

# First International Primary Immunodeficiencies Congress

Date: 7-8 November 2013

Venue: Palácio Hotel, Estoril, Portugal

*“Focus on Clinical Care and Diagnosis”*

The International Patient Organisation for Primary Immunodeficiencies (IPOPI) is delighted to announce the First International Primary Immunodeficiencies Congress (IPIC).

IPIC will provide a unique international multi-disciplinary platform in the world of Primary Immunodeficiencies (PIDs). IPIC's scientific programme will focus on PID clinical care developments and diagnosis. It will include sessions on a range of issues including PIDs pathogenesis, treatment, management of complications, access to diagnosis and care, SCID newborn screening and more! IPIC is aimed at complementing other regional scientific congresses and meetings by providing a clinical focused programme for an international audience primarily made up of clinicians, but also any interested PID community stakeholders such as patient group leaders, nurses, industry representatives and others.
