Re: Postdoctoral Fellow position

We are seeking a highly motivated and experienced postdoctoral scientist with interest immune therapies for hematological malignancies, with a specific focus area on acute myeloid leukemia (AML). The overall goal of Dr. Evan Lind’s research is to develop novel immunotherapeutic strategies to treat AML. We aim to understand the mechanistic basis of leukemia-immune interactions and harness that knowledge to quickly initiate clinical trials. Towards this goal, we work closely with both clinicians and pharmaceutical industry partners. The specific project is studying the effects of combined targeted and immune therapies. We take advantage of both in vivo mouse models and primary human samples for these studies. The selected candidate will be expected to design, execute and present hypothesis-driven independent research experiments as well as apply for research funding. Prior hands-on experience with in vitro immunoassays and multi-parameter flow cytometry is required. Experience with CyTOF preferred but not required as the candidate can be trained in this technology. The postdoc must have excellent communication skills, both verbal and written. In addition, this postdoc must be able to work as a team member as these projects are very collaborative between lab members as well as outside investigators and pharmaceutical partners.

Our laboratory is located in Portland Oregon. Portland is very livable city with an active music, arts and food scene (Ranked #1 food city in the USA by the Washington post). We are located in the Pacific North West of the USA. Portland is 1.5-hour drive to skiable mountains in the East or the beautiful Oregon coast in the West.

Qualified individuals please send CV and cover letter to Dr. Lind at: linde@ohsu.edu

Oregon Health & Science University values a diverse and culturally competent workforce. We are proud to be an equal opportunity, affirmative action organization. Individuals with diverse backgrounds and those who promote diversity and a culture of inclusion are encouraged to apply. Applicants with disabilities can request reasonable accommodation by contacting the Affirmative Action and Equal Opportunity Department at 503-494-5148
