ENGINE TRIM

Make it your own. Build a bike that fits your sense of style. To give your bike a clean and seamless appearance, add a well-chosen decorative trim collection, engine covers, and classic chrome hardware. You’ll be one step closer to the look you’ve been dreaming about.
THE BURST COLLECTION

Split with tradition. With a rich mixture of tuxedo black and machined aluminum finishes, each component in this complete collection is designed to tie the look together. The combination of contrasting edges and the light-enhancing machined pattern makes a powerful visual statement that complements classic and contemporary customizing styles. The Burst Collection components create an impact all by themselves, but can also be seamlessly combined with Edge Cut and other gloss black accessories to complete the look.
A. THE BURST COLLECTION – ENGINE COVERS

The Twin-Cam engine is the focal point of your motorcycle, so dress it with pride. Burst Collection Engine Covers set the stage for a complete custom look. We start with beautifully polished cast or billet parts that are engineered to fit the bike perfectly. Then we apply a rich "tuxedo black" anodized finish and meticulously machine away the surface to expose the satin aluminum below. Start with a couple of components, or go all the way. The components replace the Original Equipment covers for superior fit. Complete the look with gloss black primary and transmission top covers (sold separately). Kits include chrome hardware.
