

JOIN AIP – ONE OF THE LARGEST ENERGY TRANSITION FUNDS IN THE NORDICS

AIP is looking for an **Asset Associate** to join our expanding Asset Management Team.

The role

As an Asset Associate, you will be part of the Asset Management Team, working closely together with the investment and finance functions. The primary role as an Associate in the Asset Management team is to perform commercial and financial analysis in close collaboration with the other asset management professionals. This includes valuation and financial modelling of the existing assets in the AIP portfolio.

The Asset Management Team is responsible for managing and optimising the energy and infrastructure assets in the AIP portfolio. As an Asset Associate you will build strong competencies within best practice modelling and financial analysis. Furthermore, working with our experienced team members, the right candidate will build a strong commercial and contractual understanding of renewable energy and infrastructure assets.

The primary tasks include:

- Financial modelling and valuation of the assets in the AIP portfolio
- Financial and commercial analysis of the assets
- Preparation and update of analysis presentations
- Analysis, evaluation, and presentation of key risk factors for the assets
- Evaluation of ongoing decision-making material incl. improvement initiatives from a financial point of view
- Review of key project and financing contracts from an owner's viewpoint
- Ad-hoc analyses in close cooperation with other asset management team members

The job will entail travel activities in the order of 10-20 days per year.

The successful candidate should demonstrate:

- Excellent academic achievements
- 1-4 years of post-graduate experience in a corporate finance, financial advisory or valuation position
- Strong skills within valuation and financial modelling
- Ability to deliver high quality with a best practice mindset and attention to detail
- A structured approach with strong analytical skills
- Ability to drive projects and workstreams forward by prioritising effectively with the team
- Strong ability to work independently while still being a team player keeping an investor-related perspective
- Experience with energy and infrastructure assets is an advantage, but not a requirement
- A positive attitude and a strong desire to work in a growing organisation with a lot of responsibility and ability to shape your own working day

We are evaluating candidates and conducting interviews on an ongoing basis. Therefore, if you wish to be considered for the position, please send your application through our [website](#) as soon as possible.

AIP Management is an investment manager dedicated to advising institutional investors on direct investments in energy and infrastructure assets in Europe and the United States.

AIP is a fast-growing organization characterized by an ambitious and entrepreneurial work environment, where we take joint responsibility for the development of the business. The team has extensive experience from investment banking, transaction advisory and consulting, infrastructure and energy corporations and private equity. To date, AIP has invested more than EUR 4 billion across 18 assets within offshore wind, onshore wind, biomass, solar, gas, telecom and rail. AIP has in 2020 launched a new fund, AIP Infrastructure II K/S with a target commitment of EUR 4 billion, and the ambition for the coming years is to invest up to EUR 1 billion annually.
