

Title of Programme: MSc Nursing (Pre-Registration)

Programme Code: HHMNUR

Programme Specification

This programme specification is relevant to students entering:
09 September 2024

Associate Dean of School (Academic Quality Assurance):
Cheryl Holman

Signature:

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

Summary of amendments to the programme

Date	Section	Amendment

If you have any queries regarding the changes please email AQO@herts.ac.uk

Programme Specification MSc in Nursing

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

Section 1

Awarding Institution/Body	University of Hertfordshire
Teaching Institution	University of Hertfordshire
University/partner campuses	College Lane/De Havilland
Programme accredited by	Nursing and Midwifery Council
Final Award (Qualification)	MSc
All Final Award titles	MSc Nursing
(Qualification and Subject)	
FHEQ level of award	7

A. Programme Rationale

This post-graduate programme is for graduates who already possess a first degree and who wish to become Registered Nurses (RN) in one of the following fields of nursing; adult, mental health or learning disability. The programme meets the Nursing and Midwifery (NMC) requirements for registration in the United Kingdom (UK). Extensive partnership work has ensured that the programme has been co-produced with key stakeholders including service users, carers, students, academics and practice partners.

The MSc Nursing programme comprises of 50% theoretical delivery at the University (lectures, seminars, practicals, simulation, etc.), and 50% clinical practice experience. The programme is designed to expose students to care delivery in their chosen nursing field in different care settings where students will gain their clinical practice experience, including the NHS and the Private, Voluntary and Independent sectors.

On successful completion of the programme, you will be allowed to register as a nurse in the UK in the nursing field which you have studied. Caring in a dynamic health and social care system will require our graduates to be accountable and able to act autonomously whilst working effectively in an interdisciplinary team.

B. Educational Aims of the Programme

Diversity and Inclusion

Our programmes are purposefully designed to enable all students to engage meaningfully with the curriculum by being accessible and representative. We will support students to shape their learning experience, removing barriers and enabling them to succeed. The curriculum explicitly includes multiple and representative perspectives, valuing collective identities and individual diversity. Learning, teaching and assessment activities help students to understand how they can enhance outcomes both for themselves and for others. All students belong to a learning community, and during their studies we really want to hear their voices, encourage them to listen to others, and express themselves.

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in [UPR TL03](#).

Additionally this programme aims to:

- Provide a learning environment that enables the student to become a proficient, confident, safe and accountable nurse equipped with the necessary knowledge, skills, capabilities and value-bases to achieve fitness for practice, purpose, academic award and professional standing.

- Further develop students' analytical skills and critical abilities in relation to theory and nursing practice, research and enquiry that will enhance nursing care and leadership in any health and social care setting
- Facilitate and nurture the personal and professional development through the creation of safe stimulating learning environments, valuing collaboration and appreciating the distinctiveness of adult, learning disability and mental health nursing.
- Enable students to contribute to and manage their own learning by effectively engaging with the evidence and research literature, reflecting on practice and continuing life-long learning

Graduate Attributes

Our graduates will be capable and professional, creative and enterprising, and will build their social and global awareness throughout. In addition to their subject expertise and proficiency, as a University of Hertfordshire graduate, they will be:

- Professionally focused
- Globally minded
- Sustainability driven
- Digitally capable and confident
- Inclusive and collaborative
- Evidence based and ethical

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2021) have been used as a guiding framework for curriculum design.

The programme outcomes are referenced to the Standards for Pre-Registration Nursing (NMC, 2018) and the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2021) have been used as a guiding framework for curriculum design.

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas:

Knowledge and Understanding:	Teaching/learning methods & strategies	Assessment
A1- The complex and dynamic legal, ethical, cultural and political issues underpinning health needs and contemporary nursing practice	Acquisition of knowledge and understanding is through To aid this, modules focus on developing all four aspects of Healy and Jenkins (2009) research informed teaching	Knowledge and understanding are assessed through A1 -The complex and dynamic legal, ethical, cultural and political issues underpinning health needs and contemporary nursing practice
A2- The professional requirements for nursing practice	Service user and carer involvement is integral to curriculum delivery as is inter-professional education.	A2 - The professional requirements for nursing practice.
A3- The theories, frameworks and disciplines with a critical appreciation of quantitative and qualitative research evidence and application	A combination of the following supports this Supervised practice experiences; simulated practice sessions; reflection; portfolio development; seminar and care plan presentations; individual and small group academic tutorials;	A3 - The theories, frameworks and disciplines with a critical appreciation of quantitative and qualitative research evidence and

to contemporary nursing practice	discussion groups, problem-based and inquiry-based type learning approaches; interactive lectures; coursework; laboratory based practical work/experiments; workshops, learning packages; e-technology approaches to learning and teaching including, podcasts, video, and digital storyboards.	application to contemporary nursing practice
A4- Inter-professional education and the range of strategies that may be selected to enhance collaborative working.	Throughout, the learner is encouraged to undertake independent study both to supplement and consolidate what is being taught/learnt and to broaden their individual knowledge and understanding of the subject.	A4 - Inter-professional education and the range of strategies that may be selected to enhance collaborative working.
Intellectual skills:	Teaching/learning methods & strategies	Assessment
<p>B1- Critically analyse research findings and synthesise diverse sources of evidence to develop strategies that show initiative and promote optimum health and delivery of nursing care.</p> <p>B2- Analyse and solve complex problems by selecting and applying the most appropriate forms of evidence and by using systematic and effective methods of reasoning</p> <p>B3- Critically analyse nursing care needs and be able to formulate a range of collaborative solutions which enable safe, effective, person and family-centred care.</p> <p>B4- Systematically evaluate service provision and risk management strategies to ensure a safe and therapeutic environment.</p> <p>B5- Critically appraise the evidence and think creatively about clinical practice to propose research informed strategies that address problems and questions which exist in practice.</p>	<p>Intellectual skills are developed through the programme by the methods and strategies outlined in section A, above. Analysis, problem solving, and reflection skills are further developed by activities that encourage engagement with current research and evidence,</p> <p>Students will critically discuss research with staff and peers. They will undertake active learning, through role-play, tutorials, simulation and practice placement experiences.</p> <p>Throughout, the learner is encouraged to develop intellectual skills further by independent study</p>	<p>Intellectual skills are assessed through a combination of examinations in the form of multiple-choice questions and scenario based short answer questions, assessed in-course assessments in the form of, essay assignments, practice assessments, project work, reflective accounts and presentations.</p> <p>The final Imagination and Innovation module allows students to engage intellectually with innovation service delivery and change management.</p>

Practical skills:	Teaching/learning methods & strategies	Assessment
<p>C1- Confidently use information technology to assist in the organisation and management of nursing care in a variety of different contexts.</p> <p>C2- Effectively utilise comprehensive and systematic approaches to assess, plan, implement and evaluate nursing care in partnership with patients/service-users and/or their carers.</p> <p>C3- Adapt to the changing health needs of individuals and groups to make decisions which are ethically sound and based on best available evidence.</p> <p>C4- Adopt and promote anti-discriminatory and anti-oppressive practice whilst promoting the dignity and rights of patients/service users and balancing any competing needs</p> <p>C5- Promote and lead in partnership-working through skilful team, inter-professional and multi-agency collaboration.</p> <p>C6 - Demonstrate effective leadership, support and direction to team members in delivering efficient quality care.</p>	<p>Practical skills are developed through the programme by a combination of experience in the practice setting, simulated practice sessions, skills practice, reflection sessions, seminar and scenario-based presentations, individual and small group tutorials, discussion groups, lectures, coursework and laboratory based practical work/ experiments, workshops, learning packages and computer assisted learning.</p> <p>Skills' learning is also facilitated by maintaining a Portfolio, which is a record of personal and professional learning and development. Throughout the student is expected to consolidate their development of practical computing skills by use of computers in the learning resources centre.</p>	<p>Practical skills are assessed through practice placements by means of achievement of modular learning outcomes for practice, contained in the Practice Assessment Document (PAD) This approach is complemented by the production of other practice related assessments</p>
Transferable skills:	Teaching/learning methods & strategies	Assessment
<p>D1- Systematically apply and adapt a range of literacy, numeracy and information technology skills according to context</p> <p>D2- Demonstrate and promote appropriate professional discipline, organisation, presentation and standards of conduct.</p> <p>D3- Be able to self-manage and take initiative for planning to meet own needs/responsibilities and facilitating those of others.</p>	<p>Transferable skills are developed through the programme by interactive teaching sessions, practical computer assisted learning, debate, academic writing, practice experience and observation, oral and poster presentations and group/individual projects. These are complemented by the development of specialist intra-professional transferable skills by the methods outlined in achieving 'practical' skills.</p>	<p>Transferable skills are assessed through a range of assignments built into the curriculum assessment strategy, in coursework, examinations, on-line \and computer-based activities, oral presentations, reflective accounts and reports and practice documents. Communication with service users, carers and other personnel is assessed within practice and forms an aspect of the assessment within the</p>

D4- Demonstrate effective engagement communication and collaboration skills with service users, carers and a wide range of personnel from a variety of organizational levels.	<p>Transferrable skills development is also facilitated by maintaining a portfolio, which is a record of personal and professional learning and development.</p> <p>Throughout, the learner is encouraged to develop transferable skills by maintaining a record of evidence and completing a personal development plan.</p>	Inter-Professional Education module.
---	--	--------------------------------------

D. Programme Structures, Features, Levels, Modules, and Credits

The programme is offered in full time over 2 years and leads to the award of MSc in Nursing. Entry is normally at level 7 with an appropriate first degree. Intake is normally in September.

Professional and Statutory Regulatory Bodies

All aspects of the programme are governed by the Nursing Midwifery Council professional regulations. The requirements for the adult field of practice are bound by EU directive 2005/36/EC (including Annex V.2). Within the programme there is equal weighting between the delivery and assessment of theory and practice.

Work-Based Learning, including Sandwich Programmes

To meet the Nursing Midwifery Council regulations 4,600 programme hours are required for the full-time programme of which 2,300 are to be evidenced by practice experiences. Practice learning experiences are undertaken with a range of environments and students are supported by appropriately approved mentors. Practice hours can also be accrued via simulated practice learning (SPL) as per the Nursing and Midwifery Council's guidance on SPL.

Programme Structure

The programme structure and progression information below (Table 1a and 1b) are provided for the award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

Table 1a Outline Programme Structure

Mode of study Full Time

Entry point Normally Semester A with September intake

APL/APCL&APEL for second registration.

Shortened route for second registration determined by APL/APEL/APCL processes

NOTE

*This Pass/Fail element of assessment must be successfully completed to pass the module, however it will not contribute to the overall numeric grade awarded.

** This module is pass/fail with no numeric grade awarded.

The award of a Masters in Nursing with eligibility to register with the NMC in one of the relevant fields of nursing requires 240 credits with 150 credits at level 7 and 90 credits at level 6. In order for students to meet NMC practice and theory requirements for professional registration, exemptions were given against UPR AS11 4.3 and AS11.5 indicating the number of credits normally required for a Master's award.

Table 1b Final and interim awards available

The programme provides the following final and interim awards:

Final Award	Award Title	Minimum requirements	Available at end of (normally):	Programme Learning Outcomes developed (see above)
Masters	MSc (Nursing)	180 credit points including at least 150 at level 7	3 Semesters	All programme learning outcomes (see Table 2)
Postgraduate Diploma	Post-Graduate Diploma in Health Studies	120 credit points, including at least 90 at level 7	2, 3 Semesters	List all relevant learning outcomes, e.g. A1, A3, A4, A5, B1, B2, B6, C1, C2, C3, C5, D1-D6

Interim Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
Postgraduate Certificate	Post-Graduate Certificate in Health Studies	60 credit points, including at least 45 at level 7	1-2 Semesters	<p><i>For named awards, list all relevant learning outcomes, e.g. A1, A3, A4, B1, B2, B6, C1, C5, D1, D2, D3, D6 OR</i></p> <p><i>For untitled awards: See UPR AS11, section 13:</i> http://sitem.herts.ac.uk/secreg/upr/AS11.htm</p>

Masters and Diploma awards can be made "with Distinction" or "with Commendation" where criteria as described in [UPR AS14](#), Section D and the students' handbook are met.

Programme-specific assessment regulations

The programme is compliant with the University's academic regulations (in particular, [UPR AS11](#), [UPR AS12/UPR AS13](#) and [UPR AS14](#)) with the exception of those listed below, which have been specifically approved by the University:

- Final compensatory credit (exemption from UPR AS14 section D4.4) and or intramodular compensation is not permissible within the programme
- Students awarded an FREN grade for 75 credits or more at a progression point will normally result in the student being withdrawn from their programme of study (exemption from UPR AS14 section D3).
- All assessment outcomes must be successfully completed, and results confirmed at an examination board by the progression point (i.e. end of each academic year) (Exemption from UPR AS14, section D3).
- Students can not undertake further study at higher levels on the same programme of study if they have more than 30 credits of failure outstanding from previous levels (Exemption from UPR AS14 D3.6).

Further points of clarification and interpretation relevant to this specific programme are given below:

- Students are required to attend all programme components in theory and practice.
- Students will be expected to attend all practice components of the programme without exemption. Failure to follow the attendance guidance, as per programme policy, will normally lead to withdrawal from the programme. Failure to fulfil the requirements for practice as per programme policy (including undertaking barring and enhanced disclosure checks, attending occupational health screening when referred and (where applicable) completing a statutory declaration will normally lead to the student being withdrawn from the programme.
- Failure to achieve a pass grade in relation to those attributes associated with professionalism within the practice document (as stated in the Professional Values Statement) in each year/part of the programme within EITHER the final summative practice experience of that part of the programme OR the subsequent retrieval practice experience will normally result in a student being withdrawn from their programme of study.
- Students must pass, with 100%, a numeracy assessment in their final year before the student may be recommended for entry to the professional nursing register.
- On completion of the programme, each student must submit a self-declaration of good health and character, as required by the NMC and which must be confirmed by a designated senior programme officer before the student may be recommended entry to the professional nursing register.
- We will use every reasonable effort to provide your educational and other related services in the manner and to the standards set out in our prospectuses, on our website, and in our other published materials. At times there may be circumstances outside our reasonable control which have a detrimental effect on how we provide our services to you. If circumstances such as these arise, we cannot make an absolute commitment that your studies will not be disrupted, but we will use every reasonable effort to minimise any disruption to you.
- Due to the nature of certain programmes of study, we advise applicants who will be under 18 years of age on or after the date of registration that this may mean there are financial implications and/or an impact on the structure, timing and trajectory of their studies, since the legislative requirements for safeguarding

students under the age of 18 may present challenges in securing an appropriate range and scope of practice placements. If you have any concerns, we would be pleased to discuss the issues outlined above with any potential applicants.

E. Management of Programme & Support for student learning

Management

The programme is managed and administered through:

- Dean of School
- Associate Dean of School (AQA)
- Departmental Heads
- A Programme Lead, responsible for the strategic management and organisation of the Programme
- Student representatives on programme committees
- Module Leaders who are responsible for the administration and delivery of individual modules
- A Senior Admissions Tutor, with specific responsibility for coordinating recruitment, open days and selection processes
- An APEL/APCL coordinator who is responsible for advising prospective candidates regarding the production and submission of an APEL/CL claim
- Programme admissions tutor
- A Senior Administrator for Practice Placements to plan and administer the student placement allocations
- A designated administrative team to deal with day-to-day administration associated with the modules within the programme.

Support

Students are supported by:

- An induction week at the beginning of each new academic session.
- Overseas Orientation
- You will have a Personal Tutor who will be an important point of contact, able to help you gain a good understanding of the School and programme you are studying.
- A substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters, accommodation, international student support, etc.
- Office of Dean of Students, Student Wellbeing (incorporating Counselling, Mental Health and Disability Support), Chaplaincy, and Day Nursery.
- Associate Dean of School (AQA)
- Departmental Heads
- A Programme Lead, responsible for the strategic management and organization of the Programme
- Student representatives on programme committees
- Module Leaders who are responsible for the administration and delivery of individual modules
- A Senior Admissions Tutor, with specific responsibility for coordinating recruitment, open days and selection processes
- An APEL/APCL coordinator who is responsible for advising prospective candidates regarding the production and submission of an APEL/CL claim
- Programme admissions tutor
- A Senior Administrator for Practice Placements to plan and administer the student placement allocations
- A team of programme administrators
- A versatile on-line interactive intranet and learning environment
- Guided student-centred learning through the use of Canvas
- Access to extensive digital and print collections of information resources
- Attractive modern study environments in 2 Learning Resources Centres
- An English language drop in centre
- A Mathematics drop in centre
- A Student Forum with representatives on programme committee
- Medical Centre
- University Disability Advisors

- Careers and Employment
- Hertfordshire Student's Union
- Dedicated programme site

Practice support

In addition to the support mechanisms available to the students at the university, they will be supported in practice by practice assessors, practice supervisors and other individuals such as Practice Experience Facilitators

F. Other sources of information

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:

- A dedicated programme site
- A Definitive Module Document (DMD) for each constituent module;

The [Ask Herts](#) website provides information on a wide range of resources and services available at the University of Hertfordshire including academic support, accommodation, fees, funding, visas, wellbeing services and student societies.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called 'University Policies and Regulations' (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: <http://www.herts.ac.uk/secreg/upr/>. In particular, [UPR SA07](#) 'Regulations and Advice for Students' Particular Attention - Index' provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

In accordance with section 4(5) of the Higher Education and Research Act 2017 (HERA), the UK Office for Students (OfS) has registered the University of Hertfordshire in the register of English higher education providers. The Register can be viewed at: <https://www.officeforstudents.org.uk/advice-and-guidance/the-register/the-ofs-register/>.

G. Entry requirements

The normal entry requirements for the programme are:

A minimum of a 2:1 honours degree in any subject. Consideration will be given to applicants with a 2:2 if their degree is related to nursing and they have previous care work experience.

GCSE mathematics and English at grade C/4 or above (or equivalent).

Evidence of completion of 12 years general school education before commencing the programme.

Plus

Where the International English Language Testing System (IELTS) is offered, the programme will normally require an overall score of 6.5, with a minimum score of 6.5 for every component (listening, reading, writing and speaking). Where the Occupational English Test (OET) is offered it must be at least a B grade in listening and reading, and at least a B grade in writing and speaking. In addition, English language qualifications that are recognised by the University as equivalent to the IELTS and OET bands specified above will also be accepted.

All offers will be subject to the applicants' demonstration of the NHS constitution's 'Values and Behaviours', satisfactory interviews, numeracy and literacy test, health screening and the Disclosure and Barring Services (DBS) checks. You can view the full NHS Constitution for England on the Government website: <https://www.gov.uk/government/publications/the-nhs-constitution-for-england>

The programme is subject to the University's Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in [UPR SA03](#)), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you would like this information in an alternative format please contact:

icaq@herts.ac.uk

If you wish to receive a copy of the latest External Examiner's Report for the programme, please email a request to aqo@herts.ac.uk

MSc in Nursing

Table 2: Development of Intended Programme Learning Outcomes in the Constituent Modules

This map identifies where the programme learning outcomes are assessed in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the programme aims (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own learning, personal and professional development as the programme progresses.

Planning Care in Learning Disability Nursing Practice 3	7HSK0287	X	X	X	X	X	X					X	X	X	X		X	X	X	X	

Knowledge and Understanding

- A1. The complex and dynamic legal, ethical, cultural and political issues underpinning health needs and contemporary nursing practice
- A2. The professional requirements for nursing practice.
- A3. The theories, frameworks and disciplines with a critical appreciation of quantitative and qualitative research evidence and application to contemporary nursing practice
- A4. Inter-professional education and the range of strategies that may be selected to enhance collaborative working.

Intellectual Skills

- B1. Critically analyse research findings and synthesise diverse sources of evidence to develop strategies that show initiative and promote optimum health and delivery of nursing care.
- B2. Analyse and solve complex problems by selecting and applying the most appropriate forms of evidence and by using systematic and effective methods of reasoning.
- B3. Critically analyse nursing care needs and be able to formulate a range of collaborative solutions
- B4. Systematically evaluate service provision and risk management strategies to ensure a safe and therapeutic environment.
- B5. Critically appraise the evidence and think creatively about clinical practice to propose research informed strategies that address problems and questions which exist in practice.

Practical Skills

- C1. Confidently use information technology to assist in the organisation and management of nursing care in a variety of different contexts
- C2. Effectively utilise comprehensive and systematic approaches to assess, plan, management of nursing care in a variety of different contexts implement and evaluate nursing care in partnership with patients/service-users and/or their carers which are ethically sound and based on best available evidence the dignity and rights of patients/service users and balancing any competing needs multi-agency collaboration efficient quality care
- C3. Adapt to the changing health needs of individuals and groups to make decisions which are ethically sound and based on best available evidence.
- C4. Adopt and promote anti-discriminatory and anti-oppressive practice whilst promoting the dignity and rights of patients/service users and balancing any competing needs.
- C5. Promote and lead in partnership-working through skillful team, inter-professional and multi-agency collaboration.
- C6. Demonstrate effective leadership, support and direction to members in delivering efficient quality care.

Transferable Skills

- D1. Systematically apply and adapt a range of literacy, numeracy and information technology skills according to context.
- D2. Demonstrate and promote appropriate professional discipline, organisation, presentation and standards of conduct.
- D3. Be able to self-manage and take initiative for planning to meet own needs/responsibilities and facilitating those of others.
- D4. Demonstrate effective engagement communication and collaboration skills with service users, carers and a wide range of personnel from a variety of organisational levels.

Table 3: Development of Graduate Attributes in the Constituent Modules

This map identifies where the Graduate Attributes are delivered in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the development of the Graduate Attributes (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own personal and professional development as the programme progresses. [Note that there is no requirement for the Graduate Attributes to be assessed through these modules]

D = Delivered

Module Title	Module Code	Professionally Focused	Globally Minded	Sustainability Driven	Digitally capable & confident	Inclusive and collaborative	Evidenced based and Ethical
