GLOBAL HEALTH HISTORIES SEMINARS

Seminar 49:
Health and care in pregnancy and beyond
– putting women centre stage

Perspectives on care in pregnancy and childbirth vary across different settings and health care professions, and have changed radically over the past century.

In this seminar, Professor Mary Renfrew draws on developments in policy and practice in the UK and internationally, to examine how well these varied perspectives meet the needs of women and their families. Her co-speaker is Dr. Metin Gülmezoglu.
