Title of Programme: Postgraduate Diploma Pharmacy - Overseas Pharmacists Assessment
Programme (OSPAP)

Programme Code: LMOSPAP

Programme Specification

This programme specification is relevant to students entering:
23 September 2024

Associate Dean of School (Academic Quality Assurance):
Sherael Webley

Signature

A programme specification is a collection of key information about a programme of study (or course). It identifies the aims and learning outcomes of the programme, lists the modules that make up each stage (or year) of the programme, and the teaching, learning and assessment methods used by teaching staff. It also describes the structure of the programme, its progression requirements and any programme-specific regulations. This information is therefore useful to potential students to help them choose the right programme of study, to current students on the programme, and to staff teaching and administering the programme.

Summary of amendments to the programme:

Section	Amendment

If you have any queries regarding the changes please email AQO@herts.ac.uk

Programme Specification Postgraduate Diploma Overseas Pharmacists Assessment Programme

This programme specification (PS) is designed for prospective students, enrolled students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content for each module can be found in Definitive Module Documents (DMDs) and Module Guides.

Section 1

Awarding Institution/Body	University of Hertfordshire
Teaching Institution	University of Hertfordshire
University/partner campuses	College Lane campus
Programme accredited by	Postgraduate Diploma Overseas Pharmacists Assessment Programme is accredited by the General Pharmaceutical Council
Final Qualification	PG Dip
Final Award titles	Postgraduate Diploma Pharmacy - Overseas Pharmacists
(Qualification and Subject)	Assessment Programme (OSPAP)
FHEQ level of award	7

A. Programme Rationale

The primary aim of the Postgraduate Diploma in Pharmacy (Overseas Pharmacists Assessment Programme OSPAP) programme is to enable overseas pharmacists to develop the skills, knowledge and competencies to undertake preregistration training in preparation for registration with the General Pharmaceutical Council (GPhC). The OSPAP programme has been specifically designed to meet the GPhC Standards for the Education and Training of non-EEA Pharmacists Wanting to Register in Great Britain and the Quality Assurance Agency (QAA) Benchmark Statements for Pharmacy Programmes, as well as taking account of the QAA Framework for Higher Education Qualifications. The OSPAP programme has research informed, integrated course delivery supported by expert teacher practitioners from local NHS trusts and community/primary care pharmacy providers. It provides excellent student support before, during and after the OSPAP and alumni testify how well the programme prepares them for foundation training.

Pharmacy is a profession that provides eligibility to obtain the status of a Qualified Person for the oversight of the manufacture of pharmaceutical products within the EU.

B. Educational Aims of the Programme

Diversity and Inclusion

Our programmes are purposefully designed to enable all students to engage meaningfully with the curriculum by being accessible and representative. We will support students to shape their learning experience, removing barriers and enabling them to succeed. The curriculum explicitly includes multiple and representative perspectives, valuing collective identities and individual diversity. Learning, teaching and assessment activities help students to understand how they can enhance outcomes both for themselves and for others. All students belong to a learning community, and during their studies we really want to hear their voices, encourage them to listen to others, and express themselves.

The programme has been devised in accordance with the University's graduate attributes of programmes of study as set out in [UPR TL03](#).

Additionally this programme aims to:

- Acquire and develop effective skills to innovate and advance the practice of pharmacy using an appropriate evidence base.

- Acquire and develop a systematic advanced knowledge and understanding of, and critical awareness of pharmaceutical concepts within health and social care.
- Demonstrate the ability to work as advanced practitioners to ensure the delivery of pharmacy services meet national and local policies that improve patient outcomes.
- Acquire and develop the advanced skills to plan and evaluate their practice which is responsive to the needs of their organization.
- Ensure students meet the expectations of a pharmacy graduate as defined by the General Pharmaceutical Council.(GPhC).

Graduate Attributes

Our graduates will be capable and professional, creative and enterprising, and will build their social and global awareness throughout. In addition to their subject expertise and proficiency, as a University of Hertfordshire graduate, they will be:

- Professionally focused
- Globally minded
- Sustainability driven
- Digitally capable and confident
- Inclusive and collaborative
- Evidence based and ethical

C. Intended Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes in the following areas. The programme outcomes are referenced to the QAA benchmark statements for pharmacy programmes and the Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014) and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education (2021) have been used as a guiding framework for curriculum design.

Knowledge and Understanding	Teaching and learning methods	Assessment strategy
A1- Demonstrate detailed knowledge and understanding of national and local health policies in relation to their impact on health gain and service delivery.	Acquisition of knowledge and understanding (A1-4) is through a combination of small group work, seminars and discussions with lecturers and expert practitioners in the fields of health services, pharmacy practice including: primary care, acute care and industrial practice, and research and fields which are related to professional practice of pharmacy throughout the programme.	Knowledge and understanding are assessed through a combination of written assignments, tests and presentations which offer a choice of titles to enable students to display advanced knowledge and understanding in relation to their own area of interest.
A2- Demonstrate a critical understanding of the roles of pharmacists as members of the multi-professional and multi-agency teams within public health and primary care.	Acquisition of A5 and 6 is through a combination of lectures, seminars, workshops, course work, academic reading and a project. Throughout participants are encouraged to undertake independent study.	Testing of knowledge and understanding is both formative and summative to enable the student to gain feedback on their performance. For example, the aseptics lab assesses A9 and the dispensing test assesses A10
A3- Critically evaluate and apply the Competency Framework associated with the professional practice of pharmacy.		
A4- Critically appraise evidence and science based approaches to professional practice of pharmacy, medicines	Acquisition of A7 and 8 is through a combination of lectures, small group work, seminars and	Students will be allocated an academic personal tutor. The learner will be required to undertake independent study

<p>optimisation and medicines management, including a critical appraisal of the validity of data and research findings and therapeutic knowledge.</p> <p>A5- Establish a deep understanding of how established techniques of research and enquiry are used to create, interpret, evaluate and apply new knowledge within practice.</p> <p>A6- Demonstrate the ability to critically understand concepts, and apply in practice, techniques of research and enquiry to their own and others advanced study and, where appropriate, to propose new hypotheses.</p> <p>A7- Establish a deep understanding of the implications of relevant current evidence including quality assurance mechanisms.</p> <p>A8- The variety of ways in which practitioners lead and innovate in their own practice domain.</p> <p>A9- Demonstrate a critical understanding of the concepts and principles relevant to pharmaceutical formulations and delivery.</p> <p>A10- Have a comprehensive and detailed knowledge of the basic regulatory framework of UK and EU medicines law and the application of this framework to particular aspects of pharmacy practice.</p>	<p>discussions with lecturers and experts in the field.</p> <p>Acquisition of A9 is through a series of laboratory practicals supported by lectures and seminars.</p> <p>Acquisition of A10 is through a combination of lectures, small group work, seminars and discussions with lecturers and experts in the field</p> <p>Throughout, the learner is encouraged to undertake independent study both to supplement and consolidate what is being taught/learnt and to broaden their individual knowledge and understanding of the subject.</p>	<p>both to supplement and consolidate what is being taught/ learnt and to broaden their individual advanced knowledge and understanding of the subject.</p>
Intellectual skills	Teaching and learning methods	Assessment strategy
<p>B1- Critically analyse the contribution of research and health data which underpins the professional practice of pharmacy.</p> <p>B2- Demonstrate the ability to use an evidence and science based approach</p>	<p>Intellectual skills are developed throughout the programme by a combination of small group work, seminars and discussions with lecturers and expert practitioners. Relevance of course content to practice will be an integral part of sessions.</p> <p>Development of the remaining</p>	<p>Intellectual skills development is assessed through a variety of approaches which indicatively include course work (assignments, presentation and portfolio of evidence).</p>

<p>to the professional practice of Pharmacy and the delivery of medicines management services.</p> <p>B3- Critically examine how current policy and legal frameworks inform the safe, rational and effective use of medicines.</p> <p>B4- Demonstrate scholarship, initiative and critical autonomy in tackling and resolving problems related to their own research.</p> <p>B5- Deal with complex issues systematically and creatively.</p> <p>B6- Select, analyse, critique and evaluate their own practice and offer insightful solutions to identified problems.</p> <p>B7- Effectively apply a range of theoretical concepts to develop strategies which advance current practice.</p>	<p>advanced skills within the programme is facilitated by classroom and CANVAS discussions where students from a range of disciplines such as nurses and medics with differing experiences of the client groups share practical knowledge, expertise, ideas and concerns. CANVAS discussion groups will be established to enable students to engage in debate and review of specific aspects of Pharmacy practice.</p> <p>Throughout, the learner is encouraged to further develop intellectual skills by independent study that relates to their own area of interest and expertise through studying alongside other students, through guided and independent reading and tutorial support for assignments and the application of the theory learnt and demonstrated on the course to practice situations.</p>	<p>Evidence of B6 will be assessed in all coursework. Some of this is through written assignment and some through assessment of presentation with regard to innovative practice.</p>
---	---	--

Practical skills	Teaching/learning methods & strategies	Assessment strategy
<p>C1- Demonstrate the ability to deal with complex pharmaceutical care issues in an autonomous manner and prioritise.</p> <p>C2- Communicate effectively with patients and health care professionals.</p> <p>C3- Apply the principles of the preparation, supply and testing of aseptically prepared sterile products.</p> <p>C4- Demonstrate the ability to analyse in depth the implications of ethical and legal theories that inform sound professional judgement.</p>	<p>Practical skills are developed through a series of workshops and case studies. Practical techniques will be directly demonstrated to the student by experienced staff. Participants are encouraged to develop practical and transferable skills through the range of skills based assessments and active use of the virtual learning environment (CANVAS). A combination of the above teaching methods and, problem based learning (PBL) group work, visits in practice, placements and assignments will be used for overseas students.</p>	<p>C1 & C2 are assessed through Observed Structured Clinical Examinations (OSCEs), essays and during in-class tests.</p> <p>Communication skills tested during OSCEs will include responding to symptoms and obtaining relevant information from other healthcare professionals.</p> <p>Application of principles for C3 is through an assessed laboratory practical where students are required to produce a pharmaceutical product. The production of this end product is tested for quality. Application of principles for C3 is also through formative and summative assessments to enable the student to gain feedback on their performance</p>

		Demonstration of C4 is through a Professional Competency Panel.
Transferable skills	Teaching and learning methods	Assessment strategy
D1- Communicate effectively both orally and in writing. D2- Work effectively within a team. D3- Present and support an extended argument utilising evidence based practice. D4- Manage time and resources. D5- Develop critical self-reflective skills as a professional practitioner.	Transferable skills are developed through coursework reports, presentations, class discussions and workshops. Throughout, the learner is encouraged to develop transferable skills by maintaining a record of evidence and completing a personal development plan.	Transferable skills are assessed through a range of assignments built into the curriculum. D4 is assessed formatively through the development of a personal development plan. D5 is summatively assessed in the placement portfolio.

D. Programme Structures, Features, Levels, Modules, and Credits

The programme is offered full-time over two semesters, and leads to the award of a Postgraduate Diploma Overseas Pharmacist Assessment Programme. The intake is normally semester A.

Professional and Statutory Regulatory Bodies

This programme is accredited by The General Pharmaceutical Council and enables students to fulfil part of the requirements to allow them to register as a practising pharmacist in the UK. Successful achievement of the Pg Diploma enables the student to undertake the foundation training year in preparation for registration.

Work-Based Learning, including Sandwich Programmes

Students undertake a one day hospital visit in Semester A and a 3 day placement in a primary care setting in Semester B.

Student Exchange programme

Incoming Exchange

Programme Structure

The programme structure and progression information below (Table 1a and 1b) is provided for the Honours award. Any interim awards are identified in Table 1b. The Programme Learning Outcomes detailed above are developed and assessed through the constituent modules. Table 2 identifies where each learning outcome is assessed.

Table 1a Outline Programme Structure

Mode of study Full Time

Entry point Semester A

Level 7

Compulsory Modules Module Title	Module Code	Credit Points	% Test	% Examination	% Coursework	% Practical	Semesters
Study Skills and Practice Orientation (OSPAP)	7LMS0230	0	0	0	P/F	0	AB
Pharmaceutical Sciences and Therapeutics 1 (OSPAP)	7LMS0231	30	50	0	25	25	A
Pharmaceutical Sciences and Therapeutics 2 (OSPAP)	7LMS0130	30	50	0	25	25 P/F	B
Medicines and Pharmacy Practice (OSPAP)	7LMS0131	30	50	0	30	20 P/F	AB
Preparation for Practice (OSPAP)	7LMS0132	30	50	0	50	P/F	AB

The award of a postgraduate diploma requires 120 credits passed.

Award classification

The University has approved structure and assessment regulations common to all programmes. Full details are provided in [UPR AS14](#), Section D.

Table 1b Final and interim awards available

The programme provides the following final and interim awards:

Final Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
Postgraduate Diploma	Postgraduate Diploma Pharmacy - Overseas Pharmacists Assessment Programme (OSPAP)	120 credit points at level 7 plus a pass in the study skills module	7	All programme learning outcomes (see Table 2)

Interim Award	Award Title	Minimum requirements	Available at end of Level	Programme Learning Outcomes developed (see above)
Postgraduate Certificate	Postgraduate Certificate in pharmacy	60 credit points at level 7 from any OSPAP compulsory module, including a pass in the Study Skills module. Note that the student would not be eligible to apply to undertake foundation training	7	<i>Relevant learning outcomes: A1, A2, A3, A4, A5, A6, A7, A8, B1, B2, B3, B4, B5, B6, B7, C1, C2, D1, D2, D3, D4, D5</i>

Programme-specific assessment regulations

The programme complies with the University's academic regulations (in particular, [UPR AS11](#), [UPR AS12/UPR AS13](#) and [UPR AS14](#)) with the exception of those listed below, which have been approved by the University:

The Programme-specific regulations include regulations necessary in order to satisfy the General Pharmaceutical Council (GPhC) that students graduating from the OSPAP are fit to enter foundation training. The GPhC provide guidance, 'Standards for the education and training of non-EEA pharmacists wanting to register in Great Britain.

As specified by the GPhC no compensation for failed modules is permitted

Attendance of at least 75% will be required at workshops/ lectures/ tutorials/seminars

A pass in the end of module test in all credit bearing modules of at least 50% is required and is not compensatable. Students who do not achieve at least 50% in the end of module test after referral opportunity will not successfully complete the module.

There is no referral opportunity for a student who has re-enrolled on any credit bearing module: Pharmaceutical Sciences and Therapeutics 1 (OSPAP) 7LMS0231, Pharmaceutical Sciences and Therapeutics 2 (OSPAP) 7LMS0130, Medicines and Pharmacy Practice (OSPAP) 7LMS0131 and Preparation for Practice (OSPAP) 7LMS0132.

A pass in the law assessment in the Medicines and Pharmacy Practice (OSPAP) module (7LMS0131) of at least 50% is required and is not compensatable. A pass in the numeracy assessment in the Medicines and Pharmacy Practice (OSPAP) module (7LMS0131) of at least 70% is required and is not compensatable.

In both the Medicines and Pharmacy Practice (OSPAP) module (7LMS0131) and the Preparation for Practice (OSPAP) module (7LMS0132) there is an OSCE examination in which there are critical fail elements. The critical fail elements cover issues of patient safety and pharmacy law. Students who do not demonstrate competence in the critical fail elements after a referral opportunity will not successfully complete the module.

The Medicines and Pharmacy Practice (OSPAP) module (7LMS0131) requires a pass in the Dispensing Practical Assessment. Students are permitted a maximum of three attempts (over two academic years) in the dispensing assessment which is part of Medicines and Pharmacy Practice module.

A pass in the placement workbook in the Preparation for Practice (OSPAP) module (7LMS0132) of at least 50% is required and is not compensatable. Students are permitted a maximum of three attempts (over two academic years) in the placement workbook in the Preparation for Practice.

Within the Pharmaceutical Sciences and Therapeutics 2 (OSPAP) module (7LMS0130) there is an aseptic technique assessment in which students must demonstrate competence

In Pharmaceutical Sciences and Therapeutics 2 (OSPAP) module (7LMS0130) there is an Extemporaneous Preparation Dispensing Test in which there are critical fail elements. The critical fail elements cover issues of patient safety. Students who do not demonstrate competence in the critical fail elements will not successfully complete the module.

Students must complete and pass Study Skills and Practice Orientation (OSPAP) module (7LMS0230) according to the criteria detailed in the module guide in order to complete their postgraduate diploma.

E. Management of Programme & Support for student learning.

Management

The programme is managed and administered through:

- The Programme Leader, who is responsible for advising students on the programme as a whole and chairing the programme committee.
- Student representatives on programme committees.
- Module leaders.
- A designated administrative team to deal with day-to-day administration associated with the modules within the programme.

Support

Students are supported by:

- An induction week at the beginning of each new academic session.
- Attendance at the University international induction week and the course induction programme for Overseas Students.
- You will have a Personal Tutor who will be an important point of contact, able to help you gain a good understanding of the School and programme you are studying.
- Study Skills module starting in Induction week in semester A to ensure familiarity with approaches to assessment and professionalism.
- Extra support available in English (to enable accurate referencing and avoiding plagiarism).
- Placement site staff to support visits and placement.
- The department Placements Office to co-ordinate visits and to support students during their visits and placement.
- A substantial Student Centre that provides advice on issues such as finance, University regulations, legal matters, accommodation, international student support, etc.
- Attractive modern study environments in 2 Learning Resources Centres, incorporating a library and computer centre.
- On-line information and learning materials and support through the University's Managed Learning Environment – CANVAS – a University-wide set of systems and tools for educational delivery.
- An Accommodation Office
- Access to extensive digital and print collections of information resources.
- Students Success Hubs.
- A Mathematics Drop-in Centre.
- An Equal Opportunities Office.
- Hertfordshire Students' Union.
- Office of Dean of Students, Student Wellbeing (incorporating Counselling, Mental Health and Disability Support), Chaplaincy, and Day Nursery.
- Medical Centre on campus.
- A student Counselling Service.

- Access to a School Disabled Student Tutor and access to assessment for validated learning support.
- University Disability Advisors.
- Careers and Employment.
- The Sports Village.
- Dean of School.
- Associate Deans of School AQA and Education.
- Dedicated programme site.

F. Other sources of information

In addition to this Programme Specification, the University publishes guidance to registered students on the programme and its constituent modules:

- A Programme (or Student) Handbook on Canvas;
- A Definitive Module Document (DMD) for each constituent module;

The [Ask Herts](#) website provides information on a wide range of resources and services available at the University of Hertfordshire including academic support, accommodation, fees, funding, visas, wellbeing services and student societies.

As a condition of registration, all students of the University of Hertfordshire are required to comply with the University's rules, regulations and procedures. These are published in a series of documents called 'University Policies and Regulations' (UPRs). The University requires that all students consult these documents which are available on-line, on the UPR web site, at: <http://www.herts.ac.uk/secreg/upr/>. In particular, [UPR SA07](#) 'Regulations and Advice for Students' Particular Attention - Index' provides information on the UPRs that contain the academic regulations of particular relevance for undergraduate and taught postgraduate students.

In accordance with section 4(5) of the Higher Education and Research Act 2017 (HERA), the UK Office for Students (OfS) has registered the University of Hertfordshire in the register of English higher education providers. The Register can be viewed at: <https://www.officeforstudents.org.uk/advice-and-guidance/the-register/the-ofs-register/>.

G. Entry requirements

The normal entry requirements for the programme are:

1. The University must have received notification from the General Pharmaceutical Council (GPhC) that the applicant is eligible to apply for the OSPAP.
2. Applicants must normally complete an interview successfully (in person or via Teams). The interview will normally consist of a demonstration of communication skills, an understanding of the role of the pharmacist, knowledge of the profession and an understanding of the work commitment needed to complete the course. In exceptional circumstances, where an interview has to be conducted via telephone, steps will be taken to confirm the identity of the person and that as far as possible confidentiality is ensured.
3. Applicants must normally have a pharmacy degree equivalent to a UK bachelor qualification as measured by NARIC (www.ecctis.co.uk/naric). In exceptional circumstances, where applicants do not possess the standard entry requirements, a judgement will be made about the applicant's suitability for the programme using the following criteria:
 - Review of the international comparative assessment framework forwarded by the GPhC by an academic panel
 - Ability to understand level 7 programme following the review of the comparative assessment framework and discussion during the interview

4. Applicants must normally have passed the Academic IELTS test with a score of 7.0 in all components in one sitting to be eligible for adjudication.
5. Applicants must normally have practised as a pharmacist, in a patient-facing role, equivalent to 6 months full time.
6. Students will be required to meet any requirements associated with the General Pharmaceutical Council's Standards for Pharmacy Professionals and Student Fitness to Practise Procedures.
7. Students must be medically fit to undertake the Programme (including work visits) and students will therefore undergo an occupational health assessment. Students with disabilities are considered on an individual basis, all students must be potentially capable of demonstrating the competencies required by the governing body and the learning outcomes of the Programme.
8. In order to comply with the Rehabilitation of Offenders Act 1974 (exceptions) Order 1975, students will therefore be required to undergo enhanced clearance checks by the Disclosure and Barring Services (DBS) followed by annual checks; entry onto the Programme is subject to a satisfactory self-disclosure and enhanced DBS check or equivalent for international students.

For current entry tariff point requirements, please refer to the relevant page for the Course on the University website or on the online prospectus.

The programme is subject to the University's Principles, Policies and Regulations for the Admission of Students to Undergraduate and Taught Postgraduate Programmes (in [UPR SA03](#)), along with associated procedures. These will take account of University policy and guidelines for assessing accredited prior certificated learning (APCL) and accredited prior experiential learning (APEL).

If you would like this information in an alternative format please contact:

icaq@herts.ac.uk

If you wish to receive a copy of the latest External Examiner's Report for the programme, please email a request to aqo@herts.ac.uk

KEY TO PROGRAMME LEARNING OUTCOMES

Knowledge and Understanding

- A1. National and local health policies in relation to their impact on health gain and service delivery.
- A2. The roles of pharmacists as members of the multi-professional and multi-agency teams within public health and primary care.
- A3. The Competency Framework associated with the Professional Practice of Pharmacy.
- A4. Evidence and science based approaches to Professional Practice of Pharmacy and Medicines Management, including a critical appraisal of the validity of data and research findings.
- A5. How established techniques of research and enquiry are used to create, interpret, evaluate and apply new knowledge within practice.
- A6. The ability to understand concepts, and apply in practice, techniques of research and enquiry to their own and others advanced study and, where appropriate, to propose new hypotheses.
- A7. The implications of relevant current evidence including quality assurance mechanisms.
- A8. The variety of ways in which practitioners lead and innovate in their own practice domain.
- A9. Demonstrate a critical understanding of the concepts and principles relevant to pharmaceutical formulations and delivery.
- A10. Have a comprehensive and detailed knowledge of the basic regulatory framework of UK and EU medicines law and the application of this framework to particular aspects of pharmacy practice.

Practical Skills

- C1. Demonstrate the ability to deal with complex pharmaceutical care issues in an autonomous manner and prioritise.
- C2. Communicate effectively with patients and health care professionals.
- C3. Apply the principles of the preparation, supply and testing of aseptically prepared sterile products.
- C4. Demonstrate the ability to analyse in depth the implications of ethical and legal theories that inform sound professional judgement.

Intellectual Skills

- B1. Critically analyse the contribution of research and health data which underpins the professional practice of pharmacy.
- B2. Demonstrate the ability to use an evidence and science based approach to the professional practice of Pharmacy and the delivery of medicines management services.
- B3. Critically examine how current policy and legal frameworks inform the safe rational and effective use of medicines.
- B4. Demonstrate scholarship, initiative and critical autonomy in tackling and resolving problems related to their own research.
- B5. Deal with complex issues systematically and creatively.
- B6. Make recognised contributions of value to wider debates and developments in the field.
- B7. Effectively apply a range of theoretical concepts to develop strategies which advance current practice.

Transferable Skills

- D1. Communicate effectively both orally and in writing
- D2. Work effectively within a team
- D3. Present and support an extended argument utilising evidence based practice
- D4. Manage time and resources
- D5. Develop critical self-reflective skills as a professional practitioner

Table 3: Development of Graduate Attributes in the Constituent Modules

This map identifies where the Graduate Attributes are delivered in the constituent modules. It provides (i) an aid to academic staff in understanding how individual modules contribute to the development of the Graduate Attributes (ii) a checklist for quality control purposes and (iii) a means to help students monitor their own personal and professional development as the programme progresses. [Note that there is no requirement for the Graduate Attributes to be assessed through these modules
