

Calypso Capital Markets Consultant

Are you eager to help financial institutions shape their future? Are you solving problems using creativity and theory?

Then join Visigon's Copenhagen office and help us assist banks, insurance companies, asset managers and other financial institutions.

The position

As a consultant at Visigon, you will work in close collaboration with our customers focusing on implementing, developing and maintaining systems within the capital markets area.

Typical project responsibilities include

- Configuration of market leading trading platforms including Calypso, Front Arena and Murex
- Implementation of financial instruments including indices, static data and legal entities
- Definition and implementation of market data feeds, PnL calculations, risk figures and market values
- Performance optimization
- Pre- and post-trade monitoring
- Trade modelling and pricing
- Portfolio risk analysis

Your development

Visigon will complement the skills you have acquired during your career. Through our own and external training programs, we will ensure your continued development.

About you

- Prior experience in the capital markets area
- Master's degree in economics, mathematics, engineering, science or similar education
- Strong problem identification skills and creativity to develop new and innovative solutions
- Good knowledge of financial instruments
- Prior experience working with Calypso is considered a strong advantage

What we offer

- Personal development and training opportunities
- Very strong team culture among supportive colleagues, where team spirit and cooperation is highly valued and rewarded
- Competitive salary package with bonus scheme and benefits

About Visigon

Visigon has the largest Calypso practice in the Nordics. We are a team of consultants inspired by change, and with a passion for learning we build lasting value together with our customers. By offering a wide range of services including business analysis, software design, development and project management, Visigon ensures sustainable solutions for all aspects of trading, risk management and post-trade operations to banks and other financial institutions.
