**This HelpFile will help you with Adding Attribute Sets to your Magento Store. An attribute set is required for you to be able to add the options to your products. Simply follow the steps below or head over to our YouTube channel to see watch videos on how to do this. Just search for “WebCreationUK” on YouTube.**

Follow these steps to set one up.

1. Log into the admin panel and select hover over the “Catalog” menu
2. Hover over “attributes” and select “Manage Attribute Sets”
3. Click “Add New Set”
4. In the Name field you need to enter a unique identifier. It cannot include spaces or any special characters.
5. “Based on” needs to be set to “Default”
6. Click “Save Attribute Set” to continue.
7. Click “Add New” under the groups heading
8. Name the Group “Custom Options” and save
9. If you scroll to the bottom of the “Groups” list and you will see the “Custom Options” Folder
10. All you need to do now is drag the required attribute from the “Unassigned Attributes”
11. Click “Save Attribute Set”
