

Senior Data Manager

Are you ready to join an expanding and innovative biopharmaceutical company and play a key part in our clinical development efforts

In this role, you will get to take on cross-disciplinary challenges and make a real difference in our research and development of new cancer treatments.

Welcome to Y-mAbs Therapeutics A/S

At Y-mAbs Therapeutics A/S, we develop targeted antibody immunotherapies for pediatric cancers. You will join our experienced Biometrics team consisting of medical writers, data managers, and statisticians. Together, we support our clinical development programs with crucial data.

You will join us at an exciting time as we have submitted BLAs and are preparing MAA submissions as well as initiate clinical development for several new projects. With the mission to become the world leader in developing antibody-based cancer products that address clear unmet needs in pediatric oncology, we cannot wait to welcome you to our team.

In this new position you will serve as the technical leader on all data management aspects for a portfolio of project(s) including start-up, maintenance, and completion activities. You will develop or oversee the development of CRFs, Data Management Plans, and other key elements which ensure, timely, consistent, and quality clinical data on Y-mAbs initiated clinical trials. Moreover, you will have the opportunity to work with data originating from investigator initiated clinical trials. In handling these non-standard data, you need to be open minded and pragmatic to ensure data quality at a level feasible for regulatory filings. You will be part of the Biometrics team within Clinical and Regulatory Development. The team is in development and currently counts 8 regular members and a number of consultants.

We work in close collaboration with CROs and you will be responsible for maintaining a proper oversight of all data management aspects.

Your work will have a palpable impact on our efforts to develop new and innovative cancer treatments as you:

- Participate in Clinical Data Management design, planning, conduct and activities
- Maintain adequate sponsor oversight
- Provide input to protocol, study report and other relevant documents
- Secure proper database and eCRF setup from start to database lock
- Oversee data transfer and cleaning with focus on quality and data integrity
- Lead Data Quality Meetings
- Participate in writing policies, guidelines and SOPs related to DM
- Keep up to date with relevant regulatory guidance

Make your mark on our great team

We offer you the chance to join a highly efficient team of carefully selected leading specialists at our great office location in the DTU Science Park. Here, you will get to make a real difference.

“My team is characterized by an unusually high degree of technical expertise and professionalism. At the same time, we have a great dynamic and a strong drive to make a difference in the fight for developing new and effective cancer treatments. My task will be to give you the best conditions for doing your work and to remove any obstacles,” Director of Biometrics René dePont Christensen explains.

Experienced data manager with great problem-solving skills

To succeed in this role, you need good communication abilities as you will share knowledge with colleagues outside your field. You have a very service-oriented attitude combined with strong analytical skills and an eye for details. Additionally, you also bring a can-do attitude, and you meet any obstacles with a positive and proactive approach.

Specifically, we imagine that you:

- Have a MSc or similar in natural sciences
- Have a minimum of 5 years' experience as data manager and preferably 2 years at a senior level. Hands-on experience IBM clinical and/or Medidata RAVE will be an advantage
- Have experience working with CROs
- Are structured, organized, and have excellent coordinating skills, while still thriving in an entrepreneurial environment
- Take responsibility and work independently
- Can work with ambitious timelines in our slim organization with a cross-functional team
- Speak and write English effortlessly

Interested?

If you want to know more about the position, you are welcome to contact Director of Biometrics René dePont Christensen at: +45 5379 1088.

You can apply for the position by position sending an email to hr@ymabs.com **no later than September 15th 2020**. We will initiate interviews in a rolling manner as applications are received.

Please note that applications must be submitted in English and will be treated confidentially. Mark your applications with position ID number: 1023
