

Alternator Harness Repairs

Plugs and Conversion Leads

Connectors are one of the most common reasons for engine and starting problems on a car, truck, plant machine, or anything that starts with a battery. Simple and economical repairs can be made by simply replacing the weakest link in the electrical system – a corroded, brittle, or broken connector.

Leads and Plugs for Testing Alternators and Regulators, etc.

TER1911U
Blue heat shrink butt connectors sealed crimp marine terminals
 16-14AWG 1.5-2.5mm² conductor.
 100pcs per pack

The best connector for joining alternator plugs with leads to the vehicle it keeps the join waterproof.

TER1910R
Red heat shrink butt connectors sealed crimp marine terminals
 22-18AWG 0.5-1.5mm² conductor.
 100pcs per pack

The best connector for joining alternator plugs with leads to the vehicle it keeps the join waterproof.

EC5820
15A push-on 4mm alligator clips for test leads.
 5 Colour Set.

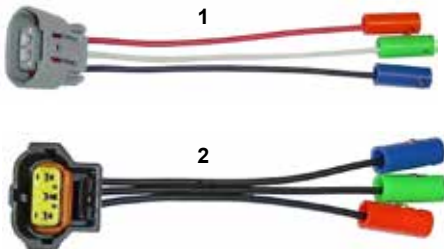

Alligator Clips With Banana Socket

4mm Banana Socket Screw Fix

Black	10 Pack	EC5821
Red	10 Pack	EC5822
Blue	10 Pack	EC5823
Yellow	10 Pack	EC5824
Green	10 Pack	EC5825

See information below

If you are using the alternator plugs for testing alternators and regulators on your test bench, it is important to use colour coded sockets on the ends of the leads. The leads supplied on the alternator plugs, were originally designed for vehicles, with many colour configurations (see image 1 and 2). We have included a colour code, that we use for testing on our test bench (see chart, right).

	IGN+ / Sense+ / R
	Warning Lamp
	DFM (Digital Field Monitor)
	SIG/COM/RLO/RVC/LIN
	All Negatives -

5 Colour Test Lead Set, 1m Length, Complete with push-on Alligator Clips

With Stackable Plugs

Spare Set Included

Alligator Clips With Banana Socket

EC5819
