VI ESCI – Extra Section of Clinical Immunology

**11th WORLD CONGRESS ON
INFLAMMATION**
International Association of Inflammation Societies

Inflammation, Immunity and Therapeutics

September 21 - 25, 2013 Natal RN Brazil

São Paulo, February, 27th 2012

International Union of Immunological Societies - IUIS
Jean-Loup Romet-Lemonne
Program Director

Dear Sir,

It is great pleasure and honor to announce the **11th World Congress on Inflammation** and the **XXXVIII Congress of the Brazilian Society of Immunology**, to be held in the city of Natal, RN – Brazil, in September 21st-25th 2013, an event sponsored by the **Brazilian Society of Immunology (SBI)** and the **International Association of Inflammation Societies (IAIS)**.

Inflammation is now known to be linked to several acute and chronic diseases. Therefore, knowledge of inflammatory mechanisms has become an essential part of those interested in biomedical research from bench to bedside. The congress will gather scientific leaders, outstanding young scientists, physicians and graduate students from all over the world. We hope to present an original program connecting basic science, applied biology and clinical research, and to provide an ideal environment where new ideas can flourish and develop into new treatments.

We would like very much to have your support in advertising this international meeting and suggest the following actions you may take:

- Add information of our congress in your website;
- Forward marketing emails of our congress to your colleagues through newsletters;
- Highlight the congress logo at the homepage of your website;

On the other hand, we propose you to highlight your Institution's logo in the disclosure of materials, press, and in our site.

In advance, we thank you kindly and will be at your service for any additional information needed.

Sincerely,

Boris Vargaftig

B.Boris Vargaftig
