

Capital markets IT consultant

Are you eager to shape the future of financial markets?
Are you solving problems using creativity and theory?
Are you curious by nature and nice to work with?

Then join Visigon's Copenhagen office and help us help banks, insurance companies, asset managers and other financial institutions.

The job

As a consultant at Visigon, you will mainly work project-oriented. You will work closely with our customers with a focus on implementing, developing and maintaining system in the capital markets area.

The projects will typically involve:

- implementation of new products, processes and systems in trade, risk management, clearing and settlement of capital market products
- Advice, validation and development of financial models
- Testing, configuration management and quality assurance of IT systems

Your development

We will complement the skills you have already earned through education or experience. In our own certification program, we will train you in all basic aspects of finance and IT, and let you specialize in a topic that fits your desired development path in combination with the demand of our customers. We only expect you to have a strong theoretical background and a strong interest in applying it in finance.

About you

- You recently graduated or have a few years of experience
- You have strong problem identification skills and

creativity to develop new, innovative solutions

- You hold a master' degree in mathematics, engineering, science, mathematical economics or similar
- It is an advantage if you have knowledge of programming languages and tools like: C # / C ++, .NET, Java as well as knowledge of building financial models in R, Python, VBA, SAS or similar tools,

What we offer

- High degree of responsibility
- Personal training opportunities
- Strong team culture among supportive colleagues, where team spirit and cooperation is highly valued and rewarded.
- Competitive salary package with bonus scheme and benefits

About Visigon

We are a team of consultants inspired by change, and with a passion for learning we build lasting value together with our customers. By offering a wide range of services including business analysis, software design, development and project management, Visigon ensures sustainable solutions for all aspects of trading, risk management and post-trade operations to banks and other financial institutions.
