Additional Information:

Texture is a rectified color body glazed porcelain tile that is available in both Matte and Semi-Polished finishes. The design, much like an artist's conceptual use of textile elements in combination with wind, offers uniqueness of movement and fluid energy. Texture is offered in 5 of today's most current colors, in 12x24, 4x12, 2x2 mosaics, and 3x24 battiscopa (bullnose). The design lends itself well to both modern and contemporary applications, in residential, hospitality and commercial installations. Texture is a truly innovative Avant-garde design for today's marketplace. The brilliance and satin elements of the semi-polished surface will vary and is a characteristics of the overall design. When installing Texture, it is best to take tiles alternatively from various boxes, and lay down tiles orthogonally one to the other. Dynamic Coefficient of Friction (DCOF) exceeds A.D.A. recommendations with a 0,70 rating for Mat and 0,44 rating for Polished finishes.
