

3rd EDITION

ZUCCHELLI MASTERCLASS

Periodontal and Peri-implant Plastic Surgery

GIOVANNI ZUCCHELLI

ZUCCHELLI MASTERCLASS

Periodontal and Peri-implant Plastic Surgery

Prof. Giovanni Zucchelli

Osteocom brings you the 3-day training course by Prof. Zucchelli with all the advantages of online learning. This new format consists of 13 completely new theoretical lectures, 2 ReLIVE surgeries commented by the Author, an exclusive LIVE streaming surgery and interactive Classroom Case Discussions. To make sure that the sessions run smoothly and that everyone has a positive experience from participation, the course is open to a limited number of 60 participants. Once the maximum number of participants has been reached, further registrations will not be accepted. However, you can subscribe to the waiting list to reserve a place for the next online course activation.

SUBSCRIPTION TERM: **UNLIMITED**

LENGTH: **18 HOURS ON DEMAND**

QUALITY: **FULLHD VIDEO**

NUMBER OF VIDEOS: **22 LECTURES**

LANGUAGE: **EN**

About the course

This new online educational focuses on periodontal and peri-implant hard and soft tissue management techniques. Participants will receive up-to-date knowledge on treatment concepts enriched by numerous clinical tricks to meet the treatment needs of your daily routine in the practice. Lectures and Relive surgeries with opportunity to interact will enable you to expand your knowledge on periodontal and peri-implant surgical techniques.

The objective is to provide dentists, periodontologist and implantologists the theoretical and, first and foremost, practical skills necessary to perform the following techniques:

- root coverage;
- increase in keratinised/attached gingiva around teeth and implants;
- soft tissue volume augmentation around implants.

Competences to be acquired by participants

- Increased knowledge of periodontal and peri-implant anatomy.
- Ability to correctly diagnose mucogingival deformities.
- Ability to treat gingival recession with the most up-to-date techniques.
- Ability to perform soft tissue augmentation techniques around implants and in bridge areas.
- Ability to apply this knowledge in daily practice.

The course includes

- 10-hour video course structured into monothematic training modules.
- A LIVE streaming surgery.
- 3 recorded interactive Case Discussions (1st edition) + 2 LIVE Case Discussions (2nd edition).
- A new LIVE interactive Case Discussions, only for participants to the 3rd edition
- Certificate of completion signed by the teacher Prof. G. Zucchelli.

VideoCourse Program

Video Lecture 1 – on demand 24/7

Esthetics on natural teeth and implants: thickness VS attachment

This video opens a series of web-lectures dedicated to soft tissue plastic surgery around implants. The objective of this first lecture is to outline the differences in esthetic treatment goals between natural teeth and implant-supported crowns, undelining the synergy with the adjacent elements and the potential of hard and soft tissue in terms of attachment, proportions, texture.

Video Lecture 2 – on demand 24/7

Surgical resolution of single gingival recession on natural teeth in the esthetic area

In this lecture the Author addresses the surgical treatment procedures that represent the best practice for gingival recession coverage. The objective is to outline the rationale behind the synergy between Coronally Advanced Flap and disepithelialized FGG / CTG. This lecture paves the way for a further comparison between gingival recession treatment options on natural teeth and implant-supported crowns that will be addressed in the dedicated video.

Video Lecture 3 – on demand 24/7

Connective tissue graft: palatal harvesting technique, graft preparation and stabilization

This video allows the Author to describe the rationale behind palatal connective tissue graft harvesting, disepithelization and finishing while showing a clinical example of such procedures. The latter part of the video focuses on suture techniques, in terms of CTG and CTG stabilization, as well as surgical papillae management.

Video Lecture 4 – on demand 24/7

Lower incisors: gingival recession treatment options

This lecture focuses on Vertically Advanced Flap for the treatment of gingival recession on lower incisors. The Author outlines the anatomical features of this area - especially in comparison with the upper incisors, the importance of pre-surgical orthodontic treatment and timing, before commenting on the surgical procedures that exploit the synergy between CAF and CTG, the latter working as a barrier to prevent future gingival recession.

Video Lecture 5 – on demand 24/7

Complete Dehiscence Coverage around implants

Is it possible to compare soft tissue dehiscence treatment on natural teeth and implants? This video offers an answer, by addressing the different types of peri-implant soft tissue dehiscences, outlining the key factors for peri-implant dehiscence coverage success. the aim is to describe a prosthetic-surgical approach to single recession on implant-supported crown.

Video Lecture 6 – on demand 24/7

What are the main differences in gingival recession treatment around teeth and implants?

An all comprising comparison between single gingival recession surgical coverage

- *Flap design*
- *Deep and superficial incision*
- *CTG harvesting and preparation*
- *papillae management*
- *surgical technique and suture*
- *soft tissue maturation and creeping promotion.*

Video Lecture 7 – on demand 24/7

Esthetic management of misplaced implants: abutment choice in extreme cases, surface decontamination and 2

This lecture shows how to successfully approach extremely malpositioned implants in the esthetic area.

The focus is to offer a series of prosthetic and surgical indications concerning buccally displaced screws, point out decontamination protocols and instruments, and describe how to approach 2 adjacent implants following the CTG procedures outlined in the previous lecture.

Video Lecture 8 – on demand 24/7

Multiple recession treatment in the upper jaw: rationale, surgical technique and restoration tips

This lectures outlines everything that must be taken into consideration when approaching multiple gingival recession around teeth in the maxilla:

- *anatomical features*
- *flap design and extension*
- *CTG management*
- *suture*
- *biological width restoration*
- *cementum-enamel junction preparation*

Video Lecture 9 – on demand 24/7

Soft tissue approach to delayed post-extraction implant installation

This lecture focuses on delayed guided simple implant installation with contextual soft tissue augmentation, by describing new procedures that allow to intercept future risks of gingival recession and ensure the best esthetic outcome.

Video Lecture 10 – on demand 24/7

Soft tissue approach to immediate post-extraction implant installation

In this video the Author describes immediate post-extraction implant placement with contextual submarginal CTG. The description starts by outlining the critical importance of correct implant positioning planning in post-extractive sockets, then switches to a step-by-step commentary of all the clinical phases of this novel approach. The last part of the lecture shows how bigger post-extractive sockets can be approached with immediate implant installation and contextual submarginal CTG

Video Lecture 11 – on demand 24/7

Soft tissue augmentation before implant installation: the "connective tissue platform technique"

This lecture describes an innovative subepithelial connective tissue graft technique for soft tissue augmentation in Class III ridge defects that allows in situ maintenance of a connective tissue "platform", aimed at ensuring horizontal and vertical soft tissue augmentation in a single surgical step. The description covers both the rationale behind the technique and its clinical application in several clinical scenarios.

Video Lecture 12 – on demand 24/7

Multiple recession treatment in the lower jaw: rationale, surgical technique and restoration tips

This lecture outlines everything that must be taken into consideration when approaching multiple gingival recession around teeth in the mandible:

- *anatomical features*
- *flap design and extension*
- *CTG management*
- *suture*
- *biological width restoration*
- *cementum*
- *enamel junction preparation*

Video Lecture 13 – on demand 24/7

Gingival recession treatment on lower incisors: what to do when orthodontic therapy is not possible

This lecture describes the treatment of gingival recession on lower incisors in those cases where orthodontic therapy is not possible.

The Author recalls the anatomical features of this area - extensively outlined in Pt.1 - and describes the clinical procedures that ensure connective tissue graft stability and the correct verticality of the vestibulum depth.

Video Lecture 14 – on demand 24/7

Complex case: multiple gingival recession and contextual soft tissue improvement on lower incisors

The video shows a VAF + CTG surgical approach on lower incisors. The thinness of the tissue to be approached, the presence of a narrow papilla with almost no keratinized tissue and an extremely shallow vestibulum depth make this case a very complex one. The step-by-step description offered by the Author allows to appreciate the rationale behind the clinical management of this case.

Video Lecture 15 – on demand 24/7

Soft tissue improvement of edentulous area

The video shows the surgical soft tissue improvement of an edentulous area in the upper jaw. The bone defect is treated like a pocket (via root scaling and amelogenin application), while the soft tissue restoration passes through the application of 2 soft tissue "walls", harvested respectively from the tuberosity and the palate.

Recorded Live 16 – on demand 24/7

Recorded LIVE interactive Case Discussion 1 (first edition)

Relive the LIVE Case Discussion with Prof. Giovanni Zucchelli. Participants are given the opportunity to review clinical cases with Giovanni Zucchelli, sharing practical tips and tricks concerning the clinical application of the techniques shown in the Masterclass.

Recorded Live 17 – on demand 24/7

Recorded LIVE interactive Case Discussion 2 (first edition)

Relive the LIVE Case Discussion with Prof. Giovanni Zucchelli. Participants are given the opportunity to review clinical cases with Giovanni Zucchelli, sharing practical tips and tricks concerning the clinical application of the techniques shown in the Masterclass.

Recorded Live 18 – on demand 24/7

Recorded LIVE interactive Case Discussion 3 (first edition)

Relive the LIVE Case Discussion with Prof. Giovanni Zucchelli. Participants are given the opportunity to review clinical cases with Giovanni Zucchelli, sharing practical tips and tricks concerning the clinical application of the techniques shown in the Masterclass.

Recorded Live 19 – on demand 24/7

Recorded LIVE interactive Case Discussion 1 (second edition)

Relive the LIVE Case Discussion with Prof. Giovanni Zucchelli. Participants are given the opportunity to review clinical cases with Giovanni Zucchelli, sharing practical tips and tricks concerning the clinical application of the techniques shown in the Masterclass.

Recorded Live 20 – on demand 24/7

Recorded LIVE interactive Case Discussion 2 (second edition)

Relive the LIVE Case Discussion with Prof. Giovanni Zucchelli. Participants are given the opportunity to review clinical cases with Giovanni Zucchelli, sharing practical tips and tricks concerning the clinical application of the techniques shown in the Masterclass.

Video Live 21 – on demand 24/7

LIVE streaming surgery with Q&A session

The LIVE streaming surgery brings participants right inside the surgery room of Prof. Giovanni Zucchelli. The LIVE streaming surgery with Q&A session is open to all Zucchelli Masterclass subscribers.

Bio

Prof. Giovanni Zucchelli, DDS, PHD graduated in 1988 from the University of Bologna, Italy with a degree in dentistry. He is Professor of Periodontology and Implantology at the University of Bologna, Italy since 2000.

Prof. Giovanni Zucchelli received many awards for clinical research in periodontology in Europe and the United States. Innovator of several soft tissue plastic surgical techniques, Prof Giovanni Zucchelli is also author of more than 100 publications in Pubmed.

He was speaker at major international conferences on periodontology and has taught theoretical and practical (with live surgery) courses in numerous countries. Prof. Zucchelli is the author of the book title, 'Mucogingival Esthetic Surgery' best seller from Quintessence Publishing which is published in 10 different languages and co-author of two illustrated textbooks on periodontal plastic surgery (Ed. Martina) and of the chapter "Mucogingival Therapy-Periodontal Plastic Surgery" in Clinical Periodontology and Implant Dentistry (Lindhe J, Lang NP, Karring T [eds], Wiley-Blackwell._
