

## Clinical Project Manager

Y-mAbs is a listed biotech company based in Hoersholm and New York. We develop new treatment options for pediatric cancers. Y-mAbs Therapeutics A/S (Y-mAbs) is looking for two experienced Clinical Project Managers (CPMs) in newly established positions.

Y-mAbs is currently experiencing exciting times; the company is well funded, following a successful public offering last year and a secondary offering last month; we are expanding significantly, preparing for the submissions of our first BLAs for our lead products omburtamab and naxitamab. Moreover, we have an interesting pipeline with several compound modalities entering clinical development. Next in line is our vaccine compound for neuroblastoma patients in remission. At the same time, we also want to initiate two clinical studies with naxitamab for line-extensions. We are therefore looking for two dedicated CPMs that can be our lead for these new activities.

As our CPM you will function as lead for trial related activities using your operational, scientific and therapeutic expertise. In collaboration with colleagues from different functional areas, you shall lead one or more international clinical trials with the overall goal of developing new and innovative treatment mainly for pediatric cancer patients.

We work in close collaboration with CROs and you will be responsible for securing trial deliverables in a proactive fashion, through clear communication and great teamwork at all stages of the trials. As CPM you will also ensure proper documentation, record management as well as sponsor engagement and sponsor oversight.

### Key responsibilities:

- Provide input toward production, review and approval of clinical trial documents
- Lead trials and drive timelines and deliverables within the team
- Visit sites to develop and maintain relationships when necessary
- Ensure trial team members are adequately trained for responsibilities on trial conduct
- Oversight of CROs and other vendors involved in the clinical trials
- Contribute to the continuous improvement of Y-mAbs' procedures and secure best practices

### Personal and professional qualifications:

- BSc or MSc within the medical, biological or pharmaceutical science or equivalent
- 5+ years' experience and in-depth knowledge of executing early as well as later phase clinical trials
- We expect you to have an entrepreneurial mindset and that you are able to work with ambitious timelines in an organization with an experienced drug development team
- You are result-oriented and committed to contributing to the overall success of YmAbs
- Our company language is English, so your communication in both written and spoken English is fluent
- You may expect to travel for 10-30 days per year

**Y-mAbs offers:**

- An exciting work environment where challenging assignments will come your way
- Great office location at DTU Science Park including canteen and easy parking
- Competitive salary package including pension and health insurance

For more details about the job or our company, please contact Joris Wilms, SVP, Chief Operating Officer, at +45 25211647. Please note that all applications must be submitted in English and will be treated confidentially.

**Deadline:** please apply by email to [info@ymabs.com](mailto:info@ymabs.com) no later than 25<sup>th</sup> November 2019. We will initiate interviews in a rolling manner as applications for the job are received.
