad on Year Abroad will be registered on the module Year Abroad: Bioscience (6LMS0022).

Students who have not achieved the minimum progression requirements at the end of Level 5 may be prevented from undertaking a sandwich placement. Additionally, students on placement, but who have Level 4 or 5 modules to repeat will not normally be allowed to re-enrol on these modules until they return from placement. This is to avoid a conflict between UH attendance requirements and the student's commitment to their employer. There is also a minimum achievement at Level 5 required for the Year Abroad which is set by the partner institutions.

Students who do not take the Sandwich or Year Abroad option, progressing directly to Level 6, are automatically transferred to the full-time or relevant part-time mode.

### Programme Structure

The programme structure and progression information below (Table 1a and 1b) is provided for the Honours award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

#### Table 1a Outline Programme Structure

##### Mode of study Full-time

Timetabled teaching sessions can be on any day of the week but where there are multiple sessions the student will be assigned slots which best fit in with the rest of their timetable.

##### Entry point Semester A

##### Level 4

<b>Compulsory Modules</b>	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Module Title						
Cell and Microbiology	4LMS0155	15	50	50	0	A
Human Physiology with Pharmacology	4LMS0002	30	0	100	0	AB
Practical and Transferable Skills	4LMS0006	30	0	70	30	AB
Core Biochemistry	4LMS0154	15	50	50	0	B
Molecular Biology and Genetics	4LMS0007	15	50	50	0	B

  

<b>Optional Modules</b>	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Module Titles						
Chemistry for the Biological Sciences	4LMS0004	15	0	100	0	A
Molecular Structure and Reactivity	4LMS0040	15	50	50	0	A

## Level 5

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Pharmacology	5LMS0025	30	50	50	0	AB
Genes and Genomes	5LMS0091	15	50	50	0	A
Cell and Molecular Biology	5LMS0092	15	50	50	0	B
Principles of Immunology	5LMS0009	15	50	50	0	A
Biochemistry for Pharmacology	5LMS0103	15	50	50	0	A
Biology of Disease	5LMS0022	15	50	50	0	B
Bioscience Research Methods	5LMS0001	15	0	100	0	AB
<b>Optional Modules</b>						
Module Titles						
Bioscience Work Experience*	5LMS0003	15	0	100	0	AB

\* This module will not be included in the degree algorithm for calculation of the final award.

## Placement Year/Year Abroad

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Optional Modules</b>						
Module Titles						
Sandwich Year: Bioscience	6LMS0023	0	0	100	0	ABC
Year Abroad: Bioscience	6LMS0022	0	0	100	0	ABC

## Level 6

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Therapeutic Pharmacology	6LMS0152	30	50	50	0	A
Neurobiology and Disease	6LMS0029	30	50	50	0	AB
Translation of Science into Medicine	6LMS0030	15	50	50	0	A
Applied and Integrated Pharmacological Science	6LMS0027	15	0	100	0	B
Bioscience Research Project	6LMS0008	30	0	100	0	AB

Progression to level 5 requires a minimum of 105 credits and passes in the module Practical and Transferable skills.

Progression to level 6 requires a minimum of 105 credits at level 5. The module 5LMS0003 Bioscience Work Experience may not be included in the credits required for progression.

The award of an Honours degree requires 360 credit points passed with a minimum of at least 120 at Level 6 including the final year project.

#### Honours classification

The University has approved structure and assessment regulations common to all programmes. Full details are provided in [UPR AS14](#), Section D.

### Table 1a Outline Programme Structure

#### Mode of Study Part-time

This requires the same modules to be completed as per the full-time pathway. The following describes the standard part-time programme structure, with completion of 60 credits per year. Deviations from this structure are possible, subject to meeting module prerequisites and agreement by the Programme Leader. Part-time students may study up to 75 credits a year. The progression requirements above also apply for this mode of study. Students on the part-time mode may also take a sandwich placement year or year abroad option but any of these need to be completed in 1 year (so that the programme is completed in a maximum of 7 years in total) as described below in the programme-specific regulations.

#### Entry point Semester A

#### Year 1 / Level 4

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Cell and Microbiology	4LMS0155	15	50	50	0	A
Practical and Transferable Skills	4LMS0006	30	0	70	30	AB
Molecular Biology and Genetics	4LMS0007	15	50	50	0	B

#### Year 2 / Level 4

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Human Physiology with Pharmacology	4LMS0002	30	0	100	0	AB
Core Biochemistry	4LMS0154	15	50	50	0	B

Students should also choose one of the following modules:

<b>Optional Modules</b> Module Titles	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Chemistry for the Biological Sciences	4LMS0004	15	0	100	0	A
Molecular Structure and Reactivity	4LMS0040	15	50	50	0	A

### Year 3 / Level 5

<b>Compulsory Modules</b> Module Title	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Pharmacology	5LMS0025	30	50	50	0	AB
Biochemistry for Pharmacology	5LMS0103	15	50	50	0	A
Biology of Disease	5LMS0022	15	50	50	0	B

### Year 4 / Level 5

<b>Compulsory Modules</b> Module Title	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Genes and Genomes	5LMS0091	15	50	50	0	A
Cell and Molecular Biology	5LMS0092	15	50	50	0	B
Principles of Immunology	5LMS0009	15	50	50	0	A
Bioscience Research Methods	5LMS0001	15	0	100	0	AB

Students can also choose the following module in either Year 3 or Year 4

<b>Optional Modules</b> Module Titles	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
Bioscience Work Experience*	5LMS0003	15	0	100	0	AB

\* This module will not be included in the degree algorithm for calculation of the final award.

## Year 5 / Level 6

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Neurobiology and Disease	6LMS0029	30	50	50	0	AB
Translation of Science into Medicine	6LMS0030	15	50	50	0	A
Applied and Integrated Pharmacological Science	6LMS0027	15	0	100	0	B

## Year 6 Level 6

	Module Code	Credit Points	% Examination	% Coursework	% Practical	Semesters
<b>Compulsory Modules</b>						
Module Title						
Therapeutic Pharmacology	6LMS0152	30	50	50	0	A
Bioscience Research Project	6LMS0008	30	0	100	0	AB

Table 1b Final and interim awards available

The programme provides the following final and interim awards:

Final Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
BSc (Hons)	Pharmacology	360 credit points including 240 at level 6/5 of which 120 must be at level 6	6	All programme learning outcomes except D9 and D10 for all graduates. D9 also achieved for those who successfully complete 5LMS0003 Bioscience Work Experience (see Table 2)
BSc (Hons)	Pharmacology (Sandwich)	360 credit points including 240 at level 6/5 of which 120 must be at level 6 including completed and passed Sandwich Year	6	All programme learning outcomes except D10 (see Table 2)
BSc (Hons)	Pharmacology with a Year Abroad	360 credit points including 240 at level 6/5 of which 120 must be at level 6 including completed and passed Year Abroad	6	All programme learning outcomes except D9 for all graduates. D9 also achieved for those who successfully complete 5LMS0003 Bioscience Work Experience (see Table 2)

Interim Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
University Certificate		45 credit points at level 4	4	See UPR AS11, section 13: <a href="http://sitem.herts.ac.uk/secreg/upr/AS11.htm">http://sitem.herts.ac.uk/secreg/upr/AS11.htm</a>
Certificate of Higher Education		120 credit points at level 4	4, 5	See UPR AS11, section 13: <a href="http://sitem.herts.ac.uk/secreg/upr/AS11.htm">http://sitem.herts.ac.uk/secreg/upr/AS11.htm</a>
Diploma of Higher Education		240 credit points including at least 120 at level 5	5, 6	See UPR AS11, section 13: <a href="http://sitem.herts.ac.uk/secreg/upr/AS11.htm">http://sitem.herts.ac.uk/secreg/upr/AS11.htm</a>
BSc	Pharmacology	300 credit points including 180 at level 6/5 of which 60 must be at level 6	6	A1, A2, A3, A4, A5, A6, A7, B1, B2, B4, B5, B6, C1, C2, D1, D2, D3, D4, D5, D6, D7
BSc	Pharmacology (Sandwich)	300 credit points including 180 at level 6/5 of which 60 must be at level 6 and completed and passed Sandwich Year	6	A1, A2, A3, A4, A5, A6, A7, B1, B2, B4, B5, B6, C1, C2, D1, D2, D3, D4, D5, D6, D7, D9
BSc	Pharmacology with a Year Abroad	300 credit points including 180 at level 6/5 of which 60 must be at level 6 and completed and passed Year Abroad	6	A1, A2, A3, A4, A5, A6, A7, B1, B2, B4, B5, B6, C1, C2, D1, D2, D3, D4, D5, D6, D7, D10 D9 also achieved for those who successfully complete 5LMS0003 Bioscience Work Experience

## Programme-specific assessment regulations

The programme complies with the University's academic regulations (in particular, [UPR AS11](#), [UPR AS12](#) and [UPR AS14](#)) with the exception of those listed below, which have been approved by the University:

Course Code	Course Instance	Award Title	Modules (child instance codes & title)	Must be included in classification algorithm?
HHBIOPHA	PHA3F/4S	BSc (Hons) Pharmacology	6LMS0008 Bioscience Research Project	Yes
HHBIOPHA	PHA4S	BSc (Hons) Pharmacology (Sandwich)	6LMS0008 Bioscience Research Project	Yes
HHBIOPHA	PHA4S	BSc (Hons) Pharmacology with a Year Abroad	6LMS0008 Bioscience Research Project	Yes

Further programme-specific regulations (requiring School-level approval) are given below:

- The grade achieved in the optional 5LMS0003 Bioscience Work Experience module will not contribute to the classification of the final award.
- Progression to Level 5 requires a minimum of 105 credits and a pass in the module Practical and Transferable Skills.

- Progression to Level 6 requires a minimum of 105 credits at Level 5. The module 5LMS0003 Bioscience Work Experience may not be included in the credits required for progression.
- A pass grade in the final year project is required for a final award.
- A pass grade for the Sandwich Placement Year is mandatory for the receipt of BSc (Hons) Pharmacology (Sandwich) award.
- A pass grade for the Year Abroad is mandatory for the award of BSc (Hons) Pharmacology with a Year Abroad.
- All modules which include practical sessions have an attendance requirement of at least 50% of the practical sessions in order to meet the learning outcomes of the module. Failure to attend the required proportion of sessions will normally result in the award of an FREN (Fail, re-enrol) grade.
- All Level 6 modules of the programme have an attendance requirement of at least 75% of the classes specified in the module. Failure to attend the required proportion of classes and failure of the module assessment at the first attempt will normally result in the award of an FREN (Fail, re-enrol) grade by the Module Board of Examiners.
- The maximum period within which a student may gain an award on the programme is normally 5 years from their date of registration as a full-time student or 7 years from their date of registration as a part-time student.
- Students on the part-time mode may take a placement or year abroad but either of these needs to be completed in 1 year.

## **E. Management of Programme & Support for student learning.**

### **Management**

The programme is managed and administered through:

- A Programme Leader and Deputy Programme Leaders who are responsible for the day-to-day management
- Associate Deans of School (AQA and Education) who have delegated responsibility for programmes in the Department of Clinical, Pharmaceutical & Biological Science
- Academic Lead: Student Experience who has specific responsibility to ensure the programme supports students from a diverse range of backgrounds and abilities
- Academic Lead: Learning and Teaching who oversees continued professional development of academic staff, assessment strategies and pedagogical matters related to the development and delivery of the Programme
- Year Leads who are responsible for overseeing academic and pastoral support for each year in the Programme
- An Admissions Tutor, with specific responsibility for open days and selection
- A Placements Tutor to assist with the procurement of placements
- A designated programme administration team to deal with day-to-day administration associated with the Programme
- Module Leaders who are responsible for individual modules
- The programme committee, the membership of which includes student representatives, academic and professional staff.

### **Support**

Students are supported by:

- An induction week at the beginning of each new academic session
- Personal Tutors to provide academic and pastoral support
- The Programme Leader and Deputy Programme Leader to help students understand the course/programme structure and provide advice and support.
- Module Leaders to help students understand the aims, outcomes and organisation of the modules
- Placement Tutor who oversees the management of placements and individual placement tutors, members of academic staff who support and visit students on placement
- Academic supervisors in partner institutions for students who take a year abroad
- A substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters, accommodation, international student support, etc
- Office of Dean of Students, incorporating Chaplaincy, Counselling and nursery

- A student counselling service, within the Student Wellbeing Centre.
- A versatile on-line inter-active intranet and learning environment
- Guided student-centred learning on Canvas module sites
- Access to extensive digital and print collections of information resources
- Attractive modern study environments in 2 Learning Resources Centres
- Student Success Hubs, which include a Mathematics Drop-in Centre
- A Medical Centre
- University Disability Advisers
- An Equality Office
- Careers and Employment Service
- The Students' Union
- Dedicated programme site
- Student representatives on the programme committee, who are supported by UHSU and the School Student Community Organiser
- Overseas Orientation
- English language support for overseas students
- The School of Life and Medical Sciences Academic Support Unit (ASU), helping students with academic challenges and supporting them to fulfil their potential

---

## F. Other sources of information

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:

- A Programme (or Student) Handbook;
- A Definitive Module Document (DMD) for each constituent module;
- A Module Guide for each constituent module;
- Information on the School Confidentiality policy:  
<http://sitem.herts.ac.uk/secreg/documents/General/2016-02-01-LMS-Confidentiality%20Policy.pdf>
- Royal Society of Biology: <https://www.rsb.org.uk/education/accreditation>

The [Ask Herts](#) website provides information on a wide range of resources and services available at the University of Hertfordshire including academic support, accommodation, fees, funding, visas, wellbeing services and student societies.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called 'University Policies and Regulations' (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: <http://www.herts.ac.uk/secreg/upr/>. In particular, [UPR SA07](#) 'Regulations and Advice for Students' Particular Attention - Index' provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

In accordance with section 4(5) of the Higher Education and Research Act 2017 (HERA), the UK Office for Students (OfS) has registered the University of Hertfordshire in the register of English higher education providers. The Register can be viewed at: <https://www.officeforstudents.org.uk/advice-and-guidance/the-register/the-ofs-register/>.

---

## G. Entry requirements

The normal entry requirements for the programme are:

112 UCAS points to include 2 science GCE A Levels (or equivalent) one of which must be a grade C in Biology or Chemistry (acceptable science A Levels are Human Biology, Psychology, Geography, Maths and Physics) or BTEC Extended Diploma in Applied Science with a minimum DMM profile. A pass in the practical element of the science A Level is required. For IB 112 points from a minimum of 2 HL subjects at H4 or

above to include Biology or Chemistry and one other Science (with the remaining points to come from a combination of HL, SL and Core).

Plus GCSE English language, Mathematics and double science (or 2 single sciences) at grade 4 or above (grade C under the old grading structure) (or equivalent).

Successful completion of Access to Science (or approved equivalent) with Merit profile in 45 credits at Level 3.

All International students are required to demonstrate an English Language capability of IELTS 6.0 (with no less than 5.5 in any band) or GCSE English language grade A-C.

All entrants must be a minimum of 18 years of age at the start of the course.

Students who undertake a placement year or enrol on the 5LMS0003 Bioscience Work Experience module may be required to complete a satisfactory Disclosure and Barring Service check prior to taking up the placement, workplace or volunteering opportunity as a requirement of the place of work.

For current entry tariff point requirements, please refer to the relevant page for the Course on the University website or on the online prospectus.

The programme is subject to the University's Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in [UPR SA03](#)), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you wish to receive a copy of the latest External Examiner's Report for the programme, please email a request to [aqo@herts.ac.uk](mailto:aqo@herts.ac.uk)

## BSc (Hons) Bioscience (Pharmacology)

**Table 2: Development of Intended Programme Learning Outcomes in the Constituent Modules**

This map identifies where the programme learning outcomes are assessed in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the programme aims (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own learning, personal and professional development as the programme progresses.

		Programme Learning Outcomes (as identified in section 1 and the following page)																										
		Knowledge & Understanding								Intellectual Skills				Practical Skills				Transferable Skills										
		Module Title	Module Code	A1	A2	A3	A4	A5	A6	A7	B1	B2	B3	B4	B5	B6	C1	C2	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10
Level 4		Cell and Microbiology	4LMS0155	X	X			X			X					X			X	X	X	X		X	X			
		Chemistry for the Biological Sciences	4LMS0004	X	X						X					X		X	X	X	X	X		X	X			
		Human Physiology with Pharmacology	4LMS0002	X	X	X	X	X	X	X	X					X		X	X	X	X	X	X	X	X			
		Practical and Transferable Skills	4LMS0006	X	X						X	X			X	X	X	X	X	X	X	X		X	X	X		
		Core Biochemistry	4LMS0154	X	X			X			X					X			X	X	X	X		X	X			
		Molecular Biology and Genetics	4LMS0007	X	X						X					X		X	X	X	X	X		X	X			
		Molecular Structure and Reactivity	4LMS0040	X	X						X					X		X	X	X	X	X		X	X			
Level 5		Pharmacology	5LMS0025	X	X	X	X	X	X	X	X			X	X	X	X	X	X	X	X	X		X	X			
		Genes and Genomes	5LMS0091	X	X			X	X		X				X	X	X	X	X	X	X	X		X	X			
		Cell and Molecular Biology	5LMS0092	X	X			X	X		X				X	X	X	X	X	X	X	X		X	X			
		Principles of Immunology	5LMS0009	X	X			X	X		X				X	X	X		X	X	X	X		X	X			
		Biochemistry for Pharmacology	5LMS0103	X	X			X	X		X				X	X	X		X	X	X	X		X	X			
		Biology of Disease	5LMS0022	X	X	X		X	X		X	X			X	X	X		X	X	X	X	X	X	X			
		Bioscience Research Methods	5LMS0001	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X	X		
		Bioscience Work Experience	5LMS0003												X				X	X		X		X	X	X	X	
	Placement Year	6LMS0023	X	X							X			X	X	X	X	X	X	X	X	X	X	X	X	X		
	Year abroad	6LMS0022	X	X							X			X	X	X	X	X	X	X	X		X	X	X		X	
Level 6		Therapeutic Pharmacology	6LMS0152	X	X	X	X	X	X	X	X			X	X	X		X	X	X	X	X		X	X			
		Neurobiology and Disease	6LMS0029	X	X	X		X	X	X	X			X	X	X			X	X	X	X		X	X			
		Translation of Science into Medicine	6LMS0030	X	X	X	X	X	X	X	X			X	X	X		X	X	X	X	X		X	X			
		Applied and Integrated Pharmacological Science	6LMS0027	X	X	X	X	X	X	X	X	X		X	X	X	X	X	X	X	X	X		X	X	X		
		Bioscience Research Project	6LMS0008	X	X						X	X	X	X	X	X	X	X	X	X	X	X		X	X	X		

## KEY TO PROGRAMME LEARNING OUTCOMES

### Knowledge and Understanding

- A1. acquire the specific knowledge and skills appropriate to Pharmacology.
- A2. appreciate the principles of biochemistry, chemistry, genetics, evolution, molecular and cellular biology, mathematics, statistics and physiology upon which an understanding of the discipline pharmacology is based.
- A3. describe the sources of drugs, the drug discovery and development process, their uses in treatment of disease and their social impact.
- A4. explain the processes of drug absorption, distribution, metabolism (biotransformation) and excretion.
- A5. describe the targets for drug action in terms of cells, receptors, enzymes and genes.
- A6. quantify and explain the mechanisms of drug action on receptors, enzymes and genes.
- A7. appreciate how theoretical concepts of pharmacology are used in the development of new medicines.

### Intellectual Skills

- B1. analyse and solve problems related to Pharmacology.
- B2. understand the ethical implications of their work.
- B3. be able to execute and report a research project in order to develop skills necessary for independent research (BSc Hons).
- B4. apply theoretical concepts to the study of pharmacology and evaluate the relationships between theory and practice.
- B5. display an awareness of the existence and nature of value judgements.
- B6. demonstrate a critical approach in enquiry and a readiness to test hypotheses, interpret scientific data and, at Level 6, evaluate published literature.

### Practical Skills

- C1. acquire appropriate laboratory skills, including safe working practices.
- C2. acquire appropriate computer skills.

### Transferable Skills

- D1. communicate effectively using a variety of formats
- D2. use effectively a range of information sources.
- D3. organise and present intellectual argument commensurate with the level of award.
- D4. work effectively independently (e.g. on assignments or during the project).
- D5. work effectively as part of a team (e.g. in group work, during group discussions and workshops).
- D6. be numerate.
- D7. develop the skills required for continued self-managed professional development, reflective practice and life-long learning.
- D8. to appreciate the importance of graduate attributes through reflective practice.
- D9. develop skills relevant to a work-place environment.
- D10. develop the skills necessary to gain a knowledge and understanding of Bioscience topics in a different cultural environment.

## Section 2

### Programme management

Relevant QAA subject benchmarking statements	QAA Biosciences (2015)
Type of programme	Undergraduate
Date of validation/last periodic review	November 17
Date of production/ last revision of PS	July 2020
Relevant to level/cohort	Level 4 entering September 2023
Administrative School	School of Life and Medical Sciences
Language of Delivery	English

**Table 4 Course structure**
