Advanced Oncotherapy PLC
27 June 2013

ADVANCED ONCOTHERAPY Plc

("Advanced Oncotherapy" or "the Company")

Issue of Equity

Advanced Oncotherapy (AIM: AVO) announces that it has conditionally placed 25,000,000 new ordinary shares (the "New Ordinary Shares") in the Company at a subscription price of 2 pence per New Ordinary Share to raise £0.5 million before expenses. The subscription price represents a 21% premium to the closing mid-market share price on 25 June 2013. The shares have been placed with two Swedish and one Italian investor, who all have a specialist interest in the healthcare sector.

Application has been made for the New Ordinary Shares to be admitted to trading on AIM and it is expected that trading will commence on or about 2 July 2013. The New Ordinary Shares will rank pari passu in all aspects with the existing ordinary shares of the Company.

On admission, the Company will have 384,410,368 ordinary shares in issue.

Advanced Oncotherapy's Chief Operating Officer, Dr Sneh Khemka, said of the placing: "We are very pleased that three seasoned international investors have chosen to invest, at a premium to the current share price, in our company. Their investment and insight will be invaluable at this critical stage of development and will, we believe, ultimately help cancer patients access better care".

About Advanced Oncotherapy Plc

1. AVO is a provider of radiotherapy services that harnesses the best in modern technology. As a result, we offer cancer patients affordable access to innovative treatments with proven better health outcomes.

2. AVO's acquisition of ADAM, a company spin off from CERN (The Large Hadron Collider), focuses on the development of a proprietary radiation technology called LIGHT. This technology offers patients and providers the benefits of proton beam therapy at significantly reduced capital and running costs.

3. AVO's subsidiary company, Oncotherapy Resources Ltd, offers an exclusive mobile service for intraoperative radiotherapy (SD-IORT). This form of radiotherapy is used in a variety of cancers, notably breast cancer, and offers a convenient, safe and effective alternative for the patient. It is currently available in the UK from Spire Healthcare and BMI Healthcare Hospitals.

4. Through its shareholding in Advanced Proton Solutions (APS), AVO is involved in the development of the first comprehensive proton beam therapy centre in London to treat both NHS and private patients. This is the first of its kind in the UK, and will offer treatment options to UK cancer patients that have rarely been available in the past.
