

IT Solution Architect – Research & Development

Lundbeck's passion links to our purpose about restoring brain health so every person can be their best. We strive to make a real difference to patients. By developing innovative treatments, we improve the lives of people living with brain diseases. Your dedication is crucial. That is why you can expect us to be committed to your progress, so you can stay committed to ours.

Description

You will be joining a team of professionals in IT, who is involved in global innovative projects, providing an end-to-end architectural perspective and ensuring a strategic fit between solutions and business requirements for R&D solutions.

You will be a part of Corporate IT - R&D Solution Architecture group supporting R&D where you will focus on GxP projects.

The group is anchored in the Business IT Delivery Division and you will have about 20 Solution Architect and Project Manager colleagues covering all Lundbeck's corporate applications. You will also work closely with IT specialists from other Corporate IT departments, colleagues from different business units, implementation partners and with our outsourcing partners. The position is based in our HQ in Valby in the Copenhagen area, Denmark.

Your job and key responsibilities

Responsibilities are linked to GxP regulated environment regrouping complex GxP critical IT systems in R&D.

Responsibilities span from initiation of business cases all the way to completion of projects until the solutions are successfully implemented.

Primary deliveries

- Transforms business needs into requirements for IT solutions
- Participate in technology and vendor selection, requirement specification, RfI, RfP process, supplier and solution assessment as well as implementation
- Create and maintains architecture for the relevant application/system portfolio
- When necessary, provide or coordinate support for incidents related to systems supported by the R&D solution architecture group

Secondary deliveries

- Ensure coherence between applications/systems
- Create roadmaps in alignment with IT and LoB strategy
- Support business in their validation process (Computerized system validation and data integrity processes) when relevant

We offer

Lundbeck offers a great workplace that is based on a flat structure, forming a collaborative working environment based on respect and equality. We employ dedicated colleagues and encourage continuous development. Together, we create the ideal conditions for you and your job, so we can improve treatments and life for people with brain diseases.

The Corporate IT department has recently been top rated as one of the most attractive IT workplaces in Denmark. In the internal employee satisfaction survey, the community constantly receives top scores – hence this is a great opportunity to join a team to be proud of. And at the site in Valby we have a canteen to long for and a fully equipped gym with an indoor swimming pool.

Qualifications

Our preferred candidate has the following personal and professional qualifications:

- Experienced IT professional with Pharma R&D experience (>3-5 years)
- Take lead in architecture and solution design with an ability to work in multi-vendors environment
- Experience within IT system compliance (GxP) and knowledge of IT Security and Data integrity (>3-5 years)
- Work independently in a proactive performance-oriented way, while at the same time contribute and be a team player
- Dialogue and consult with the business owners and other relevant stakeholders and become a trusted advisor
- Keeps up to date with technology related to application Solutions
