Senior Analyst for Financial Planning & Analysis

Are you passionate about your work, enjoy close cooperation with the business and have great financial modelling and analysis skills? Would you like to make a real impact, while working in an international renewable energy company?

Better Energy is looking for a Senior Analyst for our Copenhagen office who will be responsible for developing, updating and maintaining financial models that consolidates information from the entire business into a corporate view and hence ensures an overview of the company’s future capital needs.

Your team

You will join the Financial Planning & Analysis team and report to the Vice President of Financial Planning & Analysis. Here you will fill an essential role in our small, but important, team moving forward. We are part of the Finance department with a total of 20 dedicated, talented and kind colleagues who love to laugh together, especially at our social events.

Like your colleagues, you are comfortable with precision work and have great analytical and independent problem-solving skills. You are professionally strong, organized and take pride in using your skills to establish positive and productive relations with your colleagues and partners. We have a dynamic work culture with a short decision-making process, giving you the opportunity to influence and develop your own tasks and responsibilities.

Your role

As a Senior Analyst you will be responsible for developing, updating and maintaining financial models that consolidate information from the entire business into a corporate view and hence ensure an overview of Better Energy’s future capital needs. As the responsible part for the overview of the company’s capital needs, you will also be the main point of contact for all analysis regarding Better Energy’s capital growth strategy.

You will create and deliver analysis and presentations regarding the capital growth strategy to the Board of Directors at board meetings and keep a close dialogue with senior management. You will also have the significant function of organizing and streamlining the cooperation between FP&A and other departments in the organization to make sure all relevant information is continuously accessible and updated.

It is a job with great variety and your tasks will include:

- Developing, updating and maintaining complex financial Excel models
- Analysing Better Energy’s medium- and long-term capital needs in various scenarios
- Creation of clear and concise PowerPoint presentations to convey information to senior management and the Board of Directors
- Assisting in the analysis of optimal corporate funding
- Support in various ad-hoc analysis regarding ongoing business decisions
These are some of our initial thoughts. We would love to see you shape your own career here at Better Energy - but this will give us a great start. Ask anyone at Better Energy and they will say you have excellent opportunities for professional and personal development.

About you

We expect you to have experience within the field of finance – presumably from a position as Analyst, Senior Analyst or similar (minimum of 2 years), and a cand.merc. degree or similar.

With a detail-oriented approach to your work you have an ability to persistently see processes and projects through and deliver your work in an accountable manner. You should also have the following:

- Experience with preparing and delivering professional analysis and presentations
- Experience within financial modelling
- Strong PowerPoint skills
- Strong English skills – both spoken and in writing

Since we have a lot of focus on people at Better Energy, we think you will match the team best if you can identify with the qualities below:

- Independent and proactive approach while prioritizing being a team player in our own team as well as in the interaction with other departments and stakeholders
- Known for your positive energy, outlook, and motivation for accumulating new skills and developing yourself
- Recognise new opportunities, challenge, optimize and further develop existing ways of working in close collaboration with colleagues and other stakeholders

If only some of the abovementioned applies to you, but you still think you are a great match – apply and try to convince us.

Join a company with a vision of engineering a sustainable future

Better Energy is an international renewable energy company that specializes in creating new green energy. The green transition from fossil fuels to renewable energy sources can only be achieved by adding new renewable energy to our energy supply. At Better Energy, we are determined to drive change and help companies, cities and countries choose green energy in a way that brings new renewables online in an efficient and safe manner. We design, develop, engineer, finance, build, operate and own large-scale solar PV power plants in Denmark and abroad.

When joining Better Energy, you must be ready to drive change and make an impact that matters. You share our drive and commitment, and you are enthusiastic about joining a company with a broad professional foundation where we collaborate across departments and professional backgrounds. Like us, you are passionate about your work, and you share our vision of engineering a sustainable future. You are ambitious and motivated by working with other talented and dedicated colleagues.
How we recruit

We know that it is our people who make the difference. Having the right skills is only part of the picture. We look for cultural fit, too. This means that we are very thorough when we look for the best match for both you and Better Energy. If you are interested in applying your skills and talents to truly make a difference, send us your CV and your application.

Please apply for the position **no later than 20. January 2022** using the link below. Since finding the right candidate means so much to us, we are conducting interviews on an ongoing basis and will close the process when the right candidate has been found.

If you have any questions about the position, please contact Vice President of Financial Planning & Analysis, Christian Bach at eba@betterenergy.dk or by phone +45 31 40 13 65. If you have questions about the recruitment process, please contact Marie Kirstine Jacobsen at mkj@betterenergy.dk
