Mission:

The Federation of African Immunological Societies (FAIS) is a regional federation of immunology societies in and from Africa. The FAIS exists within the framework of the International Union of Immunological Societies (IUIS), to which it is affiliated, under Article 2.1.2 of the IUIS constitution.

Activities

- To run the FAIS central office at the University of Cape Town in 2014/2015
- To host the 9th FAIS African Immunology Conference in Nairobi, Kenya December 1-4, 2014

Objectives

- To encourage and promote closer contact and interaction between immunologists on the African continent.
- To encourage and support educational/training programmes that will improve the quality of immunological research, teaching and practice in Africa.
- To advocate for the field of immunology in Africa.
- To complement, and not compete or conflict with, objectives and activities of other similar organisations on the African continent.
-
