**Post-doctoral research fellow position in pulmonary mucosal
immunology and the HIV reservoirs at McGill University**

A post-doc research position is available at the Research Institute of the McGill University Health Center (MUHC) to work on a collaborative research project on the pulmonary immunity during HIV infection. This CIHR-funded project is part of the Canadian HIV Cure Enterprise (CanCURE) and aims to assess the immunological mechanisms involved in HIV persistence within the lungs of HIV-infected individuals. The candidate will be co-supervised by Dr Cecilia Costiniuk, Assistant Professor in Infectious Diseases at McGill (principal supervisor) and Dr Mohammad-Ali Jenabian Associate Professor in Immunology and holder of the Canada research chair in Immunovirology at UQAM (co-supervisor).

Qualifications :

- PhD degree in immunology, virology, molecular biology, biochemistry or a related field.
- Strong interest in working with human specimens and HIV.
- Laboratory experience in primary cell culture, molecular biology, flow cytometry and immunology.
- Significant scientific contributions and publications are required.
- Excellent communication and writing skill in English

Salary :

A competitive salary is guaranteed based on the CIHR salary ranks

How to apply:

Please submit your CV, a cover letter and the names and contact information of three referees in one single PDF document to Dr Costiniuk (cecilia.costiniuk@mcgill.ca).

Only potential candidates will be contacted for an interview.
